conspiracies and conspiracy theory in the age of trump stands out in the burgeoning literature on conspiracism with its call for political scientists to analyze not only conspiracy theory as political pathology but conspiracies themselves as political behavior symbiotically related to moral hazards and other forces unleashed by dark money disinformation changing technologies and globalization this new updated edition extends this analysis to the belief by many americans that the 2020 election was stolen resistance to social measures to counter the covid epidemic attempts by trump and his allies to stop the steal and the resulting mob insurrection at the capitol on january 6 we likely will see both conspiracism and actual conspiracies play a greater role due to institutional decay in american politics for this reason political scientists need to analyse and theorize the role of conspiracies in politics why they prosper and fail how conspiracies may inflect political outcomes what relationship they bear to social forces unleashed by great economic and social change

since the very beginning of the covid 19 pandemic with mass media and social media playing a key role anti vax protests have received sustained attention the first comments often pointed at the heterogeneity of the events whose participants seemed to belong to different milieus from the far right to exoteric groups that opposed mainstream medicine suggesting alternative ones in reality in their forms and claims these protests developed as a regressive response to the health crisis conspiracist beliefs from the politicized qanon and great replacement conspiracies widespread on the far right to the chemtrails and 5g ones present in an exoteric milieu that promoted alternative health practices were clearly expressed in the slogans and symbols used by the protestors in different moments in different countries the contestation of the anti covid 19 measures proceeded with picks and ebbs following the waves of contagion and the related increase in policy measures to curve them increasing especially during the vaccination campaigns they seemed to subside however quite quickly as the covid 19 virus started to become endemic with vaccination reducing its lethality this volume builds upon social movement studies in the attempt to illuminate the dynamics of these protests in the various steps of their emergency growth and decline referring to most recent developments in social movement studies it in particular contributes to the analysis of contentious politics in emergency times characterized by deep disruption in everyday life and rapid structural transformations in the society in order to understand how specific strains are transformed into actions it considers the opportunities and challenges for different actors in moments of intense mobilization in which different and contrasting claims are put forward while these moments are rich in innovation they built upon existing social movement infrastructures that contribute to give meaning to dissatisfaction by proposing a shared definition of problems and solutions looking at the wave of anti vax protests through the lenses of social movement studies the analysis addresses the spread of the protests their forms but also their quick decline

uproarious phillips and elledge pair the abundant good humour of this book with a warning about the corrosive effects of conspiracy theories the times from the satanic

panic to the anti vaxx movement the moon landing to pizzagate it s always been human nature to believe we re being lied to by the powers that be and sometimes to be fair we absolutely are but while it can be fun to indulge in a bit of deep state banter on the group chat recent times have shown us that some of these theories have taken on a life of their own and in our dogged quest for the truth it appears we might actually be doing it some damage in conspiracy tom phillips and jonn elledge take us on a fascinating insightful and often hilarious journey through conspiracy theories old and new to try and answer a vital question for our times how can we learn to log off the qanon message boards and start trusting hard evidence again praise for the brief history series witty entertaining and slightly distressing you should probably read it sarah knight author of the life changing magic of not giving a f ck brilliant utterly brilliant jeremy clarkson very funny mark watson both readable and entertaining telegraph
