the term intelligent environments (IEs) refers to the physical spaces in which it and other pervasive computing technologies are integrated and used to achieve specific goals for the user the environment or both the ultimate objectives of IEs are enriching user experience enabling better management and increasing user awareness of that environment this book presents the proceedings of the 13th international conference on intelligent environments held in seoul korea in august 2017 the conference provides a multidisciplinary collaborative forum for researchers and practitioners from computer science electronic engineering building architecture art and design sociology government and education to present theoretical and practical results related to the development and applications of intelligent environments ie 17 focuses on the development of advanced intelligent environments as well as other newly emerging and rapidly evolving topics the book also includes the proceedings of the following associated workshops held during the first 2 days of the conference which emphasize the multi disciplinary and transversal aspects of IEs the 6th international workshop on the reliability of intelligent environments worie 17 the 1st international workshop on intelligent systems for agricultural production and environmental protection isapep 17 the 1st workshop on citizen centric smart cities solutions ccscs 17 and the 1st international workshop on advanced multiple access in mobile telecommunications amamt 17 providing a state of the art overview of the discipline this book will be of interest to professionals from a diversity of fields whose work involves the development or application of intelligent environments

## **Intelligent Environments 2017 2017-08-18**

intelligent environments (IEs) aim to empower users by enriching their experience raising their awareness and enhancing their management of their surroundings the term IE is used to describe the physical spaces where ICT and pervasive technologies are used to achieve specific objectives for the user and/or the environment the growing IE community from academia to practitioners is working on the materialization of IEs driven by the latest technological developments and innovative ideas this book presents the proceedings of the workshops held in conjunction with the 15th international conference on intelligent environments (IE 19) rabat morocco 24-27 June 2019 the conference focused on the development of advanced intelligent environments as well as newly emerging and rapidly evolving topics the workshops included here emphasize multi disciplinary and transversal aspects of IEs as well as cutting edge topics the 8th international workshop on the reliability of intelligent environments worie 19 9th international workshop on intelligent environments

supporting healthcare and well being wishwell 19 5th symposium on future intelligent educational environments and learning sofiee 19 3rd international workshop on intelligent systems for agriculture production and environment protection isapep 19 3rd international workshop on legal issues in intelligent environments liie 19 1st international workshop on intelligent environments and buildings ieb 19 3rd international workshop on citizen centric smart cities services ccscs 19 and the 4th international workshop on smart sensing systems iwsss 19 the book will be of interest to all those whose work involves the design or application of intelligent environments

## **Intelligent Environments 2019 2019-08-06**

this book constitutes the refereed proceedings of the 10th ifip wg 5 11 international symposium on environmental software systems isess 2013 held in neusiedl am see austria in june 2013 the 65 revised full papers presented were carefully reviewed and selected from numerous submissions the papers are organized in the following topical sections environmental application in the scope of the future internet smart and mobile devices used for environmental applications information tools for global environmental assessment environmental applications in risk and crises management seis as a part of the 7th environment action programme of eu human interaction and human factors driving future eis edss developments environmental management accounting and statistics and information systems and applications

## ***Environmental Software Systems. Fostering Information Sharing 2013-09-08***

this book constitutes the carefully refereed post conference proceedings of two international workshops self managing solutions for smart environments s3e 2011 and the workshop on health and well being technologies and services for elderly hwts 2011 as well as a doctoral colloquium held in conjunction with gpc 2011 in oulu finland in may 2011 the 19 revised full papers presented together with 1 keynote lecture were carefully revised and selected from 26 submissions and focus on the topics self managing solutions for smart environments health and well being technologies and services for elderly the topics of the doctoral colloquium papers had a wide scope and they represented different viewpoints and sub disciplines inside the ict field

