since the 1950s sociology has experienced a decline in prestige when compared with the other social sciences in some highly publicized cases some universities have retrenched their sociology departments others are contemplating either retrenchment or downsizing of their departments although there are some practitioners of the discipline who believe that it has never been in better shape many sociologists have come to believe that there are very serious problems both in the cognitive and social organization of the discipline this book contains sixteen essays by sociologists who believe that their discipline faces very serious problems which must be overcome if the discipline is to survive and prosper the contributors were selected to represent diverse views and thus there is substantial disagreement among them over what the problems are that sociology faces and how they may be remedied in this highly provocative book readers is likely to find some essays they agree with and others they disagree with but all the essays present important problems faced by the discipline which must be addressed although the authors of the sixteen essays do not agree on what is wrong with the discipline there are some themes which appear frequently in his introduction cole summarizes and comments on these themes his introduction centers on the question of whether sociology is entirely socially constructed is what we believe to be true about society constrained by empirical evidence or is it a result of our ideology power authority and other social processes one theme which appears in many of the essays is that sociology has become too ideological and as a result has lost credibility among university administrators politicians and the general public many of the essays also stress the view that there are very low levels of consensus in sociology and that it is hard to see evidence of progress others criticize the discipline for not dealing with the really important social issues and see much of the work published as being parochial and trivial questions are also raised about why the use of causal models has failed to generate solutions to most of the problems the discipline addresses some authors believe that the discipline adheres to an overly rational model of human behavior and has failed to keep up with some of the advances introduced by post modernist theories this highly readable set of essays should be of interest to all those are concerned about the current state of sociology they will also be useful in introducing graduate students to some of the most important issues currently being debated in the field stephen cole is currently professor of sociology at the state university of new york at stony brook and professor of sociology at the university of queensland australia he is the author of making science between nature and society and with jonathan r cole social stratification in science

for decades evolutionary analysis was overlooked or altogether ignored by sociologists fears and biases persisted nearly a century after auguste comte gave the discipline its name as did concerns that its effect would only reduce sociology to another discipline whether biology psychology or economics worse apprehension that the application of evolutionary theory would encourage heightened perceptions of racism sexism ethnocentrism and reductionism pervaded turner and machalek argue instead for a new embrace of biology and evolutionary analysis sociology from its very beginnings in the early 19th century has always been concerned with the study of evolution particularly the transformation of societies from simple to ever more complex forms by comprehensively reviewing the original ways that sociologists applied evolutionary theory and examining the recent renewal and expansion of these early approaches the authors confront the challenges posed by biology neuroscience and psychology to distinct evolutionary approaches within sociology they emerge with key theoretical and methodological discoveries that demonstrate the critical and compelling case for a dramatically enriched sociology that incorporates all forms of comparative evolutionary analysis to its canon and study of sociocultural phenomena
