fish be big enough to swallow jonah why did god make germs every answer is backed up with scripture and includes questions for further discussion making this little book perfect for families with curious young minds specific questions and answers and useful things to say any questions we ve got the answers right here in a book that will take parents off the hook with their children time for kids big book of why answers the questions that kids commonly ask and adults can rarely answer why do we have eyebrows what s a black hole and what happens if you fall into one what s the fastest a human is capable of running why do wet fi ngers stick to metal in the freezer where is the deepest point on earth divided by subject areaâ humans animals environment nature technology and spaceâ and written in an upbeat manner each answer is accompanied by either a photo or an illustration to show the reasons why of course time for kids goes beyond answering the question by dipping into the science or history to further explain the answer in an easy to follow straightforward manner this is a must have book to satisfy the most curious of kids and provides a great way to encourage interest and knowledge about a wide range of subjects as well as to stimulate reading kids will be desperate to share what they ve learned with their parents teachers and friends and anyone else who will listen this fun and friendly science book for kids poses 100 real life questions from kids to robert winston on every aspect of science questions cover all the popular science topics including human body why do freckles come in dots on your face physics could you jump off the world earth why is the sky blue chemistry why are there bubbles in boiling water natural science do dogs cry and space why will the sun explode these are real questions from children from around the world and their questions are their very own robert winston was inspired to write this book by the many questions posed by his grandchildren and by children from the schools he has visited over the years the ebook includes some of these questions plus many more gathered from countries all over the world including the uk ireland and mainland europe canada the usa india china and japan the response to the survey that dk sent out was fantastic there were so many great questions to choose from the questions were carefully selected to cover the main science topics chemistry physics human body earth space and natural science they are fun engaging and include some that most adults would n t dare ask includes weird and wacky questions and clear and lively answers ask a scientist puts the fun back into science 201 questions to ask your kids do you have trouble talking to your kids does a successful conversation with your child consist of one word responses or abrupt physical acknowledgments does your son or daughter get upset at the most innocent questions join the club unfortunately communicating well with kids is something every parent desires but few achieve we love our children but talking to them in a meaningful manner isn t always easy the questions in this book are designed to help no

matter what age or sex your children no matter how many children you have no matter how good or bad your current parent child relationship this simple game will get your family talking more and when you re talking really talking about emotions and fears and attitudes you ll be learning about each other as individuals and growing closer together as a group an introduction for kids wouldn t it be fun to find out more about what your father or mother was like when he or she was a kid or get to tell your parents which of their friends you think looks dorkiest wouldn t conversation be more interesting if you and your family traded unexpected questions and answers at dinner rather than just talked about what homework did or didn t get done there are a lot of great things to talk about that no one ever brings up because we usually think conversation is serious rather than a way of being playful of course conversation should be about serious things some of the time some of the questions in this book are about very serious topics but other times questions should be asked just to create new ways to think about things look back on our lives or imagine what life would be like if we could design in any way we wanted in fact i wrote this book because i think talking can be terrific fun and even talking to your parents and brothers or sisters can be a kind of great game everyone can get to know each other and laugh a lot and be amazed from time to time no one wins or loses but there is an element of surprise in finding out personal information about parents and sharing some of your ideas daydreams and opinions with them my idea is to think of some of the world s most interesting questions that parents and kids could talk about and give everyone the chance to pick the ones they d like to hear about each person picks a question to ask and then answers a question when his or her turn comes around all you have to do is choose from the list under 201 questions to ask your parents and ask any question you want your parents can take as long or as short a time they want to answer any you can all discuss the topic if you like but then they go into their section of the book and ask you questions some of them might not be so interesting but others like asking you who is the meanest kid you know might be cool to think about and share with them they ll learn a lot about what you think are ways kids act nasty you can wiggle out of any two questions that don t interest you or are embarrassing but no more than that it s good if a question makes you squirm a little that means you either haven t thought about it before or you have but you haven t wanted to deal with it but why not try out and answer pick a set length of time to play for and my guess is you ll want to extend it these questions get addictive you can play them at the dinner table or after dinner or on a car trip or anytime you feel like hearing what your parents say about something so this is a book about how to have interesting and often funny conversations with your family it s a way to avoid dead boring silences and fill the time instead with questions and answers that everyone will enjoy thinking about i know that in my family it is too easy for us to get stuck talking about practical things like who has to be taken where the next day that isn t particularly fun it doesn t let me in on what my kids are thinking and it doesn t help my two teenagers learn things that might help them understand me a little better an ingenious book that speaks to both parents and their kids 201 questions to ask your kids 201 questions to ask your parents is two books in one open it from one side and it provides parents with 201 questions for their children intended to spark discussion help reveal who their children really are and help children think about themselves and the world in new and useful ways turn it over and there are 201 questions children can ask back to their parents devised as an interactive game this is a book that can get any family talking really talking about facts and fears and attitudes an ingenious book that speaks to both parents and their kids 201 questions to ask your kids 201 questions to ask your parents is two books in one open it from one side and it provides parents with 201 questions for their children intended to spark discussion help response to the survey that dk sent out was fantastic there were so many great questions to choose from the questions were carefully selected to cover the main science

