Pdf free Writing space the computer hypertext and the history of writing (Download Only)

this second edition of jay david bolter s classic text expands on the objectives of the original volume illustrating the relationship of print to new media and examining how hypertext and other forms of electronic writing refashion or remediate the forms and genres of print reflecting the dynamic changes in electronic technology since the first edition this revision incorporates the and other current standards of electronic writing as a text for students in composition new technologies information studies and related areas this volume provides a unique examination of the computer as a technology for reading and writing this book is a study of the computer as a new technology for reading and writing a technology that may replace the printing press as our principal medium of symbolic communication one of the main subjects of writing spaceis hypertext a technique that allows scientists scholars and creative writers to construct texts that interact with the needs and desires of the reader bolter explores both the theory and practice of hypertext demonstrating that the computer as hypertext represents a new stage in the long history of writing one that has far reaching implications in the fields of human and artificial intelligence cognitive science philosophy semiotics and literary theory through a masterful integration of introductory historical illustrative and theoretical material as well as an accompanying diskette containing a sample of hypertextual writing bolter supports his claim

that the computer will carry literacy into a new
age the age of electronic text that will emerge
from the age of print that is now passing his
reflections on literacy in contemporary culture
lead him to a compelling conclusion ironically
cultural literacy is becoming almost synonymous
with computer literacy this collection of essays
continues barrett s investigations into
implementing networked online systems described in
his first book text context and hypertext with a
more focused emphasis on specific hypermedia
systems in four parts the 22 essays take up
designing hypertext and hypermedia systems for the
online user textual intervention and collaboration
new roles for writers and sensemaking and learning
in the online environment in his introduction
barrett analyzes the design of networked online
systems as part of a collaborative process
asserting that the online environment fosters
collaboration by using computer technology to
support interaction among those who design use and
write software the first five essays present a
genealogy of hypertext development assess various
hypertext designs discuss users wants and needs
and analyze the rhetoric of hypertext applications
in light of new models for computer human
interaction seven essays then take up new
important online systems for information retrieval
document production and training in the online
environment included are a first time full scale
analysis of the athena muse hypermedia system
developed at mit the hypertext environment
intermedia developed at brown the university of
maryland s hyperties and the educational online
system for document production and training
technical writers now in its second year of use at
mit new roles for writers and productivity gains
provided by online environments are the subject of
the next six essays the final four essays discuss
instructional efficiency and the failures of

instructional materials novel proposals are
described for addressing the needs and strategies
of learners for supporting cooperative work in
creating revising and testing a software program
for evaluating online help systems and for
eliminating ambiguity in online text the society
of text is included in the information systems
series edited by michael lesk this book explores
the usefulness of looking at very small aspects of
human behavior in order to understand computer
human interaction difficulties with hypertext the
focus is on both mechanical actions and talk as
social action while this approach has been used
fruitfully to study human human interaction gray
has constructed a unique study of human
interaction with machines annotation writing
spaces examines some of the most important
discourses in spatial theory of the last four
decades and considers their impact within the
built environment disciplines the book will be a
key resource for courses on critical theory in
architecture urban studies and geography at both
the graduate and advanced undergraduate level in
his widely acclaimed book hypertext george p
landow described a radically new information
technology and its relationship to the work of
such literary theorists as jacques derrida and
roland barthes now landow has brought together a
distinguished group of authorities to explore more
fully the implications of hypertextual reading for
contemporary literary theory among the
contributors charles ess uses the work of jürgen
habermas and the frankfurt school to examine
hypertext s potential for true democratization
stuart moulthrop turns to deleuze and guattari as
a point of departure for a study of the relation
of hypertext and political power espen aarseth
places hypertext within a framework created by
other forms of electronic textuality david kolb
explores what hypertext implies for philosophy and

