designed to address the new standards which call for students to write speak and think mathematically each volume in this series contains journal prompts for a year s writing tasks in geometry secondary level

The "write" Way Mathematics Journal Prompts & More 2006

are you looking for new ways to help your children learn math in a math journal children explore their own ideas about numbers shapes and patterns through drawing or writing in response to a question journaling encourages students to develop a rich mathematical mindset they begin to see connections and make sense of math concepts they grow confident in their ability to think through new ideas all

they need is a piece of paper a pencil and a good prompt to launch their mathematical journey 312 things to do with a math journal includes number play prompts games math art story problems mini essays geometry investigations brainteasers number patterns research projects and much more these activities work at any grade level and most can be enjoyed more than once it doesn't matter whether your students are homeschooled or in a classroom distance learning or in person everyone can enjoy the experience of playing around with math early reviews from my journaling beta testers we really enjoyed these i remember doing pages and pages of dull equations with no creativity or puzzle thinking but now as a homeschool mom i'm actually enjoying math for the first time my daughter's math skills have skyrocketed and she always asks to start homeschool with math thank you for a great intro to playful math all of the kids were excited about their journals my oldest kept going without prompting and did several more pages on his own we had a lot of fun doing your math prompts we had never done any math journaling before but we will certainly integrate this into our weekly routine from now on pick up a copy of 312 things to do with a math journal and begin your family's math

journaling adventure today

The "Write" Way Mathematics Journal Prompts & More, Algebra II 2006

teach students to write about math so they can improve their conceptual understanding in authentic ways this resource offers hands on strategies you can use to help students in grades 6 8 discuss and articulate mathematical ideas use correct vocabulary and compose mathematical arguments part one discusses the importance of emphasizing language to make students thinking visible and to sharpen communication skills while attending to precision part two provides a plethora of writing prompts and activities visual prompts compare and contrast the answer is topical questions writing about journal prompts poetry cubing and thinking dots raft question quilts and always something never each activity is accompanied by a clear overview plus a variety of examples part three offers crosswalks of writing