topics chemistry physics human body earth space and natural science they are fun engaging and include some that most adults wouldn't dare ask packed with weird and wacky questions and clear and lively answers ask a scientist puts the fun back into science the story of creation and adam and eve in the garden of eden are familiar bible stories but they also present a wonderful opportunity to share important biblical truths with eagerly questioning minds through answers that even the youngest believer can understand look inside to learn how did god create everything from nothing why was the first person that god created a boy why did god have adam name the animals the serpent talked to eve so why can't snakes talk today children are never short of questions and now there are answers to some of their most difficult ones regarding the bible and faith the new answers book for kids series is a unique collection from ken ham and the creative team at answers in genesis these answers will help you to impart a biblical worldview to elementary aged students in your church or homeschool this is the 1st book of a 4 volume set the author of 100 promises to my baby explores 100 questions children ask sometimes whimsical often mystical and shares some insights on how to foster a child's imagination creativity and sense of self as a mom i realized early on that my children were looking to me for answers mallika chopra writes even before they could speak they were asking questions questions about how to interact with the world and it was my reaction to these questions that began to shape their worldview their sense of security and trust embracing the responsibilities of parenthood as a sacred trust mallika shares with other moms and dads her own quest for answers to the questions her children posed as they sought to make sense of their feelings and the world around them where did i come from will you get sick and die why do i have to share do trees have feelings why doesn't anyone want to play with me what's a bomb whether she is fielding simple queries like why do i have to say thank you or deeper ones that require much soul searching about her own beliefs mallika chopra draws on history and myth global wisdom and rich personal anecdotes to craft responses that expand children's sense of wonder this beautifully designed book with inspirational reflections and stories accompanying the 100 questions makes an irresistible gift for any mother of young children or any person asking questions about our place and purpose in the universe a bestseller and kid favorite why provides easy to understand explanations for nearly 100 questions submitted by kids about the world around them from the 1 new york times bestselling world almanac comes an engaging interactive book full of true or false questions that will keep readers guessing as they turn every page true or false toenails grow at the same rate as fingernails mount everest is the closest point on earth to the moon no piece of paper can be folded in half more than seven times find out the answers to these true or false statements and more than 250 others with the world almanac awesome true or false questions for smart kids alone or together kids can make their best guesses of whether each statement is true or false and then turn the page to find the answer and learn even more fun facts about each item with a uniquely interactive format this book has smart readers engaged and eager at every step with essential facts on food history science pop culture and more kids can ask god anything find the answers and deepen their faith with this unique daily devotional full of biblical answers about god the bible and christian faith full color 5 1/2 x 7 1/2 why don't we feel the earth move why does an ice cube float why can't you unscramble an egg why can't we live forever these are all questions that a curious kid might ask in what's the big idea renowned juvenile science educator vicki cobb answers these and other fascinating questions to help kids learn more about the world through the wonders of science a big idea is one that has no simple or easy answer and there are four big ideas in this book motion energy matter and life the motion of nonliving objects rolling balls falling stones the moon and stars seems so ordinary and familiar that most people take it for granted matter on the other hand comes in so many different forms solids liquids gases metals nonmetals living material that it is hard to imagine anything that all matter has in common energy is an idea that is in the news just about every day yet most people couldn't tell you what the big idea of energy is and life what life is seems mind boggling and infinitely complicated how do we bend our brains around it scientists learn by asking questions and this book now in paperback is designed to make young readers stop and think about each of the questions before reading what scientists have learned that answers each question they'll be able to do simple things to see for themselves and they will build their own scientific knowledge in the process by the time they've finished this book they'll get the big picture of what science is all about questions that are typically asked about nature science and space are answered in this edition want to make learning fun there are 1 700 questions in 7 categories animals history miscellaneous science and nature u s geography u s presidents and world geography selected to be most appropriate for kids both in terms of interest and educational value to make it quick and easy to test yourself or others without initially seeing the answers each category is divided into short quizzes with 10