philosophical discourse jane yellowlees douglas
gunnar liestol and mireille rosello use
contemporary theory to come to terms with
hypertext narrative terrence harpold investigates
the hypertextual fiction of michael joyce drawing
on derrida lacan and wittgenstein gregory ulmer
offers an example of the new form of writing
hypertextuality demands an acclaimed hypertext
novelist s reflections on art and technology
nonlinearity and the creative process the recent
evolution of western societies has been
characterized by an increasing emphasis on
information and communication as the amount of
available information increases however the user
worker student citizen faces a new problem
selecting and accessing relevant information more
than ever it is crucial to find efficient ways for
users to interact with information systems in a
way that prevents them from being overwhelmed or
simply missing their targets as a result hypertext
systems have been developed as a means of
facilitating the interactions between readers and
text in hypertext information is organized as a
network in which nodes are text chunks e g lists
of items paragraphs pages and links are
relationships between the nodes e g semantic
associations expansions definitions examples
virtually any kind of relation that can be
imagined between two text passages unfortunately
the many ways in which these hypertext interfaces
can be designed has caused a complexity that
extends far beyond the processing abilities of
regular users therefore it has become widely
recognized that a more rational approach based on
a thorough analysis of information users needs
capacities capabilities and skills is needed this
volume seeks to meet that need from a user
centered perspective between systems and users
this volume presents theoretical and empirical
research on the cognitive processes involved in

using hypertext in so doing it illustrates three main approaches to the design of hypertext systems cognitive which examines how users process multilayered hypertext structures ergonomical which explores how users interact with the design characteristics of hardware and software and educational which studies the learning objectives frequency and duration of hypertext sessions type of reading activity and the user s learning characteristics this volume also tries to provide answers for the questions that have plagued hypertext research what is hypertext good for who is hypertext good for if it is useful for learning and instruction then what type what particular cognitive skills are needed to interact successfully with a hypertext system anyone interested in the fields of computer science linguistics psychology education and graphic design will find this volume intriguing informative and a definitive starting point for future research in the field of hypertext reviews the features and applications of a broad range of computer software systems that allow the user to choose the sequence of text or other display at the time of use contains a well annotated bibliography annotation copyright book news inc portland or the subject of hypertext and hypermedia has been witnessing a dramatic rise in interest over the last three years both from the academic and the industrial communities this volume presents the proceedings of the european conference on hypertext echt90 conference held in paris in november 1990 where researchers developers and users were able to meet and discuss the theme of hypertext and hypermedia this volume will be of interest to a broad spectrum of professionals ranging from pure theoreticians of hypergraphs and graph grammars via system developers for electronic publishing to end users of hypertext applications such as medical

information systems and computer aided design
hypertext hypermedia systems and user model based
adaptive systems in the areas of learning and
information retrieval have for a long time been
considered as two mutually exclusive approaches to
information access adaptive systems tailor
information to the user and may guide the user in
the information space to present the most relevant
material taking into account a model of the user s
goals interests and preferences hypermedia systems
on the other hand are user neutral they provide
the user with the tools and the freedom to explore
an information space by browsing through a complex
network of information nodes adaptive hypertext
and hypermedia systems attempt to bridge the gap
between these two approaches adaptation of
hypermedia systems to each individual user is
increasingly needed with the growing size
complexity and heterogeneity of current hypermedia
systems such as the world wide it becomes
virtually impossible to impose guidelines on
authors concerning the overall organization of
hypermedia information the networks therefore
become so complex and unstructured that the
existing navigational tools are no longer powerful
enough to provide orientation on where to search
for the needed information it is also not possible
to identify appropriate pre defined paths or
subnets for users with certain goals and knowledge
backgrounds since the user community of hypermedia
systems is usually quite inhomogeneous this is
particularly true for based applications which are
expected to be used by a much greater variety of
users than any earlier standalone application a
possible remedy for the negative effects of the
traditional one size fits all approach in the
development of hypermedia systems is to equip them
with the ability to adapt to the needs of their
individual users a possible way of achieving
adaptivity is by modeling the users and tailoring

the system s interactions to their goals tasks and
interests in this sense the notion of adaptive
hypertext hypermedia comes naturally to denote a
hypertext or hypermedia system which reflects some
features of the user and or characteristics of his
system usage in a user model and utilizes this
model in order to adapt various behavioral aspects
of the system to the user this book is the first
comprehensive publication on adaptive hypertext
and hypermedia it is oriented towards researchers
and practitioners in the fields of hypertext and
hypermedia information systems and personalized
systems it is also an important resource for the
numerous developers of based applications the
design decisions adaptation methods and experience
presented in this book are a unique source of
ideas and techniques for developing more usable
and more intelligent based systems suitable for a
great variety of users the practitioners will find
it important that many of the adaptation
techniques presented in this book have proved to
be efficient and are ready to be used in various
applications explores the use of hypertext in
postmodern electronic and film media by women
reflecting the changes in the hypertext multimedia
market this book includes illustrated examples of
a variety of new hypermedia systems particularly
those related to the internet plus many examples
of the use of mosaic and the html hypertext
handbook provides a condensed and straightforward
introduction to the main issues concepts and
developments in both the application of hypertext
technology and its interpretation by the academic
community it offers a concise history of the
medium in a manner that will help readers to
better understand contemporary directions in
digital media technology hypertext handbook
provides a comprehensive guide to this complex
concept and is designed to inform and inspire
students and scholars alike in this insightful and

