Cost-Benefit Analysis of the African Risk Capacity Facility

2013-11-01

governments play a key role in supporting populations affected by natural disasters including rebuilding infrastructure to ensure continued services and scaling up public safety nets to prevent widespread hunger and poverty however the traditional approach of limiting greater spending to the aftermath of a disaster has many drawbacks external support from bilateral or multilateral donors can be slow and unreliable private sector reinsurance can be prohibitively expensive and reallocating budgets toward recovery and reconstruction is typically a slow process that can even hurt long term development by drawing resources away from effective programs some countries are trying to mitigate this liability by banding together and creating sovereign catastrophe risk pools that allow governments to coordinate with one another to insure their uncertain fiscal liabilities at lower cost countries contribute to the pool which then provides payments if an insured natural disaster strikes the african risk capacity arc has been proposed as a pan africa drought risk pool to insure against drought risk in africa south of the sahara if fully operationalized the arc will mark a major change in how donors fund emergency support to countries in africa during times of need in this paper we undertake a cost benefit analysis of the arc pool and discuss how lessons can inform the design of the arc

Africa and the Indian Ocean Region

2018-04-19

this book examines the presence of africa as a significant force in the western indian ocean africa will increasingly play a pivotal role in the future of the geopolitics of the indian ocean region the book considers the scope for greater african involvement in indian ocean region building activities and seeks to encourage a western indian ocean dialogue the book publishes some of the best papers presented at an indian ocean research group iorg inc symposium held in nairobi kenya in 2013 entitled the political economy of maritime africa in the indian ocean region this symposium was part of a larger project on constructing a sense of indian oceanness chapters include india s new policy of engagement with africa china s growing presence in the indian ocean region security strategies in the western indian ocean the increasing importance and significance of the western indian ocean littoral and cultural linkages between africa and the indian ocean region this book was previously published as a special issue of the journal of the indian ocean region

Africa Quarterly

2001

an arc of instability stretching across africa s sahel region an area of strategic interest for the united states and its allies is plagued by violent extremist organizations veos these organizations including boko haram al qaeda and other terror groups have metastasized and present a serious threat to regional stability

Lions of Africa

2007-11-01

most discussions of the digital divide treat it as a north south issue but the conventional dichotomy doesn t apply to cell phones in sub saharan africa although almost all sub saharan countries are poor by international standards they exhibit great disparities in coverage by cell telephone systems buys dasgupta thomas and wheeler investigate the determinants of these disparities with a spatially disaggregated model that employs locational information for cell phone towers across over 990 000 4 6 km grid squares in sub saharan africa using probit techniques a probability model with adjustments for spatial autocorrelation has been estimated that relates the likelihood of cell tower location within a grid square to potential market size proximate population installation and maintenance cost factors related to accessibility elevation slope distance from a main road distance from the nearest large city and national competition policy probit estimates indicate strong significant results for the supply demand variables and very strong results for the competition policy index simulations based on the econometric results suggest that a generalized improvement in competition policy to a level that

currently characterizes the best performing states in sub saharan africa could lead to huge improvements in cell phone area coverage for many states currently with poor policy performance and an overall coverage increase of nearly 100 percent

Militancy and the Arc of Instability

2016-10-28

this book is an ambitious integration of ecological archaeological anthropological land use sciences drawing on human geography demography and economics of development across the east africa region it focuses on understanding and unpicking the interactions that have taken place between the natural and unnatural history of the east african region and trace this interaction from the evolutionary foundations of our species c 200 000 years ago through the outwards and inwards human migrations often associated with the adoption of subsistence strategies new technologies and the arrival of new crops the book will explore the impact of technological developments such as transitions to tool making metallurgy and the arrival of crops also involved an international dimension and waves of human migrations in and out of east africa time will be presented with a widening focus that will frame the contemporary with a particular focus on the anthropocene last 500 years to the present day many of the current challenges have their foundations in precolonial and colonial history and as such there will be a focus on how these have evolved and the impact on environmental and human landscapes moving into the anthropocene era there was increasing exposure to the international drivers of change such as those associated with ivory and slave trade these international trade routes were tied into the ensuing decimation of elephant populations through to the exploitation of natural mineral resources have been sought after through to the present day the book will provide a balanced perspective on the region the people and how the natural and unnatural histories have combined to create a dynamic region these historical perspectives will be galvanized to outline the future changes and the challenges they will bring around such issues as sustainable development space for wildlife and people and the position of east africa within a globalized world and how this is potentially going to evolve over the coming decades