## ***Grid and Pervasive Computing Workshops 2012-01-18***

this book covers connectivity and edge computing solutions for representative internet of things iot use cases including industrial iot rural iot internet of vehicles iov and mobile virtual reality vr based on their unique characteristics and requirements customized solutions are designed with targets such as supporting massive connections or seamless mobility and achieving low latency or high energy efficiency meanwhile the book highlights the role of artificial intelligence ai in future iot networks and showcases ai based connectivity and edge computing solutions the solutions presented in this book serve the overall purpose of facilitating an increasingly connected and intelligent world the potential benefits of the solutions include increased productivity in factories improved connectivity in rural areas

enhanced safety for vehicles and enriched entertainment experiences for mobile users featuring state of the art research in the iot field this book can help answer the question of how to connect billions of diverse devices and enable seamless data collection and processing in future iot the content also provides insights regarding the significance of customizing use case specific solutions as well as approaches of using various ai methods to empower iot this book targets researchers and graduate students working in the areas of electrical engineering computing engineering and computer science as a secondary textbook or reference professionals in industry who work in the field of iot will also find this book useful

## **Connectivity and Edge Computing in IoT: Customized Designs and AI-based Solutions 2021-11-25**

this book constitutes the refereed proceedings of the 12th international workshop on security and trust management stm 2016 held in heraklion crete greece in september 2016 in conjunction with the 21st european symposium research in computer security esorics 2016 the 13 full papers together with 2 short papers were carefully reviewed and selected from 34 submissions the focus on the workshop was on following topics access control data protection mobile security privacy security and trust policies trust models

## **Fine Woodworking 2003**

facilitating genius illuminating brilliance in your organization is a practical guide for leaders executives facilitators and coaches on the art and science of creative problem solving this book is the product of 10 years of research and the lessons learned from providing professional services to clients from private public and non profit organizations in facilitating genius the author draws on his experience as a certified facilitator and leadership coach he briefly introduces the theory of multiple intelligences shares 25 short vignettes of genius achievement and offers four case studies where the reader can then test their problem solving skills as they consult with the geniuses revealed in this book readers are encouraged to identify the type of smarts they possess and can easily do so by way of the links provided in this book each of the eight intelligences are defined and at least three representative geniuses for each type are offered in this text this book is well illustrated and has quotes and prompts embedded into each of the 25 sample stories of extraordinary achievement and as

an added bonus there are worksheets provided for the reader to use individually or in small groups within his or her organization

## ***Taunton's Fine Woodworking 2007***

this book features a selection of extended papers presented at the 8th ifip wg 12 6 international workshop on artificial intelligence for knowledge management ai4km 2021 held in yokohama japan in january 2021 in the framework of the international joint conference on artificial intelligence ijcai 2020 the 14 revised and extended papers presented together with an invited talk were carefully reviewed and selected for inclusion in this volume they present new research and innovative aspects in the field of knowledge management and discuss methodological technical and organizational aspects of artificial intelligence used for knowledge management the workshop was held virtually

## ***Artificial Intelligence Applications and Innovations. AIAI 2022 IFIP WG 12.5 International Workshops 2022-06-16***

this book constitutes the thoroughly refereed post conference proceedings of the international workshop on interoperability and open source solutions for the internet of things fp7 openiot project held in conjunction with softcom 2014 in split croatia in september 2014 the 11 revised full papers presented together with the extended abstracts of 2 keynote talks were carefully reviewed and selected from numerous submissions during two rounds of reviewing and improvement the papers are organized in topical sections on openiot platform open platforms and standards and iot applications

## **Facilitating Genius: Illuminating Brilliance in Your Organization 2015-04-21**

the attention of many developed countries has increasingly focused on the security and protection of critical infrastructure the use of unmanned systems uss for this purpose has been growing rapidly in recent years as advances in technology increased versatility and smaller size together with the reduced risks and costs associated with removing the need for a pilot or operator on board have all made these systems more attractive this book monitoring and protection of critical infrastructure by unmanned systems presents 15 papers delivered at the nato advanced training course atc of the same name hosted in chisinau the republic of moldova from 30 may to 5 june 2022 this event was held in a hybrid format and was attended in person by 12 of the 31 speakers and the majority of the 92 attendees the aim of the atc was to explore the monitoring and protection of critical infrastructure using uss various uss including ground control stations gcs data communication links and a range of unmanned aerial uav ground ugv and underwater uuv vehicles are covered and the papers included here also deal with topics such as the use of drones for buildings inspection and the new technologies which can help with the recognition and monitoring of anthropogenic threats and natural hazards there is also a focus on data analysis and modeling providing an overview of the use of unmanned vehicle systems and sensor network technology for

