

*The Collected Papers of R.h. Bing* 1988 a powerful mathematician and a great problem solver r h bing laid the foundation for a number of areas of topology many of his papers have continued to serve as a source of major theoretical developments and concrete applications in recent years one outstanding example was michael h freedman s use of bing s shrinking criterion to solve the four dimensional poincaré conjecture this two volume set brings together over one hundred of bing s research expository and miscellaneous papers these works range over a great variety of topics in topology including the topology of manifolds decomposition spaces continua metrization general topology and geometric topology in addition there are a number of papers in the areas of convex functions linearity and conformal varieties the introductory section in the first volume provides historical background on bing s life and achievements this collection will appeal to mathematicians in all areas and especially those in topology as well as students historians and educators in the mathematical sciences for it provides a complete historical summary of the mathematical events in the life of the man and the mathematician r h bing

Publications in Archeology 1974 the congressional record is the official record of the proceedings and debates of the united states congress it is published daily when congress is in session the congressional record began publication in 1873 debates for sessions prior to 1873 are recorded in the debates and proceedings in the congress of the united states 1789 1824 the register of debates in congress 1824 1837 and the congressional globe 1833 1873

**Long House, Mesa Verde National Park, Colorado** 1980 dragon in ambush by jeremy ingalls is a critique and new translation of the first twenty poems of mao zedong s published poetry this seminal work stands out from previous translations of mao s poems in seeing them as an expression of his core political beliefs rather than for their poetic effect instead dr ingalls shows in consummate detail that mao was careful and deliberate in employing imagery in his poetry to lay out procedures for political supremacy in which the central drive was his will to psychological domination that is domination of the minds of others is the unifying theme of mao s verse sequence the crux of prof ingalls work lies in her focus on the symbolism in the poems the poems are in mao s use of them as a means of communication meaningless on their surface no image however seemingly commonplace is ever employed for merely lyrical or aesthetic description every image functions as a factor in an entirely political calculus according to dr ingalls when mao mentions streams or mountains suns or moons clouds or winds or icicles horses elephants snakes tigers leopards or bears specifies kinds of trees or birds or fish flies brooms mats or bridges these and all his other images have as their

primary function neither happenstance descriptions nor whimsical metaphor they all have politically symbolic functions in mao s algebra of versified political discourse furthermore in her analysis prof ingalls downplays the significance of marxism leninism in the thought of mao zedong she shows that throughout his career mao regarded marxism leninism as a political convenience not as a doctrine permanently essential to his master plan just as mao used the nationalists of chiang kai shek and stalin s soviet union as means to further his own political ambitions so did he manipulate marxist leninist ideology to hoodwink and attract at home and abroad professional revolutionaries to help do his bidding mao s aims express in their worldviews an entirely chinese tradition in his poems mao s dialectics his materialism and his authoritarianism all take their points of reference from within the chinese cultural order dragon in ambush is a thoroughly unique and revolutionary approach to understanding the mind of mao zedong