Determinants of a Digital Divide in Sub- Saharan Africa

2008

colin turnbull made a name for himself with the forest people his acclaimed study of african pygmies his second book however the mountain people ignited a swirl of controversy within anthropology and tainted turnbull s reputation as a respected anthropologist in this scrupulously researched biography roy richard grinker charts the rise and fall of this colorful and controversial man from his scottish family and british education to travels in africa and his great love affair with joe towles grinker noted for his own work on the pygmies herein gives readers a fascinating account of turnbull s life and work originally published by st martin s press

Mapping and Surveying of Africa South of the Sahara

1958

the collective inquiries in this volume address ethnicity in ancient africa as social fact and political artifact along numerous dimensions is ethnicity a useful analytic what can archaeology say about the kinds of deeper time questions which scholars have asked of identities in africa eleven authors engage with contemporary anthropological historical and archaeological perspectives to examine how ideas of self understanding belonging and difference in africa were made and unmade they examine how these intersect with other salient domains of social experience states landscapes discourses memory technology politics and power the various chapters cover broad geographic and temporal ground following an arc across senegal mali nigeria cameroon the democratic republic of congo rwanda and east africa spanning from prehistory to the colonial period

East Africa's Human Environment Interactions

2022-01-13

rock art is one of the most visible and geographically widespread of cultural expressions and it spans much of the period of our species existence rock art also provides rare and often unique insights into the minds and visually creative capacities of our ancestors and how selected rock outcrops with distinctive images were used to construct symbolic landscapes and shape worldviews equally important rock art is often central to the expression of and engagement with spiritual entities and forces and in all these dimensions it signals the diversity of cultural practices across place and through time over the past 150 years archaeologists have studied ancient arts on rock surfaces both out in the open and within caves and rock shelters and social anthropologists have revealed how people today use art in their daily lives the oxford handbook of the archaeology and anthropology of rock art showcases examples of such research from around the world and across a broad range of cultural contexts giving a sense of the art's regional variability its antiquity and how it is meaningful to people in the recent past and today including how we have ourselves tended to make sense of the art of others replete with our own preconceptions it reviews past present and emerging theoretical approaches to rock art investigation and presents new cutting edge methods of rock art analysis for the student and professional researcher alike

In the Arms of Africa

2001-11-01

universally recognised as by far the most authoritative work ever published on the subject the birds of africa is a superb multi contributor reference work with encyclopaedic species texts stunning paintings of all species and numerous subspecies hundreds of informative line drawings detailed range maps and extensive bibliographies each volume contains an introduction that brings the reader up to date with the latest developments in african ornithology including the evolution and biogeography of african birds diagnoses of the families and genera often with superspecies maps are followed by the comprehensive species accounts themselves these include descriptions of range and status field characters voice general habits food and breeding habits full bibliographies acoustic references and indexes complete this scholarly work of reference this fourth volume in the series deals comprehensively with broadbills pittas larks swallows and martins wagtails pipits and longclaws cuckoo shrikes bulbuls waxwings dippers wrens accentors and chats the editors and artists have worked closely with other authors all acknowledged experts in their field to produce a superb reference in which comprehensive texts on every species are complemented by accurate and detailed paintings and drawings of the birds themselves

Ethnic Ambiguity and the African Past

2016-07

annotation biological control has made a major contribution to integrated pest management ipm in africa but its documentation has been scattered and often under reported this book provides a review of the most important studies including not only successes but also on going challenges the focus is on arthropod pests and weeds but diseases are also covered where significant in 24 chapters case studies and promising research results are presented that cover biocontrol by naturally occurring agents by exotic agents or by seasonal manipulation this book provides a valuable resource for scientists worldwide it is particularly useful for pest control professionals working in africa

The Oxford Handbook of the Archaeology and Anthropology of Rock Art

2018-10-17

agricultural productivity in africa trends patterns and determinants presents updated and new analyses of land labor and total productivity trends in african agriculture it brings together analyses of a unique mix of data sources and evaluations of public policies and development projects to recommend ways to increase agricultural productivity in africa this book is timely in light of the recent and ongoing growth recovery across the continent the good news is that agricultural productivity in africa increased at a moderate rate between

1961 and 2012 although there are variations in the rate of growth in land labor and total factor productivities depending on country and region differences in input use and capital intensities in agricultural production in the various farming systems and agricultural productivity zones also affect advancements in technology one conclusion based on the book's research findings derives from the substantial spatial variation in agricultural productivity for areas with similar agricultural productivity growth trends and factors what works well in one area can be used as the basis for formulating best fit location specific agricultural policies investments and interventions in similar areas this finding along with others will be of particular interest to policy and decisionmakers

