are humans composed of a body and a nonmaterial mind or soul or are we purely physical beings opinion is sharply divided over this issue in this clear and concise book nancey murphy argues for a physicalist account but one that does not diminish traditional views of humans as rational moral and capable of relating to god this position is motivated not only by developments in science and philosophy but also by biblical studies and christian theology the reader is invited to appreciate the ways in which organisms are more than the sum of their parts that higher human capacities such as morality free will and religious awareness emerge from our neurobiological complexity and develop through our relation to others to our cultural inheritance and most importantly to god murphy addresses the questions of human uniqueness religious experience and personal identity before and after bodily resurrection what are humans what makes us who we are many think that we are just complicated machines or animals that are different from machines only by being conscious in are we bodies or souls richard swinburne comes to the defence of the soul and presents new philosophical arguments that are supported by modern neuroscience when scientific advances enable neuroscientists to transplant a part of brain into a new body he reasons no matter how much we can find out about their brain activity or conscious experiences we will never know whether the resulting person is the same as before or somebody entirely new swinburne thus argues that we are immaterial souls sustained in existence by our brains sensations thoughts and intentions are conscious events in our souls that cause events in our brains while scientists might discover some of the laws of nature that determine conscious events and brain events each person s soul is an individual thing and this is what ultimately makes us who we are the ups downs and exploits of a group of british catholics for whom the sexual revolution came a little later than it did for everybody else in this bracing satire a group of university students make their way through the fifties and into the turbulent sixties and seventies we first meet dennis michael ruth polly and the others at the altar rail of our lady and st jude but soon enough they get caught up in the alternately hilarious and poignant preoccupations of work marriage sex and babies not always in that order a satirical comedy in the tradition of evelyn waugh souls and bodies take an unblinking look at the sexual revolution and the contemporaneous upheavals in the catholic church the result is as unsettlingly true as it is funny this book presents a chronological series of nude photographic portraits of more than 90 diverse girls and women of many ages shapes sizes and conditions plus their personal statements about their bodies and experiences these are often highly personal and intensely moving beyond the stereotypes the boundaries and the restricting self definitions we are women who seek to actualize our potential in all spheres career relationships and in our hearts in this book a world renowned educator and author shows us how we can achieve such wholeness with warmth wit and a rare depth of scholarship the author shows how the traditional jewish paths can help lead women to spiritual awareness isabel vincent s groundbreaking exploration brings to light a dark chapter in our recent history the white slave trade and the international jewish mobsters behind it from the end of the 1860s until the beginning of the second world war thousands of young impoverished jewish women most of them from the hard scrabble shtetls of eastern europe were sold into slavery by a notorious gang of mobsters called the zwi migdal while the enterprise controlled brothels in various locales its main centres of operation were rio de janeiro buenos aires and to a lesser extent new york city to recruit vulnerable country girls pimps would target villages of desperate poverty where they posed as respectable suitors of considerable means who had made their money abroad they would arrange sham marriages to their victims and promise them an easy life in the new world but once they d crossed the ocean these jewish women found themselves caught up in the white slave trade under frequently brutal conditions the young women had to service the needs of a booming population of immigrant men an added hardship to endure was being vehemently shunned by the respectable jewish community banned from synagogue and reviled by their neighbors the women were

forbidden from partaking in the sacred jewish burial ritual so prostitutes banded together to form the society of truth with the promise to do all could they could to help each other be buried in dignity through the society the women observed religious life together setting up private synagogues and kosher kitchens cast aside by their community they created their own a society of love honour to god and faith in each other with the determination and skill of her training as an investigative journalist isabel vincent tells an unforgettable and gripping tale of a shameful chapter in recent history by chronicling the transformations of hospitals from houses of mercy to tools of confinement from dwellings of rehabilitation to spaces for clinical teaching and research from rooms for birthing and dying to institutions of science and technology this book provides a historical approach to understanding of today's hospitals the story is told in a dozen episodes which illustrate hospitals in particular times and places covering important themes and developments in the history of medicine and therapeutics from ancient greece to the era of aids this book furnishes a unique insight into the world of meanings and emotions associated with hospital life and patienthood by including narratives by both patients and care givers by conceiving of hospitals as houses of order capable of taming the chaos associated with suffering illness and death we can better understand the significance of their ritualized routines and rules from their beginnings hospitals were places of research on migrants in western societies has focused on the public and political dimensions of religion this volume starts out from below exploring how religious ideas and practices take form are negotiated and contested within the private domain of the home household and family bringing together ethnographic studies from different parts of the world it explores the role of religious ideas and practices in migrants efforts to sustain create and contest moral and social orders in the context of their everyday life the ethnographic analyses show how religious practices and imaginaries both enable engagement with new social settings and offer a means of connecting and reconnecting with people and places left behind offering a comparative perspective on the varying ways in which religious practices and notions of relatedness interconnect and shape each other the book sheds new light on a contemporary global world inhabited by mobile bodies and souls missionary medicine flourished during the period of high european imperialism from the late 1800s to the 1960s although the figure of mission doctor exemplified by david livingstone and albert schweitzer exercised a powerful articles on asia and africa uses the extensive archives that exist on medical missions to both enrich and challenge existing histories of the clinic in colonial territories whether of the dispensary the hospital the maternity home or leprosy asylum some of the major themes addressed within include the attitude of different christian denominations towards medical mission work their differing
