

discrimination and racism and the dark side for religion to delicate balances impacting us and the world climate change the pandemic and how ancient structures like stonehenge and the pyramids could have been built for science the study then turns to theological implications of scientific theories including relativity and quantum sure to ruffle the feathers of some from both sides the examination focuses on how scientific paradigms fail to cohere with traditional theological doctrines and presents the potentially uncomfortable view that scientific revolutions might warrant a corresponding revolution for theology itself

multiple criteria decision making mcdm is a subfield of operations research dealing with decision making problems a decision making problem is characterized by the need to choose one or a few among a number of alternatives the field of mcdm assumes special importance in this era of big data and business analytics in this volume the focus will be on modelling based tools for business analytics ba with exclusive focus on the sub field of mcdm within the domain of operations research the book will include an introduction to big data and business analytics and challenges and opportunities for developing mcdm models in the era of big data a user s guide to the bible is a practical introduction to the bible for adults in this study you will learn about the contents date and authorship of each biblical book be introduced to some basic bible study tools and learn how to use them insights bible studies for growing faith is a fresh and timely bible study series in these short term thematically based resources individuals and groups are invited to find meaning and direction for their lives by exploring the scriptures in a way that is both thoughtful and thought provoking beginning oracle sql is your introduction to the interactive query tools and specific dialect of sql used with oracle database these tools include sql plus and sql developer sql plus is the one tool any oracle developer or database administrator can always count on and it is widely used in creating scripts to automate routine tasks sql developer is a powerful graphical environment for developing and debugging queries oracle s is possibly the most valuable dialect of sql from a career standpoint oracle s database engine is widely used in corporate environments worldwide it is also found in many government applications oracle sql implements many features not found in competing products no developer or dba working with oracle can afford to be without knowledge of these features and how they work because of the performance and expressiveness they bring to the table written in an easygoing and example based style beginning oracle sql is the book that will get you started down the path to successfully writing sql statements and getting results from oracle database takes an example based approach with clear and authoritative explanations introduces both sql and the query tools used to execute sql statements shows how to create tables populate them with data and then query that data to generate business results this document brings together a set of latest data points and publicly available information relevant for technology industry we are very excited to share this content and believe that readers will benefit from this periodic publication immensely this book constitutes the thoroughly refereed post proceedings of the annual international conference on

computational intelligence and security cis 2006 held in guangzhou china in november 2006 the 116 revised papers presented were carefully reviewed and selected from a total of 2078 initial submissions during two rounds of revision and improvement the papers are organized in topical sections on bio inspired computing evolutionary computation learning systems and multi agents cryptography information processing and intrusion detection systems and security image and signal processing as well as pattern recognition go in depth with this comprehensive discussion of distributed energy management distributed energy management of electrical power systems provides the most complete analysis of fully distributed control approaches and their applications for electric power systems available today authored by four respected leaders in the field the book covers the technical aspects of control operation management and optimization of electric power systems in each chapter the book covers the foundations and fundamentals of the topic under discussion it then moves on to more advanced applications topics reviewed in the book include system level coordinated control optimization of active and reactive power in power grids the coordinated control of distributed generation elastic load and energy storage systems distributed energy management incorporates discussions of emerging and future technologies and their potential effects on electrical power systems the increased impact of renewable energy sources is also covered perfect for industry practitioners and graduate students in the field of power systems distributed energy management remains the leading reference for anyone with an interest in its fascinating subject matter ubiquitous and pervasive technologies such as rfid and smart computing promise a world of networked and interconnected devices everything from tires to toothbrushes could soon be in communications range heralding the dawn of an era in which today s internet of people gives way to tomorrow s internet of things where billions of objects knowledge discovery and data mining have become areas of growing significance because of the recent increasing demand for kdd techniques including those used in machine learning databases statistics knowledge acquisition data visualization and high performance computing in view of this and following the success of the five previous pakdd conferences the sixth pacific asia conference on knowledge discovery and data mining pakdd 2002 aimed to provide a forum for the sharing of original research results innovative ideas state of the art developments and implementation experiences in knowledge discovery and data mining among researchers in academic and industrial organizations much work went into preparing a program of high quality we received 128 submissions every paper was reviewed by 3 program committee members and 32 were selected as regular papers and 20 were selected as short papers representing a 25 acceptance rate for regular papers the pakdd 2002 program was further enhanced by two keynote speeches delivered by vipin kumar from the univ of minnesota and rajeev rastogi from at t in addition pakdd 2002 was complemented by three tutorials xml and data mining by kyuseok shim and surajit chadhuri mining customer data across various customer touchpoints at commerce sites by jaideep srivastava and data clustering analysis from simple groupings to scalable clustering with constraints by osmar zaiane and andrew foss the current book is a nice blend of number of great ideas theories mathematical models and practical systems in the domain of semantics the book has been divided into two volumes the current one is the first volume which highlights the advances in theories and mathematical models in the

