This is a solution manual for the famous book "Pattern Recognition and Machine Learning". I will keep updating the solutions as my learning process goes on. There are some problems that I am not sure which have been marked by waiting for updates in the solution manual.

Solutions manual to accompany Inorganic Chemistry, seventh edition, features detailed step-by-step solutions for each of this edition's self-tests and end-of-chapter exercises. Numerous figures were created specifically for this edition.

An excellent solution manual with notes from John L. Weatherwax, PhD, and Prof. David Epstein. A Chinese version of ESL by Wei Ya contributing due to my limited ability, my solutions are not complete and may contain issues.
