Technological Change and Industrial Transformation 2021-08-18 industrial transformation is a research and teaching field with a focus on the phenomenon and mechanisms of industrial development and renewal it concerns changes in economic activities caused by innovation competition and collaboration and has a rich heritage of evolutionary economics institutional economics industrial dynamics technology history and innovation studies it borrows concepts and models from the social sciences sociology history political sciences business management economics behavioural sciences and also from technology and engineering studies in this book the authors present the key theories frameworks and concepts of industrial transformation and use empirical cases to describe and explain the causes processes and outcomes of transformation in the context of digitalization and sustainability they stress that industrial transformation consists both of darwinian survival of the fittest selection and of intentional pursuits of innovation and of industrial capabilities creation the work argues that managing the global trends of transformation is not only about new technology and innovation existing institutional settings and dynamic interactions between technological change organizational adaptation and economic activities also have a profound impact on future trajectories the areas under investigation are of great relevance for strategic management decisions and industrial and technology policies and understanding the mechanisms underlying transformation and sustainable growth

Technological Change, Industrial Restructuring and Regional Development 2018-03-22 originally published in 1986 this book was published at a time when the manufacturing structure of advanced economies was transformed the growing internationalization of production the rising power of giant corporations and the increasing rate of technological innovation remain key issues today the impact of these changes is felt unevenly between regions shown by huge job losses in some places and high tech based growth in others drawing together contributions from economists geographers sociologists and management specialists the problems facing the declining regions are discussed and analyzed the book will be of interest to researchers planners and policymakers concerned with the regional aspects of technological change and industrial restructuring

Understanding Industrial and Corporate Change 2005 understanding industrial and corporate change contains pioneering work on technological organizational and institutional change and explores three distinct themes markets and organizations evolutionary theory and technological change and strategy capabilities and knowledge management

Technical Change and Industrial Transformation 1984 originally published in 1987 and taking a review of the theories and processes of industrial relocation as its starting point this book examines the nature of organisational and technological changes in detail and concludes with a series of industry case studies drawn from areas throughout the world the book examines the salient features and implications of the reorganisation of industries and industrial enterprises reflecting their development or harnessing of technological changes not least to increase their bargaining power with control over or use of labour various chapters discuss policy making and the role of the state posed by the speed scale and character of the changes

Industrial Change in Advanced Economies 2018-03-26 the industrial revolution brought into being a distinct world a world of greater affluence longevity and mobility an urban rather than a rural world but the great surge of economic growth was balanced against severe constraints on the opportunities for expansion revealing an intriguing paradox this book published to considerable critical acclaim explores the paradox and attempts to provide a distinct model of the changes that comprised the industrial revolution

Continuity, Chance and Change 1990-11-30 this book argues that digital globalization is inducing deep and productive transformations making industrial policy necessary in order to reorientate development towards inclusive and more sustainable growth the book also demonstrates that industrialization remains an important development process for emerging countries regarding the future of jobs the authors show how the substitution of labour in automation is not inevitable since technology is also complementary to human capital policymakers should pay more attention to the new skills that will be required a particular concern is the rapid change in technology and business compared to institutions which take time to adapt territories have an important role to play in order to speed up institutional adaptation providing they can act coherently with the other levels of government

Change in Industrial Relations 1987 what has been the role of government industrial policy through agencies such as miti in japan s extraordinary post war development how has the role changed in successive phases of growth what lessons can be learned from this experience by other nations be they in the west or developing countries or economies in transition attempting to introduce competitive market structures these are some of the main questions addressed in this absorbing and thorough study dividing the period into three main phases the author shows that policy played a crucial role in the initial period of post war recovery it did so not by picking winners but by creating a stable base from which development could occur by spreading the cost of introducing market competition over time in the succeeding high growth period and more recently japan s industrial policy attempts only to promote the development of new technology and smooth the decline of sectors that are no longer globally competitive that japan itself no longer practises industrial policy on a wide scale is an irony little appreciated by those advocating the adoption of a japan style industrial policy elsewhere

Managing Industrial Change in Western Europe 2019 this is a collection of recent research results by acknowledged researchers in the field of enterprise transformation and industrial development in central and eastern europe

Transforming Industrial Policy for the Digital Age 1995-10-26 industrial growth and population change deliberately strays across the conventional boundaries of social scientific analysis embracing economic history historical geography demography and sociology the underlying thesis is that economic historians have tended too readily to suppose that the national entity is the appropriate unit of study

Planning for Change 1984-08-16 originally published in 1991 this book deals with industrial and regional changes in western europe and the effectiveness of policies designed to cope with them it examines the regional experiences including successes as well as problems to illuminate the trends and policies raises questions about the issues and reports on the effects and further implications for not just europe but japan and many newly industrializing countries analysing the evolution and effectiveness of local regional national and european policies this is of interest for industrial and development specialises as well as economists planners geographers and policy makers

Technical Change and Industrial Transformation 1999 contributes to an understanding of regional structural transformation in the context of globalisation and technological changes and the formation and evaluation of more differentiated policy making in this area this book focuses on the critical issues relating to the technology knowledge and industrial structure of mature regions
