

An Introduction to Information Theory 1994-01-01

graduate level study for engineering students presents elements of modern probability theory elements of information theory with emphasis on its basic roots in probability theory and elements of coding theory emphasis is on such basic concepts as sets sample space random variables information measure and capacity many reference tables and extensive bibliography 1961 edition

An Introduction to Information Theory 2012-07-13

graduate level study for engineering students presents elements of modern probability theory information theory coding theory more emphasis on sample space random variables capacity etc many reference tables and extensive bibliography 1961 edition

2 2 2 2 1963 2 2

this book presents an introduction to the main concepts of statistical physics followed by applications to specific problems and more advanced concepts selected for their pedagogical or practical interest particular attention has been devoted to the presentation of the fundamental aspects including the foundations of statistical physics as well as to the discussion of important physical examples comparison of theoretical results with the relevant experimental data with illustrative curves is present through the entire textbook this aspect is facilitated by the broad range of phenomena pertaining to statistical physics providing example issues from domains as varied as the physics of classical and quantum liquids condensed matter liquid crystals magnetic systems astrophysics atomic and molecular physics superconductivity and many more this textbook is intended for graduate students msc and phd and for those teaching introductory or advanced courses on statistical physics key features a rigorous and educational approach of statistical physics illustrated with concrete examples a clear presentation of fundamental aspects of statistical physics many exercises with detailed solutions nicolas sator is associate professor at sorbonne university paris france he is a member of the laboratory of theoretical physics of condensed matter lptmc and his research focuses on the physics of liquids nicolas pavloff is professor at paris saclay university france he is a member of laboratoire de physique théorique et modèles statistiques lptms and his domain of research is quantum fluid theory lénaïc couëdel is professor at the university of saskatchewan saskatoon canada and researcher at cnrs france his research area is plasma physics with a focus on complex plasma crystals

Kanazawa Daigaku tosho mokuroku 1964

includes part 1 number 2 books and pamphlets including serials and contributions to periodicals july december

Statistical Physics 2023-08-09

the vast and rapid advancement in telecommunications computers controls and aerospace science has necessitated major changes in our basic understanding of the theory of electrical signals and processing systems there is strong evidence that today s engineer needs to extend and to modernize his analytical techniques the latest fundamental analytical approach for the study of signals and systems seems to have its roots in the mathematics of functional analysis this report contains a bird s eye view of the elements of hilbert spaces and their associated linear operators the first chapter of the report gives an exposition of the most essential properties of hilbert spaces the second chapter presents the elements of linear operators acting on such spaces the report is addressed to engineers and scientists interested in the theory of signals and systems the applications of the theory will be undertaken in a separate report author

Catalog of Copyright Entries. Third Series 1960

the refereed proceedings of the 4th international and interdisciplinary conference on modeling and using context context 2003 held in stanford ca usa in june 2003 the 31 full papers and 15 short papers presented were carefully reviewed selected and revised for inclusion in the book the papers presented deal with the interdisciplinary topic of modeling and using context from various points of view ranging through cognitive science formal logic artificial intelligence computational intelligence philosophical and psychological aspects and information processing highly general philosophical and theoretical issues are complemented by specific applications in various fields

Linear Spaces in Engineering 1971

includes entries for maps and atlases

An Exposition of Hilbert Space and Linear Operators for Engineers and Scientists *1968*

over 220 000 entries representing some 56 000 library of congress subject headings covers all disciplines of science and technology e g engineering agriculture and domestic arts also contains at least 5000 titles published before 1876 has many applications in libraries information centers and other organizations concerned with scientific and technological literature subject index contains main listing of entries each entry gives cataloging as prepared by the library of congress author title indexes

Modeling and Using Context *2007-10-13*

a survey of euclid s elements this text provides an understanding of the classical greek conception of mathematics and its similarities to modern views as well as its differences it focuses on philosophical foundational and logical questions rather than focusing strictly on historical and mathematical issues and features several helpful appendixes