The Birds of Africa: Volume IV

2020-06-25

the first book to examine the full historical arc of secession and secessionist conflict across sub saharan africa wars fought for political separation have become omnipresent in post colonial africa from the division of sudan to the continued fragmentation of somalia and the protracted struggles of cabinda and azawad conflict over secession and separation continues to the present day this is the first single volume to examine the historical arc of secession and secessionist conflict across sub saharan africa paying particular attention to the development of secessionist conflicts and their evolving goals secession and separatist conflicts in postcolonial africa draws on case studies and rigorous research to examine three waves of secessionist movements themselves defined by international conflict and change using detailed case studies the authors offer a framework to understand how secession and separation occur how these are influenced by both preceding movements and global political trends and how their ongoing legacies continue to shape african regional politics deeply engaging and thoroughly researched this book presents a nuanced and important and important new overview of african separatist and secessionist conflicts it addresses the structures goals and underlying influences of these movements within a broader global context to impart a rich understanding of why these conflicts are waged and how they succeed or fail

Biological Control in IPM Systems in Africa

2003

gain a holistic view of agricultural re insurance and capital market risk transfer increasing agricultural production and food security remain key challenges for mankind in order to meet global food demand the food and agriculture organisation estimates that production has to increase by 50 by 2050 and requires large investments agricultural insurance and financial instruments have been an integral part to advancing productivity and are becoming more important in increasingly globalized and specialized agricultural supply chains in the wake of potentially more frequent and severe natural disasters in today's key producing markets underwriting pricing and transferring agricultural risks is complex and requires a solid understanding of the production system exposure perils and the most suitable products which vastly differ among developed and developing markets in the last decade new insurance schemes in emerging agricultural markets have greatly contributed to the large growth of the industry from a premium volume of us 10 1 billion 2006 to us 30 7 billion 2017 this growth is bound to continue as insurance penetration and exposure increase and new schemes are being developed agricultural re insurance has become a cornerstone of sovereign disaster risk financing frameworks agricultural risk transfer introduces the main concepts of agricultural re insurance and capital market risk transfer that are discussed through industry case studies it also discusses best industry practices for all main insurance products for crop livestock aquaculture and forestry risks including risk assessment underwriting pricing modelling and loss adjustment describes agricultural production risks and risk management approaches covers risk transfer of production and financial risks through insurance and financial instruments introduces modelling concepts for the main perils and key data sources that support risk transfer through indemnity and index based products describes risk pricing and underwriting approaches for crop livestock aquaculture and forestry exposure in developed and developing agricultural systems become familiar with risk transfer concepts to reinsurance and capital markets get to know the current market landscape and main risk transfer products for individual producers agribusinesses and governments through theory and comprehensive industry case studies through agricultural risk transfer you ll gain a holistic view of agricultural re insurance and capital market solutions which will support better underwriting more structured product development and

improved risk transfer

Agricultural productivity in Africa

2016-07-14

the rainbow nation benefits from an internationally competitive private sector which accounts for roughly 70 of gdp and extremely competitive infrastructure its utility sector for example produces just under half of the total power generated on the african continent south africa represents by far the most developed market in africa but there are still some structural challenges it is grappling with government strategies have set a target of increasing labour market participation from 54 in 2010 to 65 by 2030 bringing the number of workers in the formal sector to 25.3m people and lowering unemployment from 25 to 6 while its fiscal space is narrow long term investments in infrastructure education and health are expected to be key to attaining its growth potential recent years have seen both the public and private sectors look to strengthen regulatory frameworks in mining and industry in some cases like the automotive sector with impressive results

By all means necessary: Protecting civilians and preventing mass atrocities in Africa

2017-05-16

this volume focuses on late mesoproterozoic to early cambrian events related to gondwana assembly and break up the nineteen papers provide a comprehensive review including advanced knowledge and new data from all critical areas of east gondwana the recent knowledge of the evolution of east gondwana which was regarded as an integral part of the mesoproterozoic supercontinent rodinia is the major theme of the volume which is reinforced by highlighting this radical and new understanding of the evolution of this region

Secession and Separatist Conflicts in Postcolonial Africa

2020

in one of the first analyses of contemporary indian-african relations this detailed book draws upon a collection of case studies that explore interrelated topics such as trade investment development aid civil society relations security and geopolitics while china's relationship to africa has been thoroughly examined knowledge and analysis of india's role in africa has until now been limited this book fills the gap and compares and contrasts india to china's role as a rising global power in the african continent

