Clinical Decision Making

2006

contains 40 pediatric case histories and questions based on real life client situations every case contains an introductory blueprint of variables that must be considered while evaluating that particular scenario which are pertinent concerning the client nursing protocol and setting of care examples of these variables include the client s age gender or culture the client with a pre existing condition legal issues or communication skills

Pediatrics

2006

analysis judgment decision making these elements are fundamental to nursing the umbrella term critical thinking is fashionable for discussion of those elements and it is a great obstacle to becoming a nurse delmar s case study series is the most ambitious attempt to bridge the gap between content knowledge and clinical application pediatrics is the second installment in the series which recognizes that numerous considerations or variables factor into making nursing decisions every case contains an introductory blueprint of variables that must be considered while evaluating that particular scenario which are pertinent concerning the client nursing protocol or setting of care examples of these variables include age gender or culture of the client the client with a pre existing condition legal issues or communication skills each blueprint is different just as each clinical situation is unique in some way to the previous by simulating the actual decision making process learners gain a comfort level to make informed clinical judgments that will help them become successful nurses quite simply delmar s case study series shortens the distance between the classroom and nursing practice like never before delmar is a part of cengage learning

Cumulated Index Medicus

1987

dioxin and dioxin like compounds or dlcs are found throughout the environment in soil water and air people are exposed to these

unintentional environmental contaminants primarily through the food supply although at low levels particularly by eating animal fat in meat dairy products and fish while the amount of dlc in the environment has declined since the late 1970s the public continues to be concerned about the safety of the food supply and the potential adverse health effects of dlc exposure especially in groups such as developing fetuses and infants who are more sensitive to the toxic effects of these compounds dioxins and dioxin like compounds in the food supply strategies to decrease exposure recommends policy options to reduce exposure to these contaminants while considering how implementing these options could both reduce health risks and affect nutrition particularly in sensitive and highly exposed groups if dietary changes are suggested

Interventional Bronchoscopy

2000

from office jobs and long commutes to passive entertainment like television and video games humans are sitting more than ever though lack of exercise has major health consequences researchers are now examining the additional and widespread health risk of the simple act of sitting for extended periods with research from leading scientists sedentary behavior and health concepts assessments and interventions presents evidence on sedentary behavior its apparent health risks and suggestions on measuring and altering this behavior the highly respected international author team provides an interdisciplinary review of current research examining scientific public health and broader social questions about the implications of sedentary behavior these topics include humans physiological predispositions exacerbation of current health conditions like obesity and diabetes and the design and ergonomics of offices and chairs to examine the many facets of this developing area of study sedentary behavior and health is divided into five parts sedentary behavior concepts and context reviews the physiology of sedentary behavior investigating current habits from the perspectives of evolution industrial engineering and design sedentary behavior and health explores the relationship between sedentary behavior and several major chronic diseases including obesity cardiovascular disease and low back pain measuring and analyzing sedentary behavior explains research methods for understanding and measuring sedentary behavior in order to recognize patterns and design interventions sedentary behavior and subpopulations covers issues risks and behaviors in groups such as children working adults older adults and minorities changing sedentary behavior provides methods and recommendations for improvement with environmental social community worksite and technology based interventions included in this groundbreaking text are learning objectives key concepts and study questions to focus attention on key issues and reinforce concepts reviews of the literature in the field are presented many with comparisons in table form to provide the full scope of research sidebars throughout the text apply theoretical concepts to real world scenarios inactivity is mismatched with many aspects of humans genetic makeup while it is becoming the new norm the consequences of this behavior are emerging as a public health threat sedentary behavior and health will serve as a key reference for the rapidly emerging research area of sedentary behavior
