the book focuses primarily on the social psychology of aggressive behaviors providing coverage of laboratory field and survey research findings in the field as well as an integrated analysis of the significance of these findings aimed at the intelligent lay person as well as students and professionals in the field the author presents a critical evaluation of the host of theories about the whys of aggression the book discusses the reasons for and possible prevention of one of the most pressing problems in our society on october 23 and 24 1987 the federal reserve bank of st louis hosted its twelfth annual economic policy conference the u s trade deficit causes consequences and cures this book contains the papers and comments delivered at that conference a sharp decline in the value of the dollar against major foreign currencies began in march 1985 and continued through december 1987 despite this decline the u s trade deficit experienced considerable growth during this time many consider the simultaneous occurrence of these two events over so long a period to be a problem requiring a policy response the conference addresses this issue various papers discuss the cause of the trade deficit the reason for its size and persistence its relationship with other macroeconomic variables its impact on other industrialized countries and various policy proposals aimed at reducing the deficit session i peter hooper and catherine l mann provide an analytical setting for the conference with their the u s external deficit its causes and persistence their observation that the unprecedentedly large u s trade imbalance is striking in both its size and its persistence could well be the subtitle of each of the papers presented the macroeconomic studies which hooper and mann summarize in their review of the existing literature uniformly conclude that the deficit has not responded to fundamental macroeconomic determinants relative u s income growth and the dollar s exchange rate in the way that earlier smaller u s examines the backdrop of rivalry among world powers the events that immediately preceded the first world war the effects of the war itself and its long term consequences suggested level secondary i regard this book as a duty to honor my grandfather andras lehoczky s memory my intention is to present the legend telling how my ancestor witnessed one of the most fundamental turns of the human history genghis khan s vast mongol empire s rise and decline the muslim world s crisis and beginning of the still ongoing expansion as well as crumbling of the roman church s crusade and political superiority the stage is central eastern european region and the near east at the time of the crusades in this edition is the amazing depth of understanding we ve come to expect from robinson on the topic of work addiction gayle porter professor of management rutgers the state university of new jersey comprehensive and highly impressive a great read dr kristin neff author of self compassion a rich comprehensive understanding of how workaholism is taking an insidious toll on our lives individually and collectively tony schwartz author of be excellent at anything a sober voice in a work delirious culture dr patricia love author of how to improve your marriage without talking about it given the rapid increase in the worldwide incidence of gestational diabetes the need for defining the risks and effects associated with raised glucose concentrations in pregnancy is great recent large studies are helping to define the risks as well as identify the benefits of reducing glucose intolerance written by an esteemed list of international authors gestational diabetes origins complications and treatment presents timely reviews relating to some of the most important aspects of gestational diabetes specifically its causes consequences and treatments divided into five sections the book begins with a section on metabolism in pregnancy and gestational diabetes dealing with maternal and foetal glucose metabolism and the controversial area of what actually constitutes gestational diabetes the next section examines risk factors and causes of gestational diabetes including the obvious but often overlooked factors being female and pregnant the text also outlines environmental and genetic risk factors the third section deals with the potential complications of gestational diabetes for both mother and offspring considering short term and long term effects the largest section in the book addresses treatments in an effort to improve the outcome for the mother and the baby chapters describe the nutritional approach considered the cornerstone of treating gestational diabetes as

