fragile disinvestment by states has driven up tuition prices at public colleges and student debt has reached a startling record high of one trillion dollars cost minded students and their families and the public at large are questioning the worth of a college education even as study after study shows how important it is to economic and social mobility and as elite institutions trim financial aid and change other business practices in search of more sustainable business models racial and economic stratification in american higher education is only growing in american higher education in crisis what everyone needs to know goldie blumenstyk who has been reporting on higher education trends for 25 years guides readers through the forces and trends that have brought the education system to this on average twice as much as those with only a high school education she also discusses faculty tenure and growing administrative bureaucracies on campuses considers new demands for accountability such organizations are working to address questions of affordability diversity and academic integrity she addresses some of the advances in technology colleges are employing to attract and retain students a revolution so some observers claim archibald and feldman leading analysts provide an incisive overview of the challenges facing and possibilities for america s universities and colleges in their training future generations and they demonstrate that our higher education system is resilient and adaptable enough to weather the internal external and technological threats without changing campuses beyond recognition the road ahead for america s colleges and universities examines the threats posed to the current health of higher education by rising tuition and falling government support as well as from new digital technologies rippling through the entire economy some predict disaster pointing to high costs exploding debt and a digital tsunami that supposedly will combine to disrupt and sweep away many of the nation s higher education institutions or change them beyond recognition archibald and feldman provide a more nuanced view they argue that the bundle of services that four year colleges and universities provide will retain its value for the traditional age range of college students less certain archibald and feldman argue is whether the system will continue to be a force for social and economic opportunity the threats are most dire at schools that disproportionately serve america s most underprivileged students at the same time growing income inequality reduces the ability of many students and their families to pay for higher education archibald and feldman suggest a range of policy options at the state and federal level that will help america s higher education system continue to fulfill its promise 1969 includes the association s minutes previously published separately the congressional record is the official record of the proceedings and debates of the as the cost of higher education continues to rise students and their families find it increasingly difficult to navigate the financial aid maze in redesigning the financial aid system economist robert archibald examines the history of the system and its current flaws and he makes a radical proposal for changing the structure of the system archibald argues that one of the problems with the current model in which universities are responsible for the majority of grants while the federal government provides student loans is that a student cannot know the final price of attending a given institution until after he or she has applied been accepted and received a financial aid offer as a result students remain largely uninformed about the cost of their college educations until very late in the decision making process and so have difficulty making a timely choice in addition financial aid information is kept private creating confusion over the price of a college education and the role of financial aid under archibald s proposed reforms the federal government would assess a student s financial need and provide need based grants while institutions would be responsible for guaranteeing student loans not only would this new system demystify financial aid and allow students to be better informed about the cost of college earlier in the process but it would greatly simplify the application procedure and prevent financial aid allocation from contributing to the problem of rising tuition costs archibald s clear explanation of the current system its impact strengths and weaknesses as well as his plans for reform will be of interest to educators administrators students and parents