questions followed by their answers please note this book has substantial overlap with really interesting stuff for kids it is designed for people who prefer a quiz format this is book 6 of the what s the best trivia series look for other books in the series covering a variety of trivia topics any caretaker of children will appreciate these concise thoughtful easy to explain answers to some of the most important questions children will ever ask i robert winston answers 100 big questions from kids across the world in this fun and unique science book in this unique science book professor robert winston answers more than 100 real life questions from children all around the world and who could be a better scientist to ask questions to than professor robert winston ask a scientist puts the fun back into science in this thrilling book for children aged 6 9 all the popular science topics are covered with weird and wacky questions and clear and lively answers including biology why do freckles come in dots on your face physics could you jump off the world earth why is the sky blue chemistry why are there bubbles in boiling water natural science do dogs cry and space why will the sun explode and make us extinct this exciting new edition includes eight pages of additional questions relating to the recent hot topics in science including the covid 19 pandemic inside the pages of this quirky science book you ll find every aspect of science including biology space physics chemistry earth natural sciences the topic of science presented in a fresh exciting way by tackling it from the child s perspective more than 100 real life questions from children from all around the world about every aspect of science updated reissue of the 2019 edition with an additional eight new pages including coverage of important recent topics such as the covid 19 pandemic the inspiration behind this unique science book came from the many questions posed by robert winston s grandchildren and by children from the schools he has visited over the years the book includes some of these questions plus many more gathered from countries all over the world including the uk ireland and mainland europe canada the usa india china and japan the 100 big questions featured inside the book cover all the main science topics chemistry physics biology earth space and natural science fact filled fun filled as interesting to parents as it is to kids the how come series is the trusted source for lively clear answers to kids science queries now the best questions and answers from all three books how come how come planet earth and how come in the neighborhood have been revised updated freshly illustrated in full color supplemented with twenty completely new questions and combined into one bigger better volume how come explains in fascinating detail more than 200 mysteries and phenomena in the world around us these are the questions that pique kids curiosity and stump parents when it rains does running rather than walking to the nearest shelter really keep you any drier how can a stone skip across a pond instead of sink if the earth is spinning why can t we feel it why don t we fly off why do elephants have trunks and the all time classic why is the sky blue sunlight has a hidden rainbow of colors and air molecules scatter blues the most sending bright blue light down to earth the text is clearly written engaging and accessible it s for every kid who wants to know and every grown up who simply doesn t know most kids ask questions and often they aren t easy to answer these colorful books are designed to not only give answers but also to provide scriptural links for parents so they can reference the bible in this volume kids can read about why does satan hate god do angels ever come down to earth what do the devil and demons look like if adam and eve never sinned would things still be perfect

