in nine eventful years 1957 to 1965 the six cylinder engined austin healey evolved into a formidable and increasingly specialised rally car by any standards it was the first of the homologation specials a type made progressively stronger faster more versatile and more suitable for the world's toughest international rallies though the motorsport foundations had been laid by the healey motor co ltd the work needed to turn these cars into rock solid 210bhp projectiles was almost all completed by the world famous works bmc competitions department at abingdon it was because of their vast experience that the big healeys as they were always affectionately known became fast and tough nimble yet durable so that they were capable of winning major events wherever traction could be assured not only did the works austin healeys win some of the world's most famous events including liege sofia liege spa sofia liege and the french and austrian alpine rallies but they were also supremely fast on events like the tulip and came so close so often to winning their home event the british rac rally which traditionally ended the season not only did these cars turn their drivers pat moss donald morley rauno aaltonen timo makinen and paddy hopkirk among them into heroes but individual cars seemed to take on a character and reputation of their own this book lists each and every success each and every notable car and traces exactly how the machinery developed and improved from one season to the next over time the works cars not only adopted aluminium cylinder heads and body panels much modified chassis transmission and exhaust systems but they also became supremely strong and could withstand a true battering on the world's toughest events this book relates how the cars were improved by the engineers how the drivers came to love their heavy and sometimes self-willed steeds and how the management team got the most out of everything machinery personnel drivers and regulations heavily illustrated and packed with technical detail this book will make a welcome addition to any motorsport fans library the mgb was a great british success story a product largely conceived designed and produced by a small team of dedicated people who genuinely cared about their work of course the mgb came from a proud successful sports car tradition and the model it replaced the revolutionary aerodynamic mga had been an unprecedented success so the new car had big shoes to fill launching in 1962 and in production for eighteen years the mgb became one of the most successful sports cars the world has ever known this book describes how the mgb arose principally from the ideas of one man mg's chief engineer syd enever how it was designed and developed how it survived and thrived and how it became the classic car still highly regarded today there have been many previous books about the mgb and the related mgc and v8 variants but mgb the superlative mg reaches a new level of detail together seasoned with fresh insight david knowles has been researching and writing about the mgb for more than thirty years prepare to be surprised at some of the stories you will have never read before and new twists on some you possibly thought you knew well a fully illustrated history of the land rover 101 one tonne the forward control military vehicle developed as a gun tractor for the british army in production from 1975 1978 this essential guide to these small yet powerful 4 x 4 vehicles covers production histories design and prototypes specification guides the 101 in british military service between 1975 and 1998 the 101 variants ambulances rapier tractors hard bodied versions for electronic warfare and special field conversions sales to overseas military authorities and finally advice on buying and owning a 101 today of great interest to land rover and military vehicle enthusiasts historians and owners clubs and illustrated with 207 original colour photographs reviews government price indices and considers improvements necessary to reflect more accurately possible inflationary pressures buying a classic and iconic e30 bmw 3 series can be just the start of a wonderful adventure this book explains how these fantastic cars can be modified to suit a vast range of applications from fast road use to race and rally the bmw small six was developed in response to customer demand for more performance in the 3 series and was announced in september 1977 bmw exploited the theme cleverly adding four door cabriolet and estate versions and granting factory approval to performance tuners alpina the performance would satisfy the most demanding driver and throughout the 1980s kept the 3 series bmws in the forefront of desirable and practical sporting machinery this is a collection of contemporary road tests model introductions specification and technical data comparison and long term tests models covered include