well as evidence for the role of exercise in its treatment and a useful strategy for treating gestational diabetes pharmacologically the final section discusses future prospects in screening diagnosis prevention pathophysiology and treatment of gestational diabetes this book examines a rapidly emerging new topic in urban settlement patterns the role of shrinking cities much coverage is given to declining fertility rates ageing populations and economic restructuring as the factors behind shrinking cities but there is also reference to resource depletion the demise of single company towns and the micro location of environmental hazards the contributions show that shrinkage can occur at any scale from neighbourhood to macro region and they consider whether shrinkage of metropolitan areas as a whole may be a future trend also addressed in this volume is the question of whether urban shrinkage policies are necessary or effective the book comprises four parts world or regional issues with reference to the european union and latin america national case studies the united states india china korea taiwan germany romania and estonia city case studies detroit buffalo cleveland naples belfast and halle and broad issues such as the environmental consequences of shrinking cities this book will be of interest to scholars and practitioners working in the fields of urban studies economic geography and public policy the good parenting food guide offers straightforward advice for how to encourage children to develop a healthy unproblematic approach to eating explores key aspects of children s eating behavior including how children learn to like food the role of food in their life and how habits are formed and can be changed discusses common problems with children s diets including picky eating under eating overeating obesity eating disorders and how to deal with a child who is critical of how they look turns current research and data into practical tips filled with practical solutions take home points drawings and photos mumsnet blue badge award winner depression is the number one cause of maternal death in developed countries and results in adverse health outcomes for both mother and child it is vital therefore that health professionals are ready and able to help those women that suffer from perinatal and postpartum depression ppd this book provides a comprehensive approach to treating ppd in an easy to use format it reviews the research and brings together the evidence base for understanding the causes and for assessing the different treatment options including those that are safe for use with breastfeeding mothers it incorporates a new psychoneuroimmunology framework for understanding postpartum depression and includes chapters on negative birth experiences infant characteristics psychosocial factors antidepressant medication therapies such as cognitive behavioural therapy herbal medicine and alternative therapies suicide and infanticide invaluable in treating the mothers who come to you for help this helpful guide dispels the myths that hinder effective treatment and presents up to date information on the impact of maternal depression on the health of the mother as well as the health and well being of the infant the two volume oxford companion to comparative politics fills a gap in scholarship on an increasingly important field within political science comparative politics the discipline devoted to the politics of other countries or peoples has been steadily gaining prominence as a field of study allowing politics to be viewed from a wider foundation than a concentration on domestic affairs would permit comparativists apply various theories and concepts to analyze the similarities and differences between political units using the results of their research to develop causalities and generalizations each of these theories and outcomes are thoroughly defined in the companion as are major resultant conclusions those comparativists who have influenced the field in significant ways and politicians whose administrations have shaped the evaluation of contrasting governments approximately 200 revised and updated articles from the oxford companion to politics of the world would serve as a foundation for the set while over 100 new entries would thoroughly examine the field in a lasting more theoretical than current event based way new entries cover such topics as failed states grand strategies and soft power important updates include such countries as china and afghanistan and issues like capital punishment gender and politics and totalitarianism country entries include the most significant nations to permit a focus on non time sensitive analysis in addition 25 1 000 word interpretive essays by notable figures analyze the discipline its issues and accomplishments collectively entries promote deeper understanding of a field that is often elusive to non specialists jonathan boston and simon chapple have written the definitive book on child poverty in new zealand dr russell wills children s commissioner between 130 000 and 285 000 new zealand children live in poverty depending on the measure used these disturbing figures are widely discussed yet often poorly understood if new zealand does not have third world poverty what are these children actually experiencing

