**Long range planning** 2009-01-08 one of the most followed antitrust cases of recent times united states v apple reveals an often missed truth what americans most fear is competition itself in 2012 the department of justice accused apple and five book publishers of conspiring to fix ebook prices the evidence overwhelmingly showed an unadorned price fixing conspiracy that cost consumers hundreds of millions of dollars yet before during and after the trial millions of americans sided with the defendants pundits on the left and right condemned the government for its decision to sue decrying amazon s market share railing against a new high tech economy and rallying to defend beloved authors and publishers for many amazon was the one that should have been put on trial but why one fact went unrecognized and unreckoned with in practice americans have long been ambivalent about competition chris sagers a renowned antitrust expert meticulously pulls apart the misunderstandings and exaggerations that industries as diverse as mom and pop grocers and producers of cast iron sewer pipes have cited to justify colluding to forestall competition in each of these cases antitrust law a time honored vehicle to promote competition is put on the defensive herein lies the real insight of united states v apple if we desire competition as a policy we must make peace with its sometimes rough consequences as bruising as markets in their ordinary operation often seem letting market forces play out has almost always benefited the consumer united states v apple shows why supporting cases that protect price competition even when doing so hurts some of us is crucial if antitrust law is to protect and maintain markets

**LRP** 2003 winner of the mla s mina p shaugnessy prize for an outstanding work in the fields of language culture literacy or literature with strong application to the teaching of english focusing largely on the controversial website wikipedia the author explores the challenges confronting teachers of college writing in the increasingly electronic and networked writing environments their students use every day rather than praising or condemning that site for its role as an encyclopedia cummings instead sees it as a site for online collaboration between writers and a way to garner audience for student writing applying an understanding of commons based peer production theory as developed by yochai benkler this text is arranged around the following propositions commons based peer production is a novel economic phenomenon which informs our current teaching model and describes a method for making sense of future electronic developments college writers are motivated to do their best work when they write for an authentic audience external to the class

writing for a networked knowledge community invites students to participate in making knowledge rather than only consuming it a plan for integrating networked writing for an external audience helps students understand the transition from high school to college writing allowing students to review and self select points of entry into electronic discourse fosters laziness or a new work dynamic where writers seek to better understand their own creativity in terms of a project s demands lazy virtues offers networked writing assignments to foster development of student writers by exposing them to the demands of professional audiences asking them to identify and assess their own creative impulses in terms of a project s needs and removing the writing teacher from the role of sole audience
