Death Destruction and Disaster in the American Coal Mining Industry (1999)

2002-12-20

this publication presents information on fatalities involving drownings that occurred in coal and metal nonmetal mining operations from january 1996 through december 1997 it includes statistics for all of the fatalities as well as abstracts and illustrations the drowning fatalities in this report come under several different accident classifications these classifications are slip or fall of person machinery powered haulage electrical and other from january 1996 through december 1997 173 miners and contractors died at coal and metal nonmetal operations of the 172 fatalities 13 fatalities involved drowning which contributed to 7 4 percent of all fatalities during this period

Fatal Accidents in Alabama Coal Mines During 1930

1931

the book provides a critical review of fatal injuries and safety data occurring in the coal mining industry since 1900 excellent charts and graphs are used to magnify and place

special emphasis on safety data from 1982 through 2001 a list of disasters that occurred from 1900 2001 are included which reflect the tragic past of the coal mining industry the book provides an individual summary describing each of the fatal coal mining injuries that occurred during the year 2001 beginning and experienced miners mine managers and the general public as a whole can glean enormous amounts of information and gain knowledge necessary to improve both their own safety as well as the safety of their fellow workers

Coal-mine Fatalities in Kentucky in 1931, 1932, and 1933

1934

excerpt from coal mine fatalities in the united states 1870 1914 with statistics of coal production labor and mining methods by states and calendar years classification and study of mine accidents on the basis of number of persons killed is common and very old but fails to throw enough light upon the problem involved many serious accidents in mines have no fatal results hence in a tabulation of fatalities they are overlooked and the real hazard of the industry is not made clear an accident does not necessarily include an injury that may result therefrom such accidents as the breaking of a hoisting cable an explosion of powder gas or dust a runaway car or motor are all serious although no loss of life results they should be recorded investigated and studied to prevent their repetition no accurate data for the united states are available showing how far the personal element as related to the miner and his co worker the mine foreman or to the superintendent and others in authority contributes to accidents many accidents are due to inexperience on the part of the miner his failure to heed orders a misunderstanding of instructions and last but not least carelessness of himself or his fellow worker a foreman or superintendent may fail to give proper warning regarding the conditions of certain parts of the mine he may not have inspected certain rooms or entries on the day of a mine accident the mine may not be properly equipped or the operator may neglect to comply with the inspector s recommendations there is therefore a personal element on the part of both the operator and the miner that must be considered legislation and the enactment of compensation laws will make the operator realize the seriousness of the mine accident situation when fatalities and injuries are to be paid for in legal tender of the realm the miner must be educated and made to realize the dangers he encounters he must learn that self preservation and the safety of his fellow workmen should receive his first attention he should cooperate with his employer his associates and the state mine inspector to the end that the mine hazard may be reduced to a minimum cooperation for safety should be the watchwords of the operator miner state inspectors and all others in any way interested in the mining industry about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
