the seven documents in this book which appear for the first time in an english translation from greek and latin constitute a unique contemporary witness to the stalwart opposition of the monk maximus the confessor to seventh century imperial edicts enforcing adherence to the doctrines of monoenergism and monothelitism the doctrines that in christ there are respectively only one energy and one will the monastic resistance led by maximus gained the support of popes john iv theodore and martin i and found many other followers in the west as can be judged by the convocation of 150 bishops at the lateran synod in rome in 649 to condemn imperial religious policy the documents which have been translated from a recent critical edition cover events from the time of maximus arrival in constantinople for his first legal trial in 655 the futile attempts to persuade him to accept an imperial compromise to his final trial in the capital in 662 and his death under appalling conditions in lazica on the coast of the black sea in the same year the contents of these documents provide a rare insight into the difficult period of transition from the decentralized provincial system of government that characterized late antiquity to a more hierarchical structure centred on the power of the emperor in constantinople they also shed light on some lesser known but significant participants in the monothelite controversy several of whom followed their master into exile in lazica maximus two disciples anastasius the monk and anastasius the apocrisiarius their friends theodore spudaeus theodosius of gangra and the brothers theodore and euprepius the religious controversies of both east and west appear in these documents against a backdrop of political turmoil and arab and persian invasions the documents will be important for those interested in early byzantine studies church history historical theology and hagiography

this study contextualizes the achievement of a strategically crucial figure in byzantium s turbulent seventh century the monk and theologian maximus the confessor 580 662 building on newer biographical research and a growing international body of scholarship as well as on fresh examination of his diverse literary corpus paul blowers develops a profile integrating the two principal initiatives of maximus s career first his reinterpretation of the christocentric economy of creation and salvation as a framework for expounding the spiritual and ascetical life of monastic and non monastic christians and second his intensifying public involvement in the last phase of the ancient christological debates the monothelete controversy wherein maximus helped lead an east west coalition against byzantine imperial attempts doctrinally to limit jesus christ to a single divine activity and will devoid of properly human volition blowers identifies what he terms maximus s cosmo politeian worldview a contemplative and ascetical vision of the participation of all created beings in the novel politeia or reordered existence inaugurated by christ s new theandric energy maximus ultimately insinuated his teaching on the christoformity and cruciformity of the human vocation with his rigorous explication of the precise constitution of christ s own composite person in outlining this cosmo politeian theory blowers additionally sets forth a theo dramatic reading of maximus inspired by hans urs von balthasar which depicts the motion of creation and history according to the christocentric plot or interplay of divine and creaturely freedoms blowers also amplifies how maximus s cumulative achievement challenged imperial ideology in the seventh century the repercussions of which cost him his life and how it generated multiple recontextualizations in the later history of theology

st maximus the confessor 580 662 was a major byzantine thinker a theologian and philosopher he developed a philosophical theology in which the doctrine of god creation the cosmic order and salvation is integrated in a unified conception of reality christ the divine logos is the centre of the principles the logoi according to which the cosmos is created and in accordance with which it shall convert to its divine source torstein tollefsen treats maximus thought from a philosophical point of view and discusses similar thought patterns in pagan neoplatonism the study focuses on maximus doctrine of creation in which he denies the possibility of eternal coexistence of uncreated divinity and created and limited being tollefsen shows that by the logoi god institutes an ordered cosmos in which separate entities of different species are ontologically interrelated with man as the centre of the created world the book also investigates maximus teaching of god s activities or energies and shows how participation in these energies is conceived according to the divine principles of the logoi an extensive discussion of the complex topic of participation is provided

the study of maximus the confessor s thought has flourished in recent years international conferences publications and articles new critical editions and translations mark a torrent of interest in the work and influence of perhaps the most sublime of the byzantine church fathers it has been repeatedly stated that the confessor s thought is of eminently philosophical interest however no dedicated collective scholarly engagement with maximus the confessor as a philosopher has taken place and this volume attempts to start such a discussion apart from maximus relevance and importance for philosophy in general a second question arises should towering figures of byzantine philosophy like maximus the confessor be included in an overview of the european history of philosophy or rather excluded from it as is the case today with most histories of european philosophy maximus philosophy challenges our understanding of what european philosophy is in this volume we begin to address these issues and examine numerous aspects of maximus philosophy thereby also stressing the interdisciplinary character of maximian studies

The Christocentric Cosmology of St Maximus the Confessor

maximus the confessor c 580 662 has become one of the most discussed figures in contemporary patristic studies this is partly due to the relatively recent discovery and critical edition of his works in various genres including on the ascetic life four centuries on charity two centuries on theology and the incarnation on the our father two separate books of difficulties addressed to john and to thomas questions and doubts questions to thalassius mystagogy and the short theological and polemical works the impact of these works reached far beyond the greek east with his involvement in the western resistance to imperial heresy notably at the lateran synod in 649 together with pope martin i 649 53 ce maximus the confessor and his circle were the most vocal opponents of constantinople s introduction of the doctrine of monothelism this dispute over the number of wills in christ became a contest between the imperial government and church of constantinople on the one hand and the bishop of rome in concert with eastern monks such as maximus john moschus and sophronius on the other over the right to define orthodoxy an understanding of the difficult relations between church and state in this troubled period at the close of late antiquity is necessary for a full appreciation of maximus contribution to this controversy the editors of this volume aim to provide the political and historical background to maximus activities as well as a summary of his achievements in the spheres of theology and philosophy especially neo platonism and aristotelianism

the beat movement was one of the most radical and innovative literary and arts movements of the 20th century and the history of the beat movement is still being written in the early years of the 21st century unlike other kinds of literary and artistic movements the beat movement is self perpetuating after the 1950s generation headlined by jack kerouac allen ginsberg and william s burroughs a new generation arose in the 1960s led by writers such as diane wakoski

anne waldman and poets from the east side scene in the 1970s and 1980s writers from the poetry project at st mark s church and contributors to world magazine continued the movement the 1980s and 1990s language movement saw itself as an outgrowth and progression of previous beat aesthetics today poets and writers in san francisco still gather at city lights bookstore and in boulder at the jack kerouac school of disembodied poetics and continue the movement it is now a postmodern movement and probably would be unrecognizable to the earliest beats it may even be in the process of finally shedding the name beat but the movement continues the historical dictionary of the beat movement covers the movement s history through a chronology an introductory essay and an extensive bibliography the dictionary section has over 700 cross referenced entries on significant people themes critical issues and the most significant novels poems and volumes of poetry and prose that have formed the beat canon this book is an excellent access point for students researchers and anyone wanting to know more about the beat movement

in this book austin stevenson argues that it is not the divinity of jesus that causes problems for historians but his humanity to insist that jesus was fully human as both theologians and historians do still leaves us with the question of what it means to be human it turns out that theologians and historians often have different answers to this question on both a philosophical and a theological register furthermore historians frequently misunderstand the historiographical implications of classical christology and thus the compatibility between traditional beliefs about jesus and critical historical inquiry through close engagement with the thought of thomas aquinas c 1225 74 this book offers a new path toward the reconciliation of these disciplines by focusing on human knowledge and subjectivity which are central issues in both historical method and christology by interrogating and challenging the normative metaphysical assumptions operative in jesus scholarship a range of possibility is opened up for approaches to jesus that are genuinely historical but not naturalistic
