this text asserts the value of problem solving within a holistic approach to human communication which considers culture ethnicity and psychosocial issues it is concerned with drawing out commonalities that exist in practice with people with a range of communication disabilities as such it represents a departure from more traditional texts on intervention with communication disability that pigeon hole therapy practice according to the particular client group or presenting condition articulation of the core conceptual frameworks and processes involved in intervention provides the foundation for clinical reasoning and implementation this includes examining the different levels at which intervention is pitched and identifying the core therapeutic techniques used by speech and language therapists across the client spectrum the text is supported by examples drawn from clinical practice

## **Speech and Language Therapy Intervention 2004-01-26**

speech and language pathologists like all professionals who claim to be scientific in their practice make a public commitment to operate on the basis of knowledge derived in accordance with sound scientific standards yet students in communication disorders are given relatively little grounding in the fundamentals of science indeed they often receive implicit encouragement to rely on clinical wisdom this pathbreaking text introduces the principles of critical scientific thinking as they relate to assessing communication problems deciding about alternative approaches to intervention and evaluating outcomes the author provides many illustrative examples to

help readers contextualize the ideas her clear presentation will help not only undergraduate and graduate students but also established professionals reason more effectively about what they are doing and why though the examples come from speech and language pathology this illuminating and readable book constitutes a valuable resource for all clinical practitioners

### **Scientific Thinking in Speech and Language Therapy 2005-04-11**

this book is written by a team of speech and language therapists from the wolfson neurorehabilitation centre it is intended for practitioners working with patients who have acquired communication disorders resulting from brain injury aphasia cognitive communication disorder dysarthria apraxia the authors believe that a therapeutic programme should have its foundations in the linguistic non verbal neurological and neuropsychological perspective of the patient s difficulties the approach the team has developed consists of several different strands of therapy with each strand representing an element of the rehabilitation process assessment goal planning specific individualised treatment education friends and family and psychosocial adjustment this book describes these strands illustrates in a user friendly way how each one relates to therapy and gives some practical ideas of how practitioners might work within them each chapter begins with the guiding principles and evidence bases that underlie the rationale for one particular strand of therapy they then follow examples of practice and case studies of a real life example of each strand this book describes a speech and language therapy service that aims to be responsive to patients needs and develops tailor made intervention programmes that are unique to each individual it includes cd containing assessments and practical tools