Agricultural Risk Transfer

2018-12-18

the volume deals with the countries of the middle east and north africa that are facing a particularly troubled period in their historical development this report explores the distinctive dynamics and characteristics of these challenges in the post arab spring era

The Report: South Africa 2013

2013-09-04

west africa's women of god examines the history of direct revelation from emitai the supreme being which has been central to the diola religion from before european colonization to the present day robert m baum charts the evolution of this movement from its origins as an exclusively male tradition to one that is largely female he traces the response of diola to the distinct challenges presented by conquest colonial rule and the post colonial era looking specifically at the work of the most famous diola woman prophet alinesitoué baum addresses the history of prophecy in west africa and its impact on colonialism the development of local religious traditions and

the role of women in religious communities

A ricardian Analysis of the distribution of climate change impacts on agriculture across agro-ecological zones in africa

2009

universally recognised as by far the most authoritative work ever published on the subject the birds of africa is a superb multi contributor reference work with encyclopaedic species texts stunning paintings of all species and numerous subspecies hundreds of informative line drawings detailed range maps and extensive bibliographies each volume contains an introduction that brings the reader up to date with the latest developments in african ornithology including the evolution and biogeography of african birds diagnoses of the families and genera often with superspecies maps are followed by the comprehensive species accounts themselves these include descriptions of range and status field characters voice general habits food and breeding habits full bibliographies acoustic references and indexes complete this scholarly work of reference this first volume in the series deals comprehensively with ostrich albatrosses petrels and shearwaters storm petrels penguins divers grebes tropicbirds boobies cormorants darter pelicans frigatebirds herons hamerkop storks shoebill ibises and spoonbills flamingos swans geese and ducks and diurnal birds of prey the editors and artists have worked closely with other authors all acknowledged experts in their field to produce a superb reference in which comprehensive texts on every species are complemented by accurate and detailed paintings and drawings of the birds themselves

Asian and African Studies

2004

sweetpotato and potato are expanding faster than any other food crops in sub saharan africa there is growing investment in research to address bottlenecks in value chains concerning these two crops and growing interest from the private sector in investing in them this book addresses five major themes on sweetpotato and potato policies for germplasm exchange food security and trade in africa seed systems breeding and disease management post harvest management processing technologies and marketing systems nutritional value and changing behaviours

South Africa Yearbook 2004/05

2003

tanzania embodies the best of africa with renowned attractions such as mount kilimanjaro lakes victoria and tanganyika and the plains of the serengeti this title includes information on safaris and an illustrated guide to local species

Proterozoic East Gondwana

2011-09-15

reprint first published in 1998 the present study is an update of an earlier assessment of warm water fish farming potential in africa by kapetsky 1994 the objective of this study was to assess locations and areal expanses that have potential for warm water and temperate water fish farming in continental africa the study was based on previous estimates for africa by the above author and on estimates of potential for warm water and temperate water fish farming in latin america by kapetsky and nath 1997 however a number of refinements have been made the most important refinement was that new data allowed a sevenfold increase in resolution over that used in the previous africa study and a twofold increase over that of latin america i e to 3 arc minutes equivalent to 5 km x 5 km grids at the equator making the present results more usable in order to assess fish farming potential at the national level a geographical information system gis was used to evaluate each grid cell on the basis of several land quality factors important for fish farm development and operation regardless of the

fish species used protected areas large inland water bodies and major cities were identified as constraint areas and were excluded from any fish farming development altogether small scale fish farming potential was assessed on the basis of four factors water requirement from ponds due to evaporation and seepage soil and terrain suitability for pond construction based on a variety of soil attributes and slopes availability of livestock wastes and agricultural by products as feed inputs based on manure and crop potential and farm gate sales as a function of population density for commercial farming an urban market potential criterion was added based on population size of urban centres and travel time proximity both small scale and commercial models were developed by weighting the above factors using a multi criteria decision making procedure a bioenergetics model was incorporated into the gis to predict for the first time fish yields across africa a gridded water temperature data set was used as input to a bioenergetics model to predict number of crops per year for the following three species nile tilapia oreochromis niloticus african catfish clarias gariepinus and common carp cyprinus carpio similar analytical approaches to those by kapetsky and nath 1997 were followed in the yield estimation however different specifications were used for small scale and commercial farming scenarios in order to reflect the types of culture practices found in africa moreover the fish growth simulation model documented in kapetsky and nath 1997 was refined to enable consideration of feed quality and high fish biomass in ponds the small scale and commercial models derived from the land quality evaluation were combined with the yield potential of each grid cell for each of the three fish species to show the coincidence of each land quality suitability class with a range of yield potentials finally the land quality fish yield potential combinations were put together to show where the fish farming potential coincided for the three fish species