readable volume landow explores the relationship
between contemporary literary and social theory
and the latest advances in computer software voice
literary supplement a useful book for
understanding the effect technology is having on
scholarship semiotic review of books landow s
presentation is measured experiential lucid
moderate and sensible he merely points out that
the concept hypertext lets us test some concepts
associated with critical theory and gracefully
shows how the technology is contributing to
reconfigurations of text author narrative and
literary education post modern culture good news
for teachers who are not too sensitive about their
intellectual authority bad news for print culture
times literary supplement ever since gutenberg
invented movable type we have lived in a culture
dominated by print now we are in the midst of a
communications revolution as profound as that
which saw the printed book replace oral and
manuscript texts hypertext a way of connecting
text pictures film and sound in a nonlinear manner
by electronic links not only creates the forking
paths and blind alleys of the electronic labyrinth
but also provides our means of navigating through
it hypertext is dramatically changing how we read
and write how we teach reading and writing and how
we define literary practices in her knowledgeable
guide to this revolutionary work ilana snyder
gives a lucid and straightforward overview of the
radical effects that hypertext is having on
textual practices focusing on what we mean by text
author and reader she explores the connections
between the practical experience of hypertext and
some of the key insights found in the works of
critical theorists such as barthes and derrida and
hypertext theorists land and joyce neither a
computer evangelist nor a fearful luddite she
assesses the implications for education of reading
and writing in hypertext this book explores the

history of hypertext an influential concept that forms the underlying structure of the world wide and innumerable software applications barnet tells both the human and the technological story by weaving together contemporary literature and her exclusive interviews with those at the forefront of hypertext innovation tracing its evolutionary roots back to the analogue machine imagined by vannevar bush in 1945 the use of hypertext has spread via the world wide and has become the object of empirical research for psychologists cognitive scientists and educational researchers alike today due to its ease of production html editors the following question emerges how do people learn via hypertexts and how can we modify it to increase its learning potential laboratory experiments as well as studies on the production of hypertexts within educational institutions both conceptually and theoretically oriented contributions george landow s widely acclaimed hypertext was the first book to bring together the worlds of literary theory and computer technology in this second edition landow shifts focus from intermedia to microcosm storyspace and the world wide for critics students artists and writers this new edition will remain an invaluable resource 30 illustrations information retrieval ir has concentrated on the development of information management systems to support user retrieval from large collections of homogeneous textual material a variety of approaches have been tried and tested with varying degrees of success over many decades of research hypertext ht systems on the other hand provide a retrieval paradigm based on browsing through a structured information space following pre defined connections between information fragments until an information need is satisfied or appears to be information retrieval and hypertext addresses the confluence of the areas of ir and ht and explores the work done to date in

applying techniques from one area to the other
leading to the development of hypertext
information retrieval hir systems an important
aspect of the work in ir ht and in any user
centred information system is the emergence of
multimedia information and such multimedia
information is treated as an integral information
type in this text the contributed chapters cover
the development of integrated hypertext
information retrieval models and the application
of ir and ht techniques in hypertext construction
and the approaches that can be taken in searching
hir systems these chapters are complemented by two
overview chapters covering respectively
information retrieval and hypertext research and
developments information retrieval and hypertext
is important as it is the first text to directly
address the combined searching browsing paradigm
of information discovery which is becoming so
important in modern computing environments it will
be of interest to researchers and professionals
working in a range of areas related to information
discovery from intermedia to microcosm storyspace
and the landow offers information about the kinds
of hypertext different modes of linking attitudes
toward technology and the proliferation of
pornography and gambling on the internet he also
includes new material on developing internet
related technologies hypertext is digital media
created by piecing together nodes and links the
format gave rise to literary hopes for a new
literature in this book dr hava ritter cohen looks
back at literary hypertext and compares it to
narrative standards of print literature to find
out if literary hypertext fulfilled the great
expectations in reading hypertext mark bernstein
and diane greco have selected the best and most
important studies of hypertext reading and
criticism drawn from disciplines ranging from
philosophy and classical philology to film theory

