salman rushdie at the turn of the twenty first century the book argues that america haunts the english literary tradition as a parallel space where ideology and aesthetics are configured differently consequently it suggests many of the key episodes in british history parliamentary reform in the 1830s the imperial designs of the victorian era the twentieth century conflict with fascism the advance of globalization since 1980 have been shaped by implicit dialogues with american cultural models rather than simply reinforcing the benign myth of a special relationship paul giles considers how various english writers over the past 200 years have engaged with america for various complicated reasons its promise of political republicanism byron mary shelley its emphasis on religious disestablishment clough gissing its prospect of pastoral regeneration ruxton lawrence its vision of scientific futurism huxley ballard the book also analyses the complex cultural relations between britain and the united states around the time of the second world war suggesting that writers such as wodehouse isherwood and auden understood the united states and germany to offer alternative versions of the kind of technological modernity that appeared equally hostile to traditional forms of english culture the book ends with a consideration of ways in which the canon of english literature might appear in a different light if seen from a transnational rather than a familiar national perspective the single most important volume for anyone interested in the civil war to own and consult from the foreword by james m mcpherson the first guide to civil war literature to appear in nearly 30 years this book provides the most comprehensive up to date and informative survey and analysis of the vast body of civil war literature more than 40 essays each by a specialist in a particular subfield of civil war history offer unmatched thoroughness and discerning assessments of each work s value the essays cover every aspect of the war from strategy tactics and battles to logistics intelligence supply and prisoner of war camps from generals and admirals to the men in the ranks from the atlantic to the far west from fighting fronts to the home front some sections cover civilian leaders the economy and foreign policy while others deal with the causes of war and aspects of reconstruction including the african american experience during and after the war breadth of topics is matched by breadth of genres covered essays discuss surveys of the war general reference works published and unpublished papers diaries and letters as well as the vast body of monographic literature including books dissertations and articles genealogical sources historical fiction and video and audio recordings also receive attention students of the american civil war will find this work an indispensable gateway and guide to the enormous body of information on america s pivotal experience the library has the records to which this user s guide refers see united states war department the war of the rebellion a compilation of the official records of the union and confederate armies a frequent assumption of the american led war on terror and its accompanying discourse originated largely with the george w bush administration and that there was a counterterrorism policy revolution in the u s political arena challenging these assumptions through a genealogical analysis of u s terrorism and counterterrorism discourses this book demonstrates a distinct continuity and lack of change of u s counterterrorism policy from ronald reagan to bill clinton and through to george w bush the book focuses on president clinton s discursive construction of new terrorism or catastrophic terrorism and the counterterrorism practices implemented by the clinton administration while simultaneously comparing it with president reagan s and president george w bush s approaches to counterterrorism it shows how the war on terror can be traced to earlier periods and that the so called bush revolution was largely built upon the existing framework established by president reagan and president clinton prior to the 2001 terrorist attacks clinton had expanded reagan s first war on terrorism discourse and constructed the new terrorism discourse characterised by the notions of borderless threats home grown terrorism wmd terrorism cyberterrorism and rogue states clinton s new terrorism discourse provided a useful framework for george w bush to discursively respond to the terrorist attacks on september 11th 2001 aiming to uncover the myth of president george w bush s foreign policy revolution and contribute to a deeper historical understanding of the u s led war on terror it

the dismantlement of the British Empire had a profound impact on many celebrated white Anglophone writers of the twentieth century particularly those who were raised in former British colonial territories and returned to the metropole after the Second World War formal decolonisation meant that these authors were unable to go home to their

colonial childhoods a historical juncture with profound consequences for how they wrote and recorded their own lives moving beyond previous discussions of imperial and colonial nostalgia life writing and the end of empire is the first critical study of white memoirists and autobiographers who rewrote their memories of empire across numerous life narratives by focussing on these processual homecomings emma parker s study asks what it means to be at home in memories of empire whether in the settler farms of southern rhodesia or amidst the neon lights of shanghai s international settlement these discussions trace the legacies of empire to the habitations and detritus of everyday life from mansions and modest railway huts to empty swimming pools heirlooms and photograph albums exploring works by penelope lively j g ballard doris lessing and janet frame this study establishes new connections between authors usually discussed for their fiction and who have been hitherto unrecognised as post imperial life writers offering close sustained analysis of autobiographies memoirs travel narratives and autofictions and identifying new subgenres such as speculative life writing this book advances rich new readings of autobiographical narrative by tracing the continuing importance of colonialism to white subjectivity the role of imperial memory in britain and the ways that these unsettling forces move beneath the surface of modern and contemporary literature this study offers new conceptual insights to the fields of life writing and postcolonial studies

there is great power in the use of words words create most of what we consider to be real and true framing our words and narratives is thus a tool of power but a power that also comes with limitations this intriguing issue is the topic of framing the threat an investigation of the relationship between language and security and of how discourse creates the scope of possibility for political action in particular the book scrutinizes and compares the security narratives of the former us presidents george w bush and barack obama it shows how their framings of identity i e of the american self and the enemy other facilitated a certain construction of threat that shaped the presidents detention and interrogation policies by defining what was necessary in the name of national security bush s narrative justified the operation of the detention center at Guantanamo Bay and rendered the mistreatment of detainees possible a situation that would have otherwise been illegal bush s framings therefore enabled legal limits to be pushed and made the violation of rules appear legitimate obama in contrast constructed a threat scenario that required an end to rule violations and the closure of Guantanamo for security reasons according to this

narrative a return to the rule of law was imperative if the american people were to be kept safe however obama s framing was continually challenged and it was never able to dominate public discourse consequently framing the threat argues obama was unable to implement the policy changes he had announced