domain of semantics this volume has been divided into four sections and ten chapters the sections include 1 background 2 queries predicates and semantic cache 3 algorithms and logic programming and 4 semantic and interfaces authors across the world have contributed to debate on state of the art systems theories mathematical models in the domain of semantics subsequently new theories mathematical models and systems have been proposed developed and evaluated □□ this book explains how uhf tags and readers communicate wirelessly it gives an understanding of what limits the read range of a tag how to increase it and why that might result in breaking the law and the practical things that need to be addressed when designing and implementing rfid technology avoiding heavy math but giving breadth of coverage with the right amount of detail it is an ideal introduction to radio communications for engineers who need insight into how tags and readers work new to this edition examples of near metal antenna techniques discussion of the wakeup challenge for battery assisted tags with a bat architecture example latest development of protocols epc gen 1 2 0 update 18000 6 discussion with battery assisted tags sensor tags manchester tags and wakeup provisions named a 2012 notable computer book for computer systems organization by computing reviews the only book to give an understanding of radio communications the underlying technology for radio frequency identification rfid praised for its readability and clarity it balances breadth and depth of coverage new edition includes latest developments in chip technology antennas and protocols this 5 volume hcii duxu 2023 book set constitutes the refereed proceedings of the 12th international conference on design user experience and usability duxu 2023 held as part of the 24th international conference hci international 2023 which took place in copenhagen denmark in july 2023 a total of 1578 papers and 396 posters have been accepted for publication in the hcii 2023 proceedings from a total of 7472 submissions the papers included in this volume set were organized in topical sections as follows part i design methods tools and practices emotional and persuasive design part ii design case studies and creativity and design education part iii evaluation methods and techniques and usability user experience and technology acceptance studies part iv designing learning experiences and chatbots conversational agents and robots design and user experience part v duxu for cultural heritage and duxu for health and wellbeing modern information systems differ in essence from their predecessors they support operations at multiple locations and different time zones are distributed and network based and use multidimensional data analysis data warehousing knowledge discovery knowledge management mobile computing and other modern information processing methods this book considers fundamental issues of modern information systems it discusses query processing data quality data mining knowledge management mobile computing software engineering for information systems construction and other topics the book presents research results that are not available elsewhere with more than 40 contributors it is a solid source of information about the state of the art in the field of databases and information systems it is intended for researchers advanced students and practitioners who are concerned with the development of advanced information systems this book includes peer reviewed articles from the 12th international workshop on spoken dialogue system technology iwds 2021 singapore nowadays dialogue systems or conversational agents have become one of the most important mechanisms for human computer or human

□ focuses on information assurance security and privacy services this book discusses program security data security and authentication internet scourges security usable security human centric aspects security privacy and access control economic aspects of security threat modeling intrusion and response this book constitutes the refereed proceedings of the euc 2007 workshops held in conjunction with the ifip international conference on embedded and ubiquitous computing euc 2007 in taipei taiwan in december 2007 the 69 revised full papers presented together with four invited papers were carefully reviewed and selected from about 200 submissions to the seven workshops a broad range of topics are covered radio frequency identification rfid tagging is now used by the department of defense and many of the world s largest retailers including wal mart as rfid continues to infiltrate industries worldwide organizations must harness a clear understanding of this technology in order to maximize its potential and protect against the potential risks it poses the rfid handbook provides an overview of rfid technology its associated security and privacy risks and recommended practices that will enable organizations to realize productivity improvements while also protecting sensitive information and the privacy of individuals expert contributors present a host of applications including rfid enabled automated receiving triage with rfid for massive incidents rfid and nfc in relation to mobile phones and rfid technologies for communication robots and a privacy preserving video surveillance system the unprecedented coverage also includes detailed descriptions of adaptive splitting protocols as well as tree based and probabilistic anti collision protocols drawing on its distinguished editors and world renowned contributors this one of a kind handbook serves as the ultimate reference on rfid from basic research concepts to future applications this book introduces the technologies and techniques of large scale rfid enabled mobile computing systems the discussion is set in the context of specific system case studies where rfid has been the core enabling technology in retail metropolitan transportation logistics and e passport applications rfid technology fundamentals are covered including operating principles core system components and performance trade offs involved in the selection of specific rfid platforms parallel processing offers a solution to the problem of providing the processing power necessary to help understand and master the complexity of natural phenomena and engineering structures by taking several basic processing devices and connecting them together the potential exists of achieving a performance many times that of an individual device however building parallel application programs is today recognized as a highly complex activity requiring specialist skills and in depth knowledge parle is an international european based conference which focuses on the parallel processing subdomain of informatics and information technology it is intended to become the european forum for interchange between experts in the parallel processing domain and to attract both industrial and academic participants with a technical programme designed to provide a balance between theory and practice this volume contains the proceedings of parle 93 the parle conference came into existence in 1987 as an initiative from the esprit i programme and the format was revised in 1991 92 parle 93 is the second conference with the new format and was held in munich this book constitutes the refereed proceedings of the 9th international conference on information security and cryptology icisc 2006 held in busan korea in november december 2006 the 26 revised full

