electric wire line logging may be subdivided into four distinct services 1 open hole logging 2 perforating and completion logging 3 production logging 4 miscellaneous auxiliary services the logging programmes shall be fully

specified in the drilling programmes for each well

## **well logging wikipedia**

Dec 07 2023

wireline logging is performed by lowering a logging tool or a string of one or more instruments on the end of a wireline into an oil well or borehole and recording petrophysical properties using a variety of sensors logging tools developed over the years measure the natural gamma ray electrical acoustic stimulated radioactive
