This book provides valuable information on taking care of children with complex mental health challenges. Chapters present information in tabular format which makes the book easy to use in practice. The case vignettes are practical and helpful in understanding a child as a unique case and not just a diagnosis. The list of the most valid and reliable screening and assessment tools is valuable as is the information on useful websites. The book also clearly provides up to date basic information on neurobiology and genetics as well as ongoing research in the field. Doody's medical reviews mental health practitioners who work with children are often confronted with complex difficult to treat mental health issues that do not respond to conventional methods of psychotherapy. These children have a web of multiple impairments that are comprised not just of emotional and behavioral issues but also learning and other cognitive disorders. Children with multiple mental health challenges presents an innovative evidence based approach to understanding and treating this difficult population that integrates the child's development and functioning into diagnosis and treatment. It does not rely on diagnostic categories alone but explores the functioning of children in several dimensions of development and considers multiple levels of influence. The book builds on an individualized integrated approach to present a variety of evidence based strategies for working with children with multiple challenges. It considers children from preschool age to adolescence with a number of severe difficulties. These may include extreme aggression, oppositional defiant behavior, significant anxiety and depression, cognitive and academic challenges, delays in speech and language problems with attention and concentration, sensory integration problems and unresolved trauma. The treatment strategies included can be used by various specialists within the intervention team as well as by parents and teachers. Key features presents an innovative approach to working with children with multiple disorders. Often the most challenging cases for clinicians moves beyond standard recipes for treatment planning to encompass developmental including social and biological factors and functional aspects of working with children. Includes case studies as well as detailed treatment plans offers treatment strategies that can be used by the intervention team teachers and parents.

The importance of the early years in young children's lives and the rigid inequality in literacy achievement are a stimulating backdrop to current research in young children's language and literacy development. This book reports new data and empirical analyses that advance the theory of language and literacy with researchers using different methodologies in conducting their study with both a sound empirical underpinning and a captivating analytical rationalization of the results. The contributors to this volume used several methodological methods e.g. quantitative qualitative to describe the complete concept of the study. The achievement of the study and the study in an appropriate manner based on the study's methodology. The contributions to this volume cover a wide range of topics including dual language learners, Latino immigrant children, children who have hearing disabilities, parents and teachers beliefs about language development, early literacy skills of toddlers and preschool children, interventions, multimodalities in early literacies, writing and family literacy. The studies were conducted in various early childhood settings such as child care, nursery school, head start, kindergarten and primary grades and the subjects in the studies represent the pluralism of the globe, a pluralism of language backgrounds, ethnicity, abilities and disabilities. This book was originally published as a special issue of early child development and care.