papers presented together with two invited talks have gone through two rounds of reviewing and improvement and were selected from 129 submissions the papers are organized in topical sections on hash functions block and stream ciphers efficient implementation and hardware network security and access control mobile communications security forensics copyright protection biometrics public key cryptosystems and digital signatures this two volume set lncs 4277 4278 constitutes the refereed proceedings of 14 international workshops held as part of otm 2006 in montpellier france in october november 2006 the 191 revised full papers presented were carefully reviewed and selected from a total of 493 submissions to the workshops the first volume begins with 26 additional revised short or poster papers of the otm 2006 main conferences pcamag com is a leading authority on technology delivering labs based independent reviews of the latest products and services our expert industry analysis and practical solutions help you make better buying decisions and get more from technology this handbook covers electronic medical record emr systems which enable the storage management and sharing of massive amounts of demographic diagnosis medication and genomic information it presents privacy preserving methods for medical data ranging from laboratory test results to doctors comments the reuse of emr data can greatly benefit medical science and practice but must be performed in a privacy preserving way according to data sharing policies and regulations written by world renowned leaders in this field each chapter offers a survey of a research direction or a solution to problems in established and emerging research areas the authors explore scenarios and techniques for facilitating the anonymization of different types of medical data as well as various data mining tasks other chapters present methods for emerging data privacy applications and medical text de identification including detailed surveys of deployed systems a part of the book is devoted to legislative and policy issues reporting on the us and eu privacy legislation and the cost of privacy breaches in the healthcare domain this reference is intended for professionals researchers and advanced level students interested in safeguarding medical data this book constitutes the refereed proceedings of the 8th international conference on intelligent data analysis ida 2009 held in lyon france august 31 september 2 2009 the 33 revised papers 18 full oral presentations and 15 poster and short oral presentations presented were carefully reviewed and selected from almost 80 submissions all current aspects of this interdisciplinary field are addressed for example interactive tools to guide and support data analysis in complex scenarios increasing availability of automatically collected data tools that intelligently support and assist human analysts how to control clustering results and isotonic classification trees in general the areas covered include statistics machine learning data mining classification and pattern recognition clustering applications modeling and interactive dynamic data visualization intelligence in networks is a concept the meaning of which is highly related to the time period when it is used in the 1960s 1970s and 1980s it was mainly related to the teleservice repertoire an sich in the 1990s it is more related to efficient flexibility in the introduction of new teleservices and teleservice repertoire this state of the art text sets out to identify and study issues related to solutions for increasing intelligence in networks as examples intelligence networks in telecommunication information networking architecture tina and mobile agents and active networks are different solutions for

