the whistling dog or dhole of india is a little known distant cousin of our domestic dog highly intelligent wary of man and elusive as a jungle predator this rare and beautiful creature is one of the most difficult animals to study its very nature defies the patience and skill of the most dedicated naturalist yet knowledge about its habits and a more widespread understanding and

appreciation of this species are essential for its protection and continued survival for like so much of the world's wildlife today the dhole is a species threatened with extinction the first in depth field study of the whistling dog the whistling hunters examines the dhole in the animal's environment the book is based on the author's field studies and the observations of other naturalists it presents all the facts currently known about the species as it makes a passionate plea for conservation and the reevaluation of our land use patterns the book is also an attempt to understand the essence of wilderness since it too like the whistling dog is an endangered species

rich with implications for the history of sexuality gender issues and patterns of hellenic literary imagining marcel detienne s landmark book recasts long standing ideas about the fertility myth of adonis the author challenges sir james frazer s thesis that the vegetation god adonis whose premature death was mourned by women and whose resurrection marked a joyous occasion represented the annual cycle of growth and decay in agriculture using the analytic tools of structuralism detienne shows instead that the festivals of adonis depict a seductive but impotent and fruitless deity whose physical ineptitude led to his death in a boar hunt after which his body was found in a lettuce patch contrasting the festivals of adonis with the solemn ones dedicated to demeter the goddess of grain he reveals the former as a parody and negation of the institution of marriage detienne considers the short lived gardens that athenian women planted in mockery for adonis s festival and explores the function of such vegetal matter as spices mint myrrh cereal and wet plants in religious practice and in a wide selection of myths his inquiry exposes among many things attitudes toward sexual activities ranging from perverse acts to marital relations

in recent years nietzsche has emerged as a presiding genius of our intellectual epoch although scholars have noted the influence of nietzsche's thought on wallace stevens the publication of early stevens establishes for the first time the extent to which nietzsche pervades stevens's early work concentrating on poems published between 1915 and 1935 but moving occasionally into later poems as well as letters and essays b j leggett draws together texts of stevens and nietzsche to produce new and surprising readings of the poet's early work for instance peter quince at the clavier is read in the light of nietzsche's discussion of apollonian and dionysian art in the birth of tragedy stevens's early poems on religion including principally sunday morning are seen through the perspective of nietzsche's doctrines of the transvaluation of values genealogy and the innocence of becoming stevens's notions of femininity virility and poetry are examined in relation to nietzsche's texts on gender and creativity this intertextual critique reveals previously undisclosed ideologies operating at the margins of stevens's work enabling leggett to read aspects of the poetry that have until now been unreadable early stevens also considers such issues as stevens's perspectivism his aphoristic style the nietzschean epistemology of his poems of order and the implications of notions of art untruth fiction and interpretation in both stevens and nietzsche though many critics have discussed the concept of intertextuality few have attempted a truly intertextual reading of a particular poet early stevens is an exemplary model of such a reading marking a significant advance in both the form and substance of our

understanding of this quintessential modern poet

in we think what we eat seth kunin presents both an appreciation and critique of professor mary douglas classical work on israelite food rules he places her arguments into the context of related anthropological approaches and suggests a new interpretation of the food rules system based on a rigorous application of structuralist theory kunin then goes on to extend this analysis to other areas of israelite culture through detailed analysis of texts from genesis exodus and judges he demonstrates that the same structural pattern found in the first section in respect of ritual is also characteristic of the mythological material this section of the book also takes up the issue of structural transformation it examines the processes found as the myths move from the israelite context to that of the rabbis the authors of the new testament and of the book of mormon the arguments presented demonstrate that as the myths move from culture to culture diachronically and geographically while the same mythological elements are retained they are restructured and organized based on the structural needs of the new cultural context kunin is also interested in issues of structuralist theory thus he addresses issues related to the processes of structural transformation suggesting processes that lead to changes in structural emphasis and those relating to more significant transformations this is volume 412 in the journal for the study of the old testament supplement series
