paleobotany has enormously expanded the documentation of fossil plant groups floras and vegetation types supporting its conclusions by technically much improved analyses of microfossils pollen and anatomical details an increasing quantity and quality of all these informations from the geosciences is available when we follow the history of the biosphere up to the present simultaneously research from the biosciences on the morphology ecology distribution systematics and evolution of extant vascular plants and on the ecogeographical differentiation of the vegetation cover of our planet has made enormous progress thus a synthetic geo and bioscientific approach becomes more and more feasible and urgent for further advances in the many problems of common concern a symposium organized by the deutsche akademie der naturforscher leopoldina attractive to paleo and neobotanists stimulated the discussion between specialists of the two disciplines the main results of the symposium are now presented in this volume sixteen international contributions outline the current knowledge about the historical differentiation and evolution of woody plant groups and forests covering the whole biosphere this survey from the beginning of the

tertiary up to the present is a first synthesis of relevant data from the geo and biosciences

The Pacific Northwest (Rough Guides

Snapshot USA) 1993

amber treganis constantly reinvents herself new clothes new hairstyle new car anything she can do to exert a level of control over her life what she can't control is her shape shifting other self the werewolf that sinks its claws into her brain during the three nights surrounding the full moon though she is a natural born shifter from a prominent werewolf family amber has been unwilling to change into her cat form ever since a terrible tragedy cost her the man she loved and she has little patience with wargs of any species who embrace their otherness more than their humanity she focuses on her life as a defense attorney in mt hood and stays out of wer politics but after a blurry night of hunting amber begins to notice changes in her transformation when she hears rumors of research to discover a treatment for shifting she suspects she may have been unknowingly given the experimental therapy with the help of adler a wereagle active in community politics amber tries to

hunt down the truth about this cure while staying off the radar of the fbi which tracks and manages wer communities in secret but amber doesn t realize how much she depends on her wer sense until one by one they begin to fade and amber is left increasingly ill and increasingly human can shifter who is losing her abilities survive for long in either human or wer society
