Acute Drug Reactions in a Hospital Emergency Room 1979

read this book and rage clive hamilton this remarkable investigation of the sickness industry is by two accomplished writers with an incredible story to tell robyn williams three decades ago the head of one of the world's leading drug companies made some remarkably candid comments wishing his company was more like the chewing gum maker wrigley's the chief executive of merck said it had long been his dream to make drugs for healthy people and sell to everyone that dream now drives the marketing machinery of one of the most profitable industries on the planet using their dominating influence in medical science drug companies are marketing fear in order to re define human illness in alliance with company friendly doctors and sponsored patient groups the all powerful pharmaceutical industry is helping to widen the very definitions of disease in order to expand markets for its drugs with compelling clarity selling sickness reveals how the ups and downs of daily life are becoming mental disorders and common complaints are being transformed into frightening conditions shyness is social anxiety disorder pms is a psychiatric illness called pmdd and active children now have adhd as more and more ordinary people are turned into patients drug companies move ever closer to that dream of selling to everyone

Selling Sickness 2005-06-01 the disturbing connection between well meaning physicians and the prescription drug epidemic three out of four people addicted to heroin probably started on a prescription opioid according to the director of the centers for disease control and prevention in the united states alone 16 000 people die each year as a result of prescription opioid overdose but perhaps the most frightening aspect of the prescription drug epidemic is that it's built on well meaning doctors treating patients with real problems in drug dealer md dr anna lembke uncovers the unseen forces driving opioid addiction nationwide combining case studies from her own practice with vital statistics drawn from public policy cultural anthropology and neuroscience she explores the complex relationship between doctors and patients the science of addiction and the barriers to successfully addressing drug dependence and addiction even when addiction

is recognized by doctors and their patients she argues many doctors don't know how to treat it connections to treatment are lacking and insurance companies won't pay for rehab full of extensive interviews with health care providers pharmacists social workers hospital administrators insurance company executives journalists economists advocates and patients and their families drug dealer md is for anyone whose life has been touched in some way by addiction to prescription drugs dr lembke gives voice to the millions of americans struggling with prescription drugs while singling out the real culprits behind the rise in opioid addiction cultural narratives that promote pills as quick fixes pharmaceutical corporations in cahoots with organized medicine and a new medical bureaucracy focused on the bottom line that favors pills procedures and patient satisfaction over wellness dr lembke concludes that the prescription drug epidemic is a symptom of a faltering health care system the solution for which lies in rethinking how health care is delivered