How to Talk to Your Kids about Really Important Things 1994 any questions we ve got the answers right here in a book that will take parents off the hook with their children time for kids big book of why answers the questions that kids commonly ask and adults can rarely answer why do we have eyebrows what s a black hole and what happens if you fall into one what s the fastest a human is capable of running why do wet fi ngers stick to metal in the freezer where is the deepest point on earth divided by subject areaâ humans animals environment nature technology and spaceâ and written in an upbeat manner each answer is accompanied by either a photo or an illustration to show the reasons why of course time for kids goes beyond answering the question by dipping into the science or history to further explain the answer in an easy to follow straightforward manner this is a must have book to satisfy the most curious of kids and provides a great way to encourage interest and knowledge about a wide range of subjects as well as to stimulate reading kids will be desperate to share what they ve learned with their parents teachers and friends and anyone else who will listen

Big Book of why 2010 this fun and friendly science book for kids poses 100 real life questions from kids to robert winston on every aspect of science questions cover all the popular science topics including human body why do freckles come in dots on your face physics could you jump off the world earth why is the sky blue chemistry why are there bubbles in boiling water natural science do dogs cry and space why will the sun explode these are real questions from

children from around the world and their questions are their very own robert winston was inspired to write this book by the many questions posed by his grandchildren and by children from the schools he has visited over the years the ebook includes some of these questions plus many more gathered from countries all over the world including the uk ireland and mainland europe canada the usa india china and japan the response to the survey that dk sent out was fantastic there were so many great questions to choose from the questions were carefully selected to cover the main science topics chemistry physics human body earth space and natural science they are fun engaging and include some that most adults wouldn't dare ask includes weird and wacky questions and clear and lively answers ask a scientist puts the fun back into science

Ask A Scientist 2019-06-06 201 questions to ask your kids do you have trouble talking to your kids does a successful conversation with your child consist of one word responses or abrupt physical acknowledgments does your son or daughter get upset at the most innocent questions join the club unfortunately communicating well with kids is something every parent desires but few achieve we love our children but talking to them in a meaningful manner isn't always easy the questions in this book are designed to help no matter what age or sex your children no matter how many children you have no matter how good or bad your current parent child relationship this simple game will get your family talking more and when you're talking really talking about emotions and fears and attitudes you'll be learning about each other as individuals and growing closer together as a group an introduction for kids wouldn't it be fun to find out more about what your father or mother was like when he or she was a kid or get to tell your parents which of their friends you think looks dorkiest wouldn't conversation be more interesting if you and your family traded unexpected questions and answers at dinner rather than just talked about what homework did or didn't get done there are a lot of great things to talk about that no one ever brings up because we usually think conversation is serious rather than a way of being playful of course conversation should be about serious things some of the time some of the questions in this book are about very serious topics but other times questions should be asked just to create new ways to think about things look back on our lives or imagine what life would be like if we could design in any way we wanted in fact i wrote this book because i think talking can be terrific fun and even talking to your parents and brothers or sisters can be a kind of great game everyone can get to know each other and laugh a lot and be amazed from time to time no one wins or loses but there is an element of surprise in finding out personal information about parents and sharing some of your ideas daydreams and opinions with them my idea is to think of some of the world's most interesting questions that parents and kids could talk about and give everyone the chance to pick the ones they'd like to hear about each person picks a question to ask and then answers a question when his or her turn comes around all you have to do is choose from the list under 201 questions to ask your parents and ask any question you want your parents can take as long or as short a time they want to answer any you can all discuss the topic if you like but then they go into their section of the book and ask you questions some of them might not be so interesting but others like asking you who is the meanest kid you know might be cool to think about and share with them they'll learn a lot about what you think are ways kids act nasty you can wiggle out of any two questions that don't interest you or are embarrassing but no more than that it's good if a question makes you squirm a little that means you either haven't thought about it before or you have but you haven't wanted to deal with it but why not try out and answer pick a set length of time to play for and my guess is you'll want to extend it these questions get addictive you can play them at the dinner table or after dinner or on a car trip or anytime you feel like hearing what your parents say about something so this is a book about how to have interesting and often funny conversations with your family it's a way to avoid dead boring silences and fill the time instead with questions and answers that everyone will enjoy thinking about i know that in my family it is too easy for us to get stuck talking about practical things like who has to be taken where the next day that isn't particularly fun it doesn't let me in on what my kids are thinking and it doesn't help my two teenagers learn things that might help them understand me a little better an ingenious book that speaks to both parents and their kids 201 questions to ask your kids 201 questions to ask your parents is two books in one open it from one side and it provides parents with 201 questions for their children intended to spark discussion help reveal who their children really are and help children think about themselves and the world in new and useful ways turn it over and there are 201 questions children can ask back to their parents devised as an interactive game this is a book that can get any family talking really talking about facts and fears and attitudes an ingenious book that speaks to both parents and their kids 201 questions to ask your kids 201 questions to ask your parents is two books in one open it from one side and it