and technocriticism these indispensable studies
reveal how much we now understand about the
reading hypertext and point the way for important
new work twelve contributors assess the
development role and future of hypertext the
volume includes a new preface updating the subject
since the title s first publication approximately
ten years ago although publisher city and year are
not clearly indicated distributed by isbs
annotation copyrighted by book news inc portland
or hypertext is the term coined for the storage of
electronic data whether it be textual or graphic
in such a way that the whole file in addition to
say a word processor becomes an electronic
concordance this book positions hypertext in an
interdisciplinary area created by the overlap of
psychology computer science and information
science in addition to assessing its importance in
the field of electronic publishing rather than
simply summarize everything that has gone before
it aims to provide a position statement from which
further work can be suggested this book will be of
interest to researchers software authors
publishers and anyone concerned with distributing
information exemplifies the author s ideas about
the ways new information technology alters our
conceptions of textuality and the process of
reading and writing the software package links the
full text of the book with a network of new and
related information including reivews student
comments and selected writing of derrida and other
theorists the essays in hypermedia and literary
studies discuss the theoretical and practical
opportunities and challenges posed by the
convergence of hypermedia systems and traditional
written texts consider a work from shakespeare
imagine as you read it being able to call up
instantly the elizabethan usage of a particular
word variant texts for any part of the work
critical commentary historically relevant facts or

oral interpretations by different sets of actors
this is the sort of richly interconnected
immediately accessible literary universe that can
be created by hypertext electronically linked
texts and hypermedia the extension of linkages to
visual and aural material the essays in hypermedia
and literary studies discuss the theoretical and
practical opportunities and challenges posed by
the convergence of hypermedia systems and
traditional written texts they range from the
theory and design of literary hypermedia to
reports of actual hypermedia projects from
secondary school to university and from
educational and scholarly to creative applications
in poetry and fiction contentshypertext hypermedia
and literary studies theory reading and writing
the electronic book from electronic books to
electronic libraries revisiting reading and
writing the electronic book the rhetoric of
hypermedia some rules for authors topographic
writing hypertext and the electronic writing space
reading from the map metonymy and metaphor in the
fiction of forking paths poem descending a
staircase hypertext and the simultaneity of
experience reading hypertext order and coherence
in a new medium threnody psychoanalytic
digressions on the subject of hypertexts
applications biblical studies and hypertext
ancient materials modern media shaping the study
of classics with hypertext linking together books
adapting published material into intermedia
documents the shakespeare project the emblematic
hyperbook hypercard stacks for fielding s joseph
andrews issues of design and content hypertext for
the pc the rubén dario project hypermedia in
schools html and the art of authoring for the
world wide is devoted to teaching the user how to
generate good hypertext as a result of this rapid
uncontrolled growth the community may be facing a
hypertext crisis thousands of hastily written or

ill conceived documents may soon be presented to
readers poorly formatted or unusable from the
preface the clear and practical ways in which html
and the art of authoring for the world wide sets
forth the principles of the the operation of its
servers and browsers and its publishing concept is
commendable it will be an indispensable guide to
the author as well as the sophisticated user from
the foreword by robert cailliau despite its user
friendliness the has by its own virtue a default
that makes it difficult for people to know where
to begin there is no starting point to the bebo
white s html and the art of authoring for the
world wide will fill this gap immediately as it
provides a clear introductory and sequential
description of the fundamental concepts that lie
underneath the it describes html as an sgml
application explains the relationship between html
and sgml and gives a complete description of all
the structure that html provides from the foreword

this second edition of jay david bolter s classic
text expands on the objectives of the original
volume illustrating the relationship of print to
new media and examining how hypertext and other
forms of electronic writing refashion or remediate
the forms and genres of print reflecting the
dynamic changes in electronic technology since the
first edition this revision incorporates the and
other current standards of electronic writing as a
text for students in composition new technologies
information studies and related areas this volume
provides a unique examination of the computer as a
technology for reading and writing

