Intelligent Virtual Agents 2009-09-19

welcome to the proceedings of the 9th international conference on intelligent virtual agents held september 14 16 2009 in amsterdam the netherlands intelligent virtual agents ivas are interactive characters that exhibit human like qualities and communicate with humans or with each other using natural human modalities such as speech and gesture they are capable of real time perception cognition and action allowing them to participate in a dynamic physical and social environment iva is an interdisciplinary annual conference and the main forum for presenting research on modeling developing and evaluating ivas with a focus on communicative abilities and social behavior the development of ivas requires expertise in multimodal interaction and several ai fields such as cognitive modeling planning vision and natural language processing computational models are typically based on experimental studies and theories of human human and human robot interaction conversely iva technology may provide interesting lessons for these fields the realization of engaging ivas is a challenging task so reusable modules and tools are of great value the fields of application range from robot assistants social simulation and tutoring to games and artistic exploration

Assistive Technology 2015-08-27

assistive technology is the term used to describe products or technology based services which support those with disabilities or other limitations to their daily activities enabling them to enjoy a better quality of life this book presents the proceedings of the 13th european conference on the advancement of assistive technology aaate 2015 held in budapest hungary in september 2015 this biennial conference has established itself as a leading forum in the transdisciplinary area of assistive technology providing a unique platform for the gathering of experts from around the world to review progress and challenges in the interdisciplinary fields which contribute to it such as research development manufacturing supply provision and policy the theme of the 2015 conference is attracting new areas and building bridges and this book contains 138 reviewed papers and 28 poster presentations delivered at the conference covering themes as diverse as aging blindness mobility assisted living and accessibility for people with dementia and cognitive impairment offering a current overview of many aspects of it this book will be of interest to all those from researchers and manufacturers to healthcare professionals and end users whose work or daily life involves the relationship between technology and disability

Call TV quiz shows 2007-01-25

call tv quiz shows are an example of television programmes provided by commercial broadcasters in order to increase their revenue the viewer watches the live broadcast then sends a text message or makes a premium rate telephone call in order to take part with the broadcaster keeping a proportion of the call revenue the culture committee has decided to examine this development and whether some form of regulation is required since the programmes seem to be another means of gambling with some members of the public complaining about them this report therefore has set out a number of recommendations as to how broadcasters and regulators should address this the committee states that there seems to be a lack of fairness and transparency throughout the process for example players are generally not told that it is a matter of luck whether a call is

connected to the studio and that the chances of getting through are very slim also the cost of calling is not always made as clear as it might be or the amount players might have to spend to win a prize primary responsibility for maintaining confidence in the call tv quiz show format rests with the operating companies and the broadcasters the committee believes that the guidance drawn up by the two main regulators ofcom and icstis does not go far enough the committee also states that call tv quiz shows should constitute gaming under the gambling act 2005 and the culture department and the gambling commission should consider this as a matter of urgency operators should have voluntarily introduced practices intended to help viewers who make repeated premium rate calls appreciate how much they are spending also some assessment of the addiction to participation in such shows should be undertaken viewers should be made aware that puzzles on call tv quiz shows have a cryptic element and that ofcom should make it obligatory to have games verified with a third party and solutions lodged with them to prevent underhand changes being made while the show is on air ofcom should also publish periodic reports on its monitoring of call tv quiz programmes any practice of misleading viewers about call volumes or of blocking of calls would be unfair and fraudulent and should be punished under criminal law the committee recommends that broadcasters should be required to display some recent historical information about volume of incoming calls and the odds of being connected to the studio also that a single body ofcom take responsibility for registering all complaints

Why Give "Gifts" to the Gifted? 1994-03-04

resources are set aside justifiably to meet the needs of the learning disabled the physically and sensorially challenged and the culturally different gifted and talented students however are too often left to fend for themselves by definition however these students are as different from the average as the other exceptional students

Handbook of Research on Online Pedagogical Models for Mathematics Teacher Education **2019-11-29**

online learning has become an important vehicle for teacher and student learning when well designed online environments can be very powerful in a way that is consistent with the goals of inquiry experimentation investigation reasoning and problem solving so learners can develop a deep understanding of a subject some subjects however are not well suited for this type of learning due to the need for small group collaborating and hands on problem solving the handbook of research on online pedagogical models for mathematics teacher education provides innovative insights into technology applications and tools used in teaching mathematics online and provides examples of online learning environments and platforms that are suitable for meeting math education goals of inquiry investigation reasoning and problem solving the content within this publication examines access to education professional development and web based learning it is designed for teachers curriculum developers instructional designers educational software developers it consultants higher education faculty policymakers administrators researchers academicians and students

Emerging Research, Practice, and Policy on Computational Thinking 2017-04-24

this book reports on research and practice on computational thinking and the effect it is having on education worldwide both inside and outside of formal schooling with coding becoming a required skill in an increasing number of national curricula e.g the united kingdom israel estonia finland the ability to think computationally is quickly becoming a primary 21st century basic domain of knowledge the authors of this book investigate how this skill can be taught and its resultant effects on learning throughout a student s education from elementary school to adult learning