is the real problem not poverty but simply poor parenting how does new zealand compare globally and what measures of poverty and hardship are most relevant here what are the consequences of this poverty for children their families and society can we afford to reduce child poverty and if we can how jonathan boston and simon chapple look hard at these questions drawing on available national and international evidence and speaking to an audience across the political spectrum their analysis highlights the strong and urgent case for addressing child poverty in new zealand crucially the book goes beyond illustrating the scale of this challenge and why it must be addressed to identifying real options for reducing child poverty a range of practical and achievable policies is presented alongside candid discussion of their strengths and limitations these proposals for improving the lives of disadvantaged children deserve wide public debate and make this a vitally important book for all new zealanders one quarter of the world's population lives in karst terrains yet karsts are highly vulnerable to stresses caused by human activity this book surveys human impact on karst water showing that the increasing pollution of the environment has to a great extent spoiled sensitive karst ecosystems this text examines such consequences and offers proposals for future solutions and strategies part one provides an overview of the functioning of karsts and of human interaction with karst environments over several millennia part two consists of a systematic examination of the major areas of human activity affecting karst waters such as agriculture industry mining and water exploitation finally part three views the effects on karst groundwater within a broader societal and legislative perspective and considers possible changes of methodology and approach new twenty first century economic social and environmental changes have challenged and reshaped rural australia they range from ageing populations youth out migration immigration policies that seek to place skilled migrants in rural australia tree changers agricultural restructuring and new relationships with indigenous populations challenges also exist around the patchwork economy and the wealth that the mining boom offers some areas while threatening regional economic decline in others rural australia is increasingly not simply a place of production of agriculture and minerals but an idea that individuals seek and are encouraged to consume the socio economic implications of drought water rights and changing farming practices have prefaced new social cultural and economic reforms this book provides a contemporary perspective on rapidly evolving population economic and environmental changes in rural and regional australia itself a significant concept bringing together a range of empirical studies the book builds on established rural studies themes such as population change economic restructuring and globalisation in agriculture but links such changes to environmental change culture class gender and ethnic diversity presenting original and in depth interventions on these issues and their intersections this book assembles the best of contemporary research on rural australia how can a society prevent not deter not punish but prevent crime criminal justice prevention commonly called crime control aims to prevent crime after an initial offence has been committed through anything from an arrest to a death penalty sentence these traditional means have been frequently examined and their efficacy just as frequently questioned promising new forms of crime prevention have emerged and expanded as important components of an overall strategy to reduce crime crime prevention today has developed along three lines interventions to improve the life chances of children and prevent them from embarking on a life of crime programs and policies designed to ameliorate the social conditions and institutions that influence offending and the modification or manipulation of the physical environment products or systems to reduce everyday opportunities for crime each strategy aims at preventing crime or criminal offending in the first instance before the act has been committed each importantly takes place outside of the formal criminal justice system representing an alternative perhaps even socially progressive way to reduce crime the oxford handbook of crime prevention is a comprehensive up to date and authoritative review of research on crime prevention bringing together top scholars in criminology public policy psychology and sociology this handbook includes critical reviews of the main theories that form the basis of crime prevention evidence based assessments of the effectiveness of the most important interventions and cross cutting essays that examine implementation evaluation methodology and public policy covering the three major crime prevention strategies active today developmental community and situational this definitive volume addresses seriously and critically the ways in which the united states and the western world have attempted and should continue to strive for the of crime gain a better understanding of parent child boundaries and the mechanisms for their dissolution the

breakdown of appropriate generational boundaries between parent and child can threaten the child's psychological development. Implications of parent-child boundary dissolution for developmental psychopathology: who is the parent and who is the child explores this covert and oftentimes ignored form of emotional abuse. Discussing in detail the various ways it can manifest, this revealing text comprehensively examines how the burden of meeting the emotional needs of the parent interferes with the child's healthy development. The boundary dissolution patterns of role reversal, enmeshment, psychological control, and triangulation are closely examined with an eye toward providing appropriate strategies for dealing with the problem. Implications of parent-child boundary dissolution for developmental psychopathology is separated into four sections to focus extensively on every aspect of the problem. The first section discusses definitions, concepts, and methodological concerns of the phenomena, including a consideration of the child's developmental responses to boundary dissolution. The second section explores the empirical research concerning boundary dissolution within the family system and includes intriguing information on the actual mechanism that passes the pattern of role reversal on to the following generation. The next section closely examines boundary violations within high-risk families, with a focus on those undergoing divorce. The final section concentrates on cultural contexts of boundary dissolution and includes a look at the perception of familial responsibility and its effects on Bosnian youths. This one-of-a-kind resource is extensively referenced and provides a solid foundation to inspire a new generation of theory research and clinical work.