Writing Space

2011

this book is a study of the computer as a new
technology for reading and writing a technology
that may replace the printing press as our
principal medium of symbolic communication one of
the main subjects of writing spaceis hypertext a
technique that allows scientists scholars and
creative writers to construct texts that interact
with the needs and desires of the reader bolter
explores both the theory and practice of hypertext
demonstrating that the computer as hypertext
represents a new stage in the long history of
writing one that has far reaching implications in
the fields of human and artificial intelligence
cognitive science philosophy semiotics and
literary theory through a masterful integration of
introductory historical illustrative and
theoretical material as well as an accompanying

diskette containing a sample of hypertextual
writing bolter supports his claim that the
computer will carry literacy into a new age the
age of electronic text that will emerge from the
age of print that is now passing his reflections
on literacy in contemporary culture lead him to a
compelling conclusion ironically cultural literacy
is becoming almost synonymous with computer
literacy

the subject of hypertext and hypermedia has been witnessing a dramatic rise in interest over the last three years both from the academic and the

industrial communities this volume presents the
proceedings of the european conference on
hypertext echt90 conference held in paris in
november 1990 where researchers developers and
users were able to meet and discuss the theme of
hypertext and hypermedia this volume will be of
interest to a broad spectrum of professionals
ranging from pure theoreticians of hypergraphs and
graph grammars via system developers for
electronic publishing to end users of hypertext
applications such as medical information systems
and computer aided design

Hypertext and Cognition

1996

hypertext hypermedia systems and user model based
adaptive systems in the areas of learning and
information retrieval have for a long time been
considered as two mutually exclusive approaches to
information access adaptive systems tailor
information to the user and may guide the user in
the information space to present the most relevant
material taking into account a model of the user s
goals interests and preferences hypermedia systems
on the other hand are user neutral they provide
the user with the tools and the freedom to explore
an information space by browsing through a complex
network of information nodes adaptive hypertext
and hypermedia systems attempt to bridge the gap
between these two approaches adaptation of
hypermedia systems to each individual user is
increasingly needed with the growing size
complexity and heterogeneity of current hypermedia
systems such as the world wide it becomes
virtually impossible to impose guidelines on
authors concerning the overall organization of
hypermedia information the networks therefore

become so complex and unstructured that the existing navigational tools are no longer powerful enough to provide orientation on where to search for the needed information it is also not possible to identify appropriate pre defined paths or subnets for users with certain goals and knowledge backgrounds since the user community of hypermedia systems is usually quite inhomogeneous this is particularly true for based applications which are expected to be used by a much greater variety of users than any earlier standalone application a possible remedy for the negative effects of the traditional one size fits all approach in the development of hypermedia systems is to equip them with the ability to adapt to the needs of their individual users a possible way of achieving adaptivity is by modeling the users and tailoring the system s interactions to their goals tasks and interests in this sense the notion of adaptive hypertext hypermedia comes naturally to denote a hypertext or hypermedia system which reflects some features of the user and or characteristics of his system usage in a user model and utilizes this model in order to adapt various behavioral aspects of the system to the user this book is the first comprehensive publication on adaptive hypertext and hypermedia it is oriented towards researchers and practitioners in the fields of hypertext and hypermedia information systems and personalized systems it is also an important resource for the numerous developers of based applications the design decisions adaptation methods and experience presented in this book are a unique source of ideas and techniques for developing more usable and more intelligent based systems suitable for a great variety of users the practitioners will find it important that many of the adaptation techniques presented in this book have proved to be efficient and are ready to be used in various applications

information retrieval ir has concentrated on the development of information management systems to support user retrieval from large collections of homogeneous textual material a variety of approaches have been tried and tested with varying degrees of success over many decades of research hypertext ht systems on the other hand provide a retrieval paradigm based on browsing through a structured information space following pre defined connections between information fragments until an information need is satisfied or appears to be information retrieval and hypertext addresses the confluence of the areas of ir and ht and explores the work done to date in applying techniques from one area to the other leading to the development of hypertext information retrieval hir systems an important aspect of the work in ir ht and in any user centred information system is the emergence

of multimedia information and such multimedia information is treated as an integral information type in this text the contributed chapters cover the development of integrated hypertext information retrieval models and the application of ir and ht techniques in hypertext construction and the approaches that can be taken in searching hir systems these chapters are complemented by two overview chapters covering respectively information retrieval and hypertext research and developments information retrieval and hypertext is important as it is the first text to directly address the combined searching browsing paradigm of information discovery which is becoming so important in modern computing environments it will be of interest to researchers and professionals working in a range of areas related to information discovery