as the electrical industry continues to develop one sector that still faces a range of concerns is the electrical distribution system excessive industrialization and inadequate billing are just a few issues that have plagued this electrical sector as it advances into the smart grid environment research is necessary to explore the possible solutions in fixing these problems and developing the distribution sector into an active and smart system the handbook of research on new solutions and technologies in electrical distribution networks is a collection of innovative research on the methods and applications of solving major issues within the electrical distribution system some issues covered within the publication include distribution losses improper monitoring of system renewable energy integration with micro grid and distributed energy sources and smart home energy management system modelling this book is ideally designed for power engineers electrical engineers energy professionals developers technologists policymakers researchers academicians industry professionals and students seeking current research on improving this key sector of the electrical industry

## **Internet of Things (IoT) 2020-05-25**

this book presents the fundamentals and applications of solution focused coaching both in individual coaching and in coaching entire teams it provides central tools for consulting as well as an extensive collection of solution focused coaching questions for practical use in the second part of the book methods and procedures for conducting team coaching workshops are presented the book is aimed primarily at coaches and consultants who want to enrich their work with solution focused coaching as well as managers especially in the field of human resource management

## **Security in Computer and Information Sciences 2018-07-13**

the internet of things iot can be defined as any network of things capable of generating storing and exchanging data and in some cases acting on it this new form of seamless connectivity has many applications smart cities smart grids for energy management intelligent transport environmental monitoring healthcare systems etc and eu policymakers were quick to realize that machine to machine communication and the iot were going to be vital to economic development it was also clear that the security of such systems would be of paramount importance and following the european commission s cybersecurity strategy of the european union in 2013 the eu s horizon 2020 programme was set up to explore available options and possible approaches to addressing the security and privacy issues of the iot this book presents 10 papers which have emerged from the research of the horizon 2020 and chist era programmes and which address a wide cross section of projects ranging from the secure management of personal data and the specific challenges of the iot with respect to the gdpr through access control within a highly dynamic iot environment and increasing trust with distributed ledger technologies to new cryptographic approaches as a counter measure for side channel attacks and the vulnerabilities of iot based ambient assisted living systems the security and safety of the internet of things will remain high on

the agenda of policymakers for the foreseeable future and this book provides an overview for all those with an interest in the field

## **Advances in Information and Communication**

**2019-02-01**

this book covers the nexus between urban health sustainability and peace urban health sustainability and peace is the first book that attempts to put these three critical areas together this novelty approaches the subject matter by delving into evaluating what works what does not work and what should be done to achieve healthy cities we believe this book will be beneficial to a wide range of stakeholders particularly policymakers planners and developers who continuously shape and reshape the structure and environments of our cities and communities unfortunately in most cases the healthiness of the cities may not be of their immediate concern nevertheless it is the concern of the end users citizens or simply those who live and work in cities and communities worldwide to safeguard peace in cities one has to consider sustaining urban health and that is the main aim of this book the ongoing pandemic gives us an excellent reason to study cities health during such a disruptive time we detect many flaws in cities and communities around the world we primarily identify the negative impacts on sustainability and peace in cities in order to sustain a healthy city this book evaluates six sustainability dimensions of physical environmental economic social institutional and technical it then utilizes eight primary dimensions of positive peace evaluating critical areas for future considerations in urbanism these considerations include making cities smarter more resilient and more sustainable the book s ultimate goal is to highlight how we should progress to maintain and sustain urban health as a continuation to the city in need this book covers the nexus between urban health sustainability and peace furthermore by reflecting on the ongoing pandemic crisis metaphorically labelled as the day the world stopped we delve into some key areas beyond the usual planning and policy guidelines lastly the book intends to highlight what has not been studied before i e the relationship between urban health sustainability and peace
