Basic Skills for Kids

2023-09-04

there is a fundamental gap in education while we focus on building knowledge and securing good grades there is something missing all of us whatever we do need a core set of skills which go beyond the academic to work with others to manage ourselves to communicate effectively and to creatively solve problems we might call them different things but we draw on them as much as numeracy or literacy tom ravenscroft knows them as the enterprise skills if we need them our students need them even more they underpin effective learning in the classroom they stop students dropping out at university they are more highly valued than academic grades by employers they are a foundation for successful entrepreneurship they are the enablers of civic engagement and social mobility when we look to the next decades in a world of increased automation fragmented jobs and the need for constant learning it is these skills that will really set our children and young people up for future success yet as an education system we behave as if they cannot or should not be taught but they can be and they must be tom ravenscroft has written this book almost a decade after he set up enabling enterprise as a social enterprise he was a secondary school teacher and the enabling enterprise programme was for the students in his inner city classroom they were not learning enough in school and were in no sense set up for the rest of their lives over the last ten years he has had the enormous privilege of leading a growing team of teachers and has worked with hundreds of classroom teachers thousands of employer volunteers and over 200 000 students he

has seen these students build those skills with the same rigour and focus as any other academic learning and he has seen that when they are mastered we truly allow our students to achieve their potential

agile development in particular extreme programming xp has been gaining a lot of momentum because it can effectively address the problems plaguing software development in 2002 we the macau productivity and technology center cpttm started to hold courses on xp and oo design to teach the skills in agile development at the beginning we hired a well known software training and consulting company to teach while the instructor was very professional and instructive and the feedbacks from the students were very good the students didn't acquire the skills taught we knew that it was because the concepts involved were abstract and it needed far more exercises for the students to practice in order to acquire the skills therefore we decided to develop our enhanced training materials in particular we selected only 20 of the skills in agile development that deliver 80 of the value while ignoring those useful but non essential skills then we explained these skills in terms of examples and added a lot of real world examples as exercises after adopting this set of materials the new students really

acquired the skills taught now we have organized the training materials into a book essential skills for agile development this book covers the essential skills in oo design test driven development tdd team development planning communication and pair programming
