**Dalla crisi alla crescita** 1993 pitirim a sorokin is a controversial figure in the history of sociology of which he remains one of the masters those who read sorokin today must however frame the historical reality experienced by the scholar his russian and american experiences because the evolution of his thought had several phases that correspond to his personal family and professional lives he founded and directed the department of sociology at harvard university for many years this russian american sociologist argued that socio cultural phenomena must be studied following their dynamism in space and time since the constituent elements personality society and culture are constantly changing and cannot be studied separately reviving his thought is not a form of celebration but a moment to reflect on how some sociology classics still have their relevance and how all too often they are forgotten this is why this book takes up his main conceptualizations by anchoring them to contemporary society whose transformations are often difficult to read and above all to highlight how the role of sociology as a science has in part lost sight of its ontological foundation as a service to humanity or public service the theoretical paths taken by sorokin range from social and cultural dynamics to social mobility and to many other topics such as man and society in calamities or love and altruism one of sorokin s latest topics all these topics can revive the idea of a sociology that holds together the micro meso and macro dimensions and

st augustine s confessions is one of the most important works in the history of literature and christian thought written around 397 when augustine was the christian bishop of hippo in modern day algeria the confessions were designed both to spiritually educate those who already shared augustine s faith and to convert those who did not augustine did this through the original maneuver of writing what is now recognized as being the first western autobiography letting readers share in his own experiences of youth sin and eventual conversion the confessions are a perfect example of using reasoning to subtly bring readers around to a particular point of view with augustine inviting them to accompany him on his own spiritual journey towards god so they could make their own conversion carefully structured the confessions run from describing the first 43 years of augustine s life in north africa and italy to discussing the nature of memory before moving on to analyzing the bible itself in order the sections form a carefully structured argument moving from the personal to the philosophical to the contemplative in the hundreds of years since they were first published they have persuaded hundreds of thousands of readers to recognize towards the same god that augustine himself worshipped
