the encyclopedia of african cultural heritage in north america provides an accessible ready reference on the retention and continuity of african culture within the united states our conceptual framework holds first that culture is a form of self knowledge and knowledge about self in the world as transmitted from one person to another second that african people continuously create their own cultural history as they move through time

and space third that african descended people living outside of africa are also contributors to and participate in the creation of african cultural history entries focus on illuminating africanisms cultural retentions traceable to an african origin and cultural continuities ongoing practices and processes through which african culture continues to be created and formed thus the focus is more culturally specific and less concerned with the broader transatlantic demographic political and geographic issues that are the focus of similar recent reference works we also focus less on biographies of individuals and political and economic ties and more on processes and manifestations of african cultural heritage and continuity features a two volume a to z work available in a choice of print or electronic formats 350 signed entries each concluding with cross references and further readings 150 figures and photos front matter consisting of an introduction and a reader s guide organizing entries thematically to more easily guide users to related entries signed articles concluding with cross references

race and democracy in the americas examines dimensions of the comparative dynamics of race and ethnicity with a directed focus on the americas most particularly brazil and the united states brazil and the united states are two countries in the americas that have been major hosts for the african diaspora both countries experienced prolonged enslavement of africans and both now claim to be beacons of democracy for much of the developing world both afro brazilians and african americans have fielded major liberation movements against racism and oppression yet both groups continue to experience considerable residual racial discrimination and displacement brazil and the u s remain racialized societies though both officially purport to be otherwise the chapters of this volume illuminate a common search for understanding how race operates in societies generally and how shapes life opportunities for african americans and afro brazilians both oppressed by this most detrimental social construction the project that fueled this volume represented a rare opportunity for collaboration between afro brazilian scholars and their african american counterparts this volume offers a passionate conversation between colleagues who have endured common sociopolitical and cultural struggles but who have only belatedly been able to meet and connect as individuals both groups share identities as scholars and activists for neither identity alone is sufficient to nourish the longings of their hearts nor of their consciences this volume also represents an all too rare opportunity to give voice and expression to the work of afro brazilian scholars volume 9 of the national political science review also carries a special tribute to mack henry jones a senior black political scientist retiring from atlanta university and honors jones s legacy and continues his quest for understanding the nature and intricacies of oppression and possible paths to liberatio

restoring the historicity and plurality of archaeological ethics is a task to which this book is devoted its emphasis on praxis mends the historical condition of ethics in doing so it shows that nowadays a multicultural sometimes also called public ethic looms large in the discipline by engaging communities differently archaeology has explicitly adopted an ethical outlook purportedly striving to overcome its colonial ontology and metaphysics in this new scenario respect for other historical systems worldviews and social accountability appear to be prominent being ethical in archaeological terms in the multicultural context has become mandatory so much that most professional international and national archaeological associations have ethical principles as guiding forces behind their openness towards social sectors traditionally ignored or marginalized by their practices this powerful new ethics its newness is based to a large extent in that it is the first time that archaeological ethics is explicitly stated as if it didn't exist before emanates from metropolitan centers only to be adopted elsewhere in this regard it is worth probing the very nature of the dominant multicultural ethics in disciplinary practices because a it is at least suspicious that at the same time archaeology has tuned up with postmodern capitalist market needs and b the discipline along with its ethical principles is contested worldwide by grass roots organizations and social movements can archaeology have socially committed ethical principles at the same time that it strengthens its relationship with the market and capitalism is this coincidence just merely haphazard or does it obey more structural rules

the papers in this book try to answer these two questions by examining praxis based contexts in which archaeological ethics unfolds