provides parents with 201 questions for their children intended to spark discussion help reveal who their children really are and help children think about themselves and the world in new and useful ways turn it over and there are 201 questions children can ask back to their parents devised as an interactive game this is a book that can get any family talking really talking about facts and fears and attitudes

201 Questions to Ask Your Kids 2000-02-08 this fun and friendly science book for kids poses 100 real life questions from kids to robert winston on every aspect of science questions cover all the popular science topics including human body why do freckles come in dots on your face physics could you jump off the world earth why is the sky blue chemistry why are there bubbles in boiling water natural science do dogs cry and space why will the sun explode these are real questions from children from around the world and their questions are their very own robert winston was inspired to write this book by the many questions posed by his grandchildren and by children from the schools he has visited over the years the book includes some of these questions plus many more gathered from countries all over the world including the uk ireland and mainland europe canada the usa india china and japan the response to the survey that dk sent out was fantastic there were so many great questions to choose from the questions were carefully selected to cover the main science topics chemistry physics human body earth space and natural science they are fun engaging and include some that most adults wouldn't dare ask packed with weird and wacky questions and clear and lively answers ask a scientist puts the fun back into science

Ask a Scientist 2019-06-04 the story of creation and adam and eve in the garden of eden are familiar bible stories but they also present a wonderful opportunity to share important biblical truths with eagerly questioning minds through answers that even the youngest believer can understand look inside to learn how did god create everything from nothing why was the first person that god created a boy why did god have adam name the animals the serpent talked to eve so why can't snakes talk today children are never short of questions and now there are answers to some of their most difficult ones regarding the bible and faith the new answers book for kids series is a unique collection from ken ham and the creative team at answers in genesis these answers will help you to impart a biblical worldview to elementary aged students in your church or homeschool this is the 1st book of a 4 volume set

The Children's Book of Questions & Answers 1984 the author of 100 promises to my baby explores 100 questions children ask sometimes whimsical often mystical and shares some insights on how to foster a child's imagination creativity and sense of self as a mom i realized early on that my children were looking to me for answers mallika chopra writes even before they could speak they were asking questions questions about how to interact with the world and it was my reaction to these questions that began to shape their worldview their sense of security and trust embracing the responsibilities of parenthood as a sacred trust mallika shares with other moms and dads her own quest for answers to the questions her children posed as they sought to make sense of their feelings and the world around them where did i come from will you get sick and die why do i have to share do trees have feelings why doesn't anyone want to play with me what's a bomb whether she is fielding simple queries like why do i have to say thank you or deeper ones that require much soul searching about her own beliefs mallika chopra draws on history and myth global wisdom and rich personal anecdotes to craft responses that expand children's sense of wonder this beautifully designed book with inspirational reflections and stories accompanying the 100 questions makes an irresistible gift for any mother of young children or any person asking questions about our place and purpose in the universe