Hypertext/hypermedia

1989

from intermedia to microcosm storyspace and the landow offers information about the kinds of hypertext different modes of linking attitudes toward technology and the proliferation of pornography and gambling on the internet he also includes new material on developing internet related technologies

Memory Machines

2014-12-01

hypertext is digital media created by piecing together nodes and links the format gave rise to literary hopes for a new literature in this book dr hava ritter cohen looks back at literary

hypertext and compares it to narrative standards
of print literature to find out if literary
hypertext fulfilled the great expectations

Multimedia and Hypertext

1995-03-01

in reading hypertext mark bernstein and diane
greco have selected the best and most important
studies of hypertext reading and criticism drawn
from disciplines ranging from philosophy and
classical philology to film theory and
technocriticism these indispensable studies reveal
how much we now understand about the reading
hypertext and point the way for important new work

Writing Hypertext and Learning

2002-07-03

twelve contributors assess the development role
and future of hypertext the volume includes a new
preface updating the subject since the title s
first publication approximately ten years ago
although publisher city and year are not clearly
indicated distributed by isbs annotation
copyrighted by book news inc portland or

Hypertext 2.0

1997

hypertext is the term coined for the storage of
electronic data whether it be textual or graphic
in such a way that the whole file in addition to
say a word processor becomes an electronic
concordance this book positions hypertext in an

interdisciplinary area created by the overlap of psychology computer science and information science in addition to assessing its importance in the field of electronic publishing rather than simply summarize everything that has gone before it aims to provide a position statement from which further work can be suggested this book will be of interest to researchers software authors publishers and anyone concerned with distributing information

Information Retrieval and Hypertext

2012-12-06

exemplifies the author s ideas about the ways new information technology alters our conceptions of textuality and the process of reading and writing the software package links the full text of the book with a network of new and related information including reivews student comments and selected writing of derrida and other theorists

Hypertext and the New Oxford English Dictionary

1987

the essays in hypermedia and literary studies discuss the theoretical and practical opportunities and challenges posed by the convergence of hypermedia systems and traditional written texts consider a work from shakespeare imagine as you read it being able to call up instantly the elizabethan usage of a particular word variant texts for any part of the work critical commentary historically relevant facts or

oral interpretations by different sets of actors this is the sort of richly interconnected immediately accessible literary universe that can be created by hypertext electronically linked texts and hypermedia the extension of linkages to visual and aural material the essays in hypermedia and literary studies discuss the theoretical and practical opportunities and challenges posed by the convergence of hypermedia systems and traditional written texts they range from the theory and design of literary hypermedia to reports of actual hypermedia projects from secondary school to university and from educational and scholarly to creative applications in poetry and fiction contentshypertext hypermedia and literary studies theory reading and writing the electronic book from electronic books to electronic libraries revisiting reading and writing the electronic book the rhetoric of hypermedia some rules for authors topographic writing hypertext and the electronic writing space reading from the map metonymy and metaphor in the fiction of forking paths poem descending a staircase hypertext and the simultaneity of experience reading hypertext order and coherence in a new medium threnody psychoanalytic digressions on the subject of hypertexts applications biblical studies and hypertext ancient materials modern media shaping the study of classics with hypertext linking together books adapting published material into intermedia documents the shakespeare project the emblematic hyperbook hypercard stacks for fielding s joseph andrews issues of design and content hypertext for the pc the rubén dario project hypermedia in schools

Hypertext 3.0

2006-02-10

html and the art of authoring for the world wide
is devoted to teaching the user how to generate
good hypertext as a result of this rapid
uncontrolled growth the community may be facing a
hypertext crisis thousands of hastily written or
ill conceived documents may soon be presented to
readers poorly formatted or unusable from the
preface the clear and practical ways in which html
and the art of authoring for the world wide sets
forth the principles of the the operation of its
servers and browsers and its publishing concept is
commendable it will be an indispensable guide to
the author as well as the sophisticated user from
the foreword by robert cailliau despite its user
friendliness the has by its own virtue a default
that makes it difficult for people to know where
to begin there is no starting point to the bebo
white s html and the art of authoring for the
world wide will fill this gap immediately as it
provides a clear introductory and sequential
description of the fundamental concepts that lie
underneath the it describes html as an sgml
application explains the relationship between html
and sgml and gives a complete description of all
the structure that html provides from the foreword
by eric van herwijnen