improving the grade of network intelligence the areas under discussion include research and development within various closely related fields such as teleservices service architecture and service creation middleware and specification languages mobile agents active networks plug and play issues and quality of service and performance list intelligence in networks contains the proceedings of smartnet 99 the fifth in a series of conferences on intelligence in networks sponsored by the international federation for information processing ifip at the asian institute of technology pathumthani thailand in november 1999 for more than 40 years computerworld has been the leading source of technology news and information for it influencers worldwide computerworld s award winning site computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global it media network explore and work with various microsoft azure services for real time data analytics key featuresÊ understanding what azure can do with your data understanding the analytics services offered by azure understand how data can be transformed to generate more data understand what is done after a machine learning model is builtÊ go through some data analytics real world use cases ÊÊ descriptionÊ data is the key input for analytics building and implementing data platforms such as data lakes modern data marts and analytics at scale require the right cloud platform that azure provides through its services the book starts by sharing how analytics has evolved and continues to evolve following the introduction you will deep dive into ingestion technologies you will learn about data processing services in azure you will next learn about what is meant by a data lake and understand how azure data lake storage is used for analytical workloads you will then learn about critical services that will provide actual machine learning capabilities in azure the book also talks about azure data catalog for cataloging azure ad for access management apps and powerapps for cloud web applications cognitive services for speech vision search and language azure vm for computing and data science vms functions as serverless computing kubernetes and containers as deployment options towards the end the book discusses two use cases on analytics what will you learnÊÊ explore and work with various azure services orchestrate and ingest data using azure data factory learn how to use azure stream analytics get to know more about synapse analytics and its features learn how to use azure analysis services and its functionalities Ê who this book is forÊ this book is for anyone who has basic to intermediate knowledge of cloud and analytics concepts and wants to use microsoft azure for data analytics this book will also benefit data scientists who want to use azure for machine learning Ê table of contentsÊÊ 1 Ê data and its power 2 Ê evolution of analytics and its types 3 Ê internet of things 4 Ê ai and ml 5 Ê why cloud 6 Ê what are a data lake and a modern datamart 7 Ê introduction to azure services 8 Ê types of data 9 Ê azure data factory 10 stream analytics 11 azure data lake store and azure storage 12 cosmos db 13 Ê synapse analytics 14 Ê azure databricks 15 Ê azure analysis services 16 Ê power bi 17 Ê azure machine learning 18 Ê sample architectures and synergies real time and batch 19 Ê azure data catalog 20 Ê azure active directory 21 Ê azure webapps 22 Ê power apps 23 Ê time series insights 24 Ê azure cognitive services 25 Ê azure logicapps 26 Ê azure vm 27 Ê azure functions 28 Ê azure containersÊ service 30 Ê use case 1 31 Ê use case 2 renewable energy auctions provides an overview of renewable energy auctions globally

focusing on the global south since this is where auctions have been pioneered and provided most transformative results renewable energy auctions have become the dominant method for contracting utility scale renewable energy projects in large part due to the cost efficient tariffs secured through this method the ascent of auctions has been particularly rapid and transformative in the global south where many countries have secured renewable energy supplies at record breaking prices this book analyses the experiences of frontier auction markets in latin america sub saharan africa and india with the aim of improving how auctions are designed and implemented globally the book goes beyond the topic of auction design which is concerned with the micro economics of design choices to include auction implementation across ten chapters the authors argue that choices around the auction implementing institution and the procurement process are overlooked in most publications on the subject yet this is often a key factor for determining outcomes moving beyond the program level of analysis auction design and implementation the book includes both country and project level factors impacts on auction outcomes ultimately highlighting that successful price and investment outcomes are dependent upon integration of all three levels of auction design and implementation

Operations and Production Systems with Multiple Objectives 2014-02-03

the first comprehensive book to uniquely combine the three fields of systems engineering operations production systems and multiple criteria decision making optimization systems engineering is the art and science of designing engineering and building complex systems combining art science management and engineering disciplines operations and production systems with multiple objectives covers all classical topics of operations and production systems as well as new topics not seen in any similar textbooks before small scale design of cellular systems large scale design of complex systems clustering productivity and efficiency measurements and energy systems filled with completely new perspectives paradigms and robust methods of solving classic and modern problems the book includes numerous examples and sample spreadsheets for solving each problem a solutions manual and a book companion site complete with worked examples and supplemental articles operations and production systems with multiple objectives will teach readers how operations and production systems are designed and planned how operations and production systems are engineered and optimized how to formulate and solve manufacturing systems problems how to model and solve interdisciplinary and systems engineering problems how to solve decision problems with multiple and conflicting objectives this book is ideal for senior undergraduate ms and phd graduate students in all fields of engineering business and management as well as practitioners and researchers in systems engineering operations production and manufacturing

to use them insights bible studies for growing faith is a fresh and timely bible study series in these short term thematically based resources individuals and groups are invited to find meaning and direction for their lives by exploring the scriptures in a way that is both thoughtful and thought provoking

