## **The Globalization of World Politics**

2014

war and change in world politics introduces the reader to an important new theory of international political change arguing that the fundamental nature of international relations has not changed over the millennia professor gilpin uses history sociology and economic theory to identify the forces causing change in the world order the discussion focuses on the differential growth of power in the international system and the result of this unevenness a shift in the balance of power economic or military weakens the foundations of the existing system because those gaining power see the increasing benefits and the decreasing cost of changing the system the result maintains gilpin is that actors seek to alter the system through territorial political or economic expansion until the marginal costs of continuing change are greater than the marginal benefits when states develop the power to change the system according to their interests they will strive to do so either by increasing economic efficiency and maximizing mutual gain or by redistributing wealth and power in their own favour

excerpt from world politics at the end of the nineteenth century as influenced by the oriental situation it has been the intention of the writer in the present volume to gather into a harmonious picture the multitude of facts and considerations that go to make up international politics at the present time the treatment is of necessity suggestive rather than exhaustive but it is believed that while at present no complete historical judgment as to the great forces at work could be delivered still the far reaching importance and dramatic interest of present developments would justify the attempt to obtain a bird s eye view these considerations indicate the purpose as well as the necessary limitations of the present work while the author has in every case sifted his evidence and attempted to found his judgments on unimpeachable testimony the subject is so vast that only the paradoxical specialist in all fields could avoid just criticism the author has however attempted to keep himself entirely free from a priori conceptions and prejudices and to view the great drama of contemporary life as an unimpassioned beholder who forbears to censure or commend the plan of the book may need a word of explanation about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

at the end of the cold war there was much talk of a new world order in which the sovereign state would be held to democratic account fundamental rights would be respected and conflict would be replaced by cooperation based on the rule of law at the start of the new millenium most of this optimism has evaporated this book examines why it is so difficult to improve standards of international behaviour and explores the pre conditions for any realistic attempt to do so it discusses three major issues that have dominated international debate over the past decade the tension between sovereignty and national self determination the problems associated with the attempt to spread democracy around the world and the desirability of external intervention in ethnic and religious conflicts rejecting both the unfounded optimism of the early 1990s and the cynical pessimism of more recent years professor mayall points to the strong elements of continuity in international life he concludes that international society is unlikely to be successfully reformed if governments continue to will progressive ends whilst evading responsibility for their actions

## **An Introduction to World Politics**

1922

in this book mathias albert develops an ambitious theoretical framework that describes world politics as a specific social system set within the wider political system of world society albert s analysis of the historical evolution and contemporary form of world politics takes the theory of social differentiation as its starting point world politics is a specific relatively recent form of politics and albert shows how the development of a distinct system of world politics first began during the long nineteenth century the book goes on to identify the different forms of social differentiation that underlie the variety of contemporary forms of organizing political authority in world politics employing sociological and historical perspectives a theory of world politics also reflects critically on its relation to accounts of world politics in the field of international relations and will appeal to a wide readership in a range of fields

heterarchy in world politics challenges the fundamental framing of international relations and world politics ir theory has always been dominated by the presumption that world politics is at its core a system of states however this has always been problematic challengeable time bound and increasingly anachronistic in the 21st century world politics is becoming increasingly multi nodal and characterized by heterarchy the coexistence and conflict between differently structured micro and meso quasi hierarchies that compete and overlap not only across borders but also across economic financial sectors and social groupings thinking about international order in terms of heterarchy is a paradigm shift away from the mainstream competing paradigms of realism liberalism and constructivism this book explores how since the mid 20th century the dialectic of globalization and fragmentation has caught states and the interstate system in the complex evolutionary process toward heterarchy these heterarchical institutions and processes are characterized by increasing autonomy and special interest capture the process of heterarchy empowers strategically situated agents especially agents with substantial autonomous resources and in particular economic resources in multi nodal competing institutions with overlapping jurisdictions the result is the decreasing capacity of macro states to control both domestic and transnational political economic processes in this book the authors demonstrate that this is not a simple breakdown of states and the states system it is in fact the early stages of a structural evolution of world politics this book will interest students scholars and researchers of international relations theory it will also have significant appeal in the fields of world politics security studies

war studies peace studies global governance studies political science political economy political power studies and the social sciences more generally

## **A Theory of World Politics**
