the book examines the anatomy of evil in the realm of ideological and philosophical beliefs this includes politics culture religion science and law it attempts to answer many questions by giving the reader a better understanding of all aspects of evil including stealth evils that are not even on our radar although the author uses many scriptural verses to support the book s thesis it does not simply rely on scripture but relies on probability science and rationale to draw conclusions while showing consistency with and support of scripture although the author is convinced that the bible is the infallible word of god and believes in biblical christianity he is very critical of denominational christianity and other religions including pseudo science and other religions that masquerade as secular entities he believes that the rapid and virtually complete secularization of our society has only been possible because of the many false foundations that have been established and accepted as fact when they are completely false and destructive those false foundations justify and support many evils that have been and are being promoted in america the book discusses the situation in which america finds itself where we are being destroyed and are near the point of no return the book addresses the current political situation and the upcoming presidential election the final chapter of the book is to encourage skeptics to believe the truth of the bible through rational evidence although this book should connect well with christians it is hoped that the rational approach taken would attract atheists agnostics and skeptics as well as pastors and religious leaders pastors and religious leaders are encouraged to teach the full council of god by relating scriptural principles to our evil culture and even go so far as to attack the false foundations that are making the gospel irrelevant or addressing the contaminated soil that prevents the gospel seeds from germinating

how do stories of particular events turn into global myths while others fade away what becomes known and seen as a global iconic event in stories without borders julia sonnevend considers the ways in which we recount and remember news stories of historic significance focusing on journalists covering the fall of the berlin wall and on subsequent retellings of the event in a variety of ways from legoland reenactments to slabs of the berlin wall installed in global cities sonnevend discusses how certain events become built up so that people in many parts of the world remember them for long periods of time she argues that five dimensions determine the viability and longevity of international news events first a foundational narrative must be established with certain preconditions next the established narrative becomes universalized and a mythical message developed this message is then condensed and encapsulated in a simple phrase a short narrative and a recognizable visual scene counter narratives emerge that reinterpret events and in turn facilitate their diffusion across multiple media platforms and changing social and political contexts sonnevend examines these five elements through the developments of november 9 1989 what came to be known as the fall of the berlin wall stories without borders concludes with a discussion of how global iconic events have an enduring effect on individuals and societies pointing out that after common currencies military alliances and international courts have failed stories may be all that we have to bring hope and unity
