

Download free Audi a4 b6 coolant leak [PDF]

2003 1 8t quattro avant remove the hoses from the heater core hook up the side with the water and air attachments to the in and then the extra piece of hose to the out of the heater core let some water in turn the water off then blast the water through with the air the best way to refill your cooling system without any aids such as a vacuum fill is to do it with a totally cold system open the hard pipe bleeder screw and expose the bleeder hole in the upper heater core return line prop the coolant reservoir up 90 from the normal position this will increase the static pressure i am losing coolant in my 2003 a4 1 8t and once every couple weeks the temperature gauge overheats i pull over turn the car off and add coolant and turn it back on and its fine i took the car to the mechanic and the car was put under a pressure test one of the two coolant temp sensors is faulty the sensor at the back of the cylinder head sends coolant temp info to the ecu to control the various temp related engine parameters like fueling ignition timing and boost pressure replacing the coolant temperature sensor is a simple and quick repair you can perform on your audi in under an hour the sensor is also used to drain the fluid out of the coolant system which means replacing it will result in draining your coolant so here goes this is the easiest and less messy way to do a complete coolant system flush with heater core drain coolant 1 jack front end of car up enough to fit a bucket under the car on the left side of the radiator core 2 place bucket under the lower radiator hose at the core 3

specific method for bleeding air out of coolant system

May 16 2024

2003 1 8t quattro avant remove the hoses from the heater core hook up the side with the water and air attachments to the in and then the extra piece of hose to the out of the heater core let some water in turn the water off then blast the water through with the air

a4 b6 cooling system and heater issues audizine

Apr 15 2024

the best way to refill your cooling system without any aids such as a vacuum fill is to do it with a totally cold system open the hard pipe bleeder screw and expose the bleeder hole in the upper heater core return line prop the coolant reservoir up 90 from the normal position this will increase the static pressure

losing coolant no leak found from pressure test overheat once

Mar 14 2024

i am losing coolant in my 2003 a4 1 8t and once every couple weeks the temperature gauge overheats i pull over turn the car off and add coolant and turn it back on and its fine i took the car to the mechanic and the car was put under a pressure test

cooling fan running all the time audiworld forums

Feb 13 2024

one of the two coolant temp sensors is faulty the sensor at the back of the cylinder head sends coolant temp info to the ecu to control the various temp related engine parameters like fueling ignition timing and boost pressure

audi a4 b6 coolant temperature sensor replacement pelican parts

Jan 12 2024

replacing the coolant temperature sensor is a simple and quick repair you can perform on your audi in under an hour the sensor is also used to drain the fluid out of the coolant system which means replacing it will result in draining your coolant

diy complete coolant system flush the easy way audizine

Dec 11 2023

so here goes this is the easiest and less messy way to do a complete coolant system flush with heater core drain coolant 1 jack front end of car up enough to fit a bucket under the car on the left side of the radiator core 2 place bucket under the lower radiator hose at the core 3