A User's Guide to the Bible 2010-04-01

beginning oracle sql is your introduction to the interactive query tools and specific dialect of sql used with oracle database these tools include sql plus and sql developer sql plus is the one tool any oracle developer or database administrator can always count on and it is widely used in creating scripts to automate routine tasks sql developer is a powerful graphical environment for developing and debugging queries oracle s is possibly the most valuable dialect of sql from a career standpoint oracle s database engine is widely used in corporate environments worldwide it is also found in many government applications oracle sql implements many features not found in competing products no developer or dba working with oracle can afford to be without knowledge of these features and how they work because of the performance and expressiveness they bring to the table written in an easygoing and example based style beginning oracle sql is the book that will get you started down the path to successfully writing sql statements and getting results from oracle database takes an example based approach with clear and authoritative explanations introduces both sql and the query tools used to execute sql statements shows how to create tables populate them with data and then query that data to generate business results

Beginning Oracle SQL 2014-03-18

this document brings together a set of latest data points and publicly available information relevant for technology industry we are very excited to share this content and believe that readers will benefit from this periodic publication immensely

Medical Data Privacy Handbook 2015-11-26

explore and work with various microsoft azure services for real time data analytics key featuresÉ understanding what azure can do with your data understanding the analytics services offered by azure understand how data can be transformed to generate more data understand what is done after a machine learning model is builtÉ go through some

data analytics real world use cases description data is the key input for analytics building and implementing data platforms such as data lakes modern data marts and analytics at scale require the right cloud platform that azure provides through its services the book starts by sharing how analytics has evolved and continues to evolve following the introduction you will deep dive into ingestion technologies you will learn about data processing services in azure you will next learn about what is meant by a data lake and understand how azure data lake storage is used for analytical workloads you will then learn about critical services that will provide actual machine learning capabilities in azure the book also talks about azure data catalog for cataloging azure ad for access management apps and powerapps for cloud web applications cognitive services for speech vision search and language azure vm for computing and data science vms functions as serverless computing kubernetes and containers as deployment options towards the end the book discusses two use cases on analytics what will you learn explore and work with various azure services orchestrate and ingest data using azure data factory learn how to use azure stream analytics get to know more about synapse analytics and its features learn how to use azure analysis services and its functionalities who this book is for this book is for anyone who has basic to intermediate knowledge of cloud and analytics concepts and wants to use microsoft azure for data analytics this book will also benefit data scientists who want to use azure for machine learning

table of contents

- 1 data and its power
- 2 evolution of analytics and its types
- 3 internet of things
- 4 ai and ml
- 5 why cloud
- 6 what are a data lake and a modern datamart
- 7 introduction to azure services
- 8 types of data
- 9 azure data factory
- 10 stream analytics
- 11 azure data lake store and azure storage
- 12 cosmos db
- 13 synapse analytics
- 14 azure databricks
- 15 azure analysis services
- 16 power bi
- 17 azure machine learning
- 18 sample architectures and synergies real time and batch
- 19 azure data catalog
- 20 azure active directory
- 21 azure webapps
- 22 power apps
- 23 time series insights
- 24 azure cognitive services
- 25 azure logicapps
- 26 azure vm
- 27 azure functions
- 28 azure containers
- 29 azure kubernetes service
- 30 use case 1
- 31 use case 2

The RFID Certification Textbook, 3rd Edition 2007

renewable energy auctions provides an overview of renewable energy auctions globally focusing on the global south since this is where auctions have been pioneered and provided most transformative results renewable energy auctions have become the dominant method for contracting utility scale renewable energy projects in large part due to the cost efficient tariffs secured through this method the ascent of auctions has been particularly rapid and transformative in the global south where many countries have secured renewable energy supplies at record breaking prices this book analyses the experiences of frontier auction markets in latin america sub saharan africa and india with the aim of improving how auctions are designed and implemented globally the book goes beyond the topic of auction design which is concerned with the micro economics of design choices to include auction implementation across ten chapters the authors argue that choices around the auction implementing institution and the procurement

process are overlooked in most publications on the subject yet this is often a key factor for determining outcomes moving beyond the program level of analysis auction design and implementation the book includes both country and project level factors impacts on auction outcomes ultimately highlighting that successful price and investment outcomes are dependent upon integration of all three levels of auction design and implementation