India in Africa: Changing Geographies of Power

2018

china s emphasis on infrastructure development has received support from african leaders its focus on infrastructure development in africa was endorsed by the signing of a memorandum of understanding between china and the african union on 27 january 2015 the agreement outline plans for connecting african countries through transportation infrastructure projects including modern highways airports and high speed railways at the heart of belt and road initiative lies the creation of an economic land belt that includes countries on the original silk road through central asia the middle east and europe as well as a maritime road that links china s port facilities with the african coast pushing up through the suz canal into the mediterranean china has from the outset emphasised that the belt and road initiative will be developed within the framework of the five principles these entails mutual respect for each other s territorial integrity and sovereignty non aggression non interference in each other s internal affairs equality and mutual benefit and peaceful coexistence this volume provides an analysis of this stance by both african and chinese scholars africa through its agenda 2063 has been driving among others the re industrialisation of its economies improved connectivity and infrastructure development diversification of energy sources technology transfer and skills development the belt and road initiative provides an alternative path for africa to realise some of these milestones

The Arc of Crisis in the Mena Region

2015-11-09

this book explores the role of the insurance industry in contributing to and responding to the harms that climate change has brought and will bring either directly or indirectly the anthropocene signifies a new role for humankind we are the only species that has become a driving force in the planetary system what might criminology be in the anthropocene what does the anthropocene suggest for future theory and practice of criminology criminology and climate as part of routledge s criminology at the edge series seeks to contribute to this research agenda by exploring differing vantage points relevant to thinking within criminology contemporary societies are presented with myriad intersecting and interacting climate related harms at multiple scales criminology and climate brings attention to the finance sector with a particular focus on the insurance industry as one of its most significant components in both generating and responding to new climate harmscapes bringing together thought leaders from a variety of disciplines this book considers what finance and insurance have done and might still do as fulcrum institutions to contribute to the realisation of safe and just planetary spaces an accessible and compelling read this book will appeal to students and scholars of criminology sociology law and environmental studies and provides readers with a basis to analyse the challenges and

opportunities for the finance sector and in particular the insurance industry in the regulation of climate harms

West Africa's Women of God

1960

this new fifth edition of information resources in toxicology offers a consolidated entry portal for the study research and practice of toxicology both volumes represents a unique wide ranging curated international annotated bibliography and directory of major resources in toxicology and allied fields such as environmental and occupational health chemical safety and risk assessment the editors and authors are among the leaders of the profession sharing their cumulative wisdom in toxicology s subdisciplines this edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools due to the increasing size of the hardcopy publication the current edition has been divided into two volumes to make it easier to handle and consult volume 1 background resources and tools arranged in 5 parts begins with chapters on the science of toxicology its history and informatics framework in part 1 part 2 continues with chapters organized by more specific subject such as cancer clinical toxicology genetic toxicology etc the categorization of chapters by resource format for example journals and newsletters technical reports organizations constitutes part 3 part 4 further considers toxicology s presence via the internet databases and software tools among the miscellaneous topics in the concluding part 5 are laws and regulations professional education grants and funding and patents volume 2 the global arena offers contributed chapters focusing on the toxicology contributions of over 40 countries followed by a glossary of toxicological terms and an appendix of popular quotations related to the field the book offered in both print and electronic formats is carefully structured indexed and cross referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed among the many timely topics receiving increased emphasis are disaster preparedness nanotechnology omics risk assessment societal implications such as ethics and the precautionary principle climate change and children s environmental health opens with an overview of the international toxicology scene organizations and activities involved with both the science and regulatory framework and a specific look at the european union s efforts offers an extensive collection of chapters covering over 40 countries and their toxicological infrastructure which includes listings of major books and journals organizations professional societies universities poison control centers legislation and online databases provides the second edition of the international union of pure and applied chemistry s glossary of terms used in toxicology a carefully constructed and peer reviewed collation of critical terms in the science concludes with a potpourri of quotes concerning toxicology and their use in the arts and popular culture paired with volume one which offers chapters on a host of toxicology sub disciplines this set offers the most comprehensive compendium of print digital and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field
