~~Air Pollution and Health in Rapidly Developing~~

Countries 2012-05-23 in developing countries the price of rapid growth is all too often noxious airborne pollution which annually contributes to a disturbing number of avoidable deaths in recent decades however there has been considerable progress in the epidemiology of air pollution significant changes in international air pollution guidelines and the emergence of more systematic approaches to air pollution control while many of these advances have originated in affluent countries there have been major developments in other parts of the world in this book a distinguished cast of leading researchers in both the scientific and policy dimensions of air pollution and health have synthesized the recent developments in the field and their relevance for public health in developing countries the authors review studies from a wide range of asian african and latin american countries and contrast the findings with those from europe and north america they also describe various tools and systems for air pollution management and emphasize approaches that can be used when data is scarce with a clear focus on the scientific and technical aspects of air pollution and health this book is essential reading for pollution and health policy makers researchers and others concerned with air pollution and health in developing countries

The FAST Mission 2012-12-06 1 1 mission background the scientific objective of this magnetospheric physics mission was a detailed investigation of the aurora borealis or northern lights the fields experiments electric and magnetic were constructed by the university of california at berkeley ucb and los angeles ucla respectively the particles instruments were constructed by ucb and the university of new hampshire in collaboration with lockheed palo alto research laboratory the instrument data processing unit was provided by ucb the spacecraft bus telemetry and