Implications of parent-child boundary dissolution for developmental psychopathology examines a multidimensional model of boundary dissolution with supporting research, a comprehensive review of published literature in the areas of attachment theory, developmental capacities of the infant, child-rearing practices, and parental beliefs. The theoretical background supporting the construct of boundary dissolution, the boundary disturbance patterns of enmeshment and control, the relationships between interparental conflict, parental responses to children's emotions, and representations of role reversal and vulnerability in children's family drawings, the spill-over effect of marital conflict, role reversal in high-risk families, children's rejection of one parent over another in custody disputes, post-war adjustment of Bosnian adolescents, psychological control in individualist and collectivist groups, representations of parents and children in twentieth-century American novels, and implications of parent-child boundary dissolution for developmental psychopathology is crucial reading for researchers and clinicians who deal with families and psychopathology and is of particular interest to graduate students in clinical child psychology, child and family studies, social work, and developmental psychology.

Corporate Wellness Programs offers contributions from international experts examining the planning, implementation, and evaluation of wellness initiatives in organizations and offering guidance on how to introduce these programs into the workplace. This book explores the view that normative behaviour is part of a complex of social mechanisms, processes, and narratives that are constantly shifting. From this perspective, norms are not a kind of self-contained social object or fact but rather an interplay of many things that we label as norms when we take a snapshot of them at a particular instant. Further, this book pursues the hypothesis that considering the dynamic aspects of these phenomena sheds new light on them. The sort of issues that this perspective opens to exploration include: what is this complex we call a social norm composed of? How do new social norms emerge, and what kind of circumstances might facilitate such an appearance? How context-specific are the norms and patterns of normative behaviour that arise? How do the cognitive and the social aspects of norms interact over time? How do expectations, beliefs, and individual rationality interact with social norm complexes to effect behaviour? How does our social embeddedness relate to social constraint upon behaviour? How might the socio-cognitive complexes that we call norms be usefully researched?

Ebony is the flagship magazine of Johnson Publishing, founded in 1945 by John H. Johnson. It still maintains the highest global circulation of any African American-focused magazine.

Liver Pathophysiology, Therapies, and Antioxidants is a complete volume on morphology, physiology, biochemistry, molecular biology, and treatment of liver diseases. It uses an integral approach towards the role of free radicals in the pathogenesis of hepatic injury and how their deleterious effects may be abrogated by the use of antioxidants. Written by the most prominent authors in the field, this book will be of use to basic and clinical scientists and clinicians working in the biological sciences, especially those dedicated to the study and treatment of liver pathologies. Presents the most recent advances in hepatology with a special focus on the role of oxidative stress in liver injury. Provides in vivo and in vitro models.

to study human liver pathology explains the beneficial effects of antioxidants on liver diseases contains the most recent and modern treatments of hepatic pathologies including but not limited to stem cells repopulation gene therapy and liver transplantation

Aggression 1993 the book focuses primarily on the social psychology of aggressive behaviors providing coverage of laboratory field and survey research findings in the field as well as an integrated analysis of the significance of these findings aimed at the intelligent lay person as well as students and professionals in the field the author presents a critical evaluation of the host of theories about the whys of aggression the book discusses the reasons for and possible prevention of one of the most pressing problems in our society

U.S. Trade Deficit: Causes, Consequences, and Cures 2012-12-06 on october 23 and 24 1987 the federal reserve bank of st louis hosted its twelfth annual economic policy conference the u s trade deficit causes consequences and cures this book contains the papers and comments delivered at that conference a sharp decline in the value of the dollar against major foreign currencies began in march 1985 and continued through december 1987 despite this decline the u s trade deficit experienced considerable growth during this time many consider the simultaneous occurrence of these two events over so long a period to be a problem requiring a policy response the conference addresses this issue various papers discuss the cause of the trade deficit the reason for its size and persistence its relation ship with other macroeconomic variables its impact on other industrialized countries and various policy proposals aimed at reducing the deficit session i peter hooper and catherine l mann provide an analytical setting for the conference with their the u s external deficit its causes and persistence their observation that the unprecedentedly large u s trade imbalance is striking in both its size and its persistence could well be the subtitle of each of the papers presented the macroeconomic studies which hooper and mann summarize in their review of the existing literature uniformly conclude that the deficit has not responded to fundamental macroeconomic determinants relative u s income growth and the dollar s exchange rate in the way that earlier smaller u s
