the name dggthb deutsche gesellschaft für geschichte und theorie der biologie german society for the history and theory of biology reflects recent history as well as german tradition the society is a relatively late addition to a series of german societies of science and medicine that began with the deutsche gesellschaft für geschichte der medizin und der naturwissenschaften founded in 1910 by leipzig university s karl sudhoff 1853 1938 who wrote we want to establish a german society in order to gather german speaking historians together in our special disciplines so that they form the core of an international society yet sudhoff at this time of burgeoning academic internationalism was quite willing to accommodate the wishes of a number of founding members and drop the word german in the title of the society and have it merge with an international society the founding and naming of the society at that time derived from a specific set of historical circumstances and the same was true some 80 years later when in 1991 in the wake of german reunification the deutsche gesellschaft für geschichte und theorie der biologie was founded from the start the society has been committed to bringing studies in the history and philosophy of biology to a wide audience using for this purpose its jahrbuch für geschichte und theorie der biologie parallel to the jahrbuch der verhandlungen zur geschichte und theorie der biologie has become the by now traditional medium for the publication of papers delivered at the society s annual meetings in 2005 the jahrbuch was renamed annals of the history and philosophy of biology reflecting the society s internationalist aspirations in addressing comparative biology as a subject of historical and philosophical studies

Annals of the History and Philosophy of Biology 10/2005 2006

the arti cial life term appeared more than 20 years ago in a small corner of new mexico usa since then the area has developed dramatically many researchers joining enthusiastically and research groups sprouting everywhere this frenetic activity led to the emergence of several strands that are now established elds in themselves we are now reaching a stage that one may describe as maturer with more rigour more benchmarks more results more stringent acceptance criteria more applications in brief more sound science this which is the n ural path of all new areas comes at a price however a certain enthusiasm a certain adventurousness from the early years is fading and may have been lost on the way the eld has become more reasonable to counterbalance this and to encourage lively discussions a conceptual track where papers were judged on criteria like importance and or novelty of the concepts proposed rather than the experimental theoretical results has been introduced this year a conference on a theme as broad as arti cial life is bound to be very verse but a few tendencies emerged first elds like robotics and autonomous agents or evolutionary computation are still extremely active and keep on bringing a wealth of results to the a life community even there however new tendencies appear like collective robotics and more speci cally self assembling robotics which represent now a large subsection second new areas appear

one of the leading textbooks in its field bringing fossils to life applies paleobiological principles to the fossil record while detailing the evolutionary history of major plant and animal phyla it incorporates current research from biology ecology and population genetics bridging the gap between purely theoretical paleobiological textbooks and those that describe only invertebrate paleobiology and that emphasize cataloguing live organisms instead of dead objects for this third edition donald r prothero has revised the art and research throughout expanding the

coverage of invertebrates and adding a discussion of new methodologies and a chapter on the origin and early evolution of life

A Menology of England and Wales 1887

privacy and data protection are recognized as fundamental human rights recent developments however indicate that security issues are used to undermine these fundamental rights as new technologies effectively facilitate collection storage processing and combination of personal data government agencies take advantage for their own purposes increasingly and for other reasons the business sector threatens the privacy of citizens as well the contributions to this book explore the different aspects of the relationship between technology and privacy the emergence of new technologies threaten increasingly privacy and or data protection however little is known about the potential of these technologies that call for innovative and prospective analysis or even new conceptual frameworks technology and privacy are two intertwined notions that must be jointly analyzed and faced technology is a social practice that embodies the capacity of societies to transform themselves by creating the possibility to generate and manipulate not only physical objects but also symbols cultural forms and social relations in turn privacy describes a vital and complex aspect of these social relations thus technology influences people s understanding of privacy and people s understanding of privacy is a key factor in defining the direction of technological development this book was originally published as a special issue of innovation the european journal of social science research
