Strengthening the Credibility of Public Finances 2021-10-13 chapter 1 argues that fiscal policy should remain nimble and strengthen its medium term frameworks as countries face highly uncertain and differentiated prospects vaccination has saved lives and is helping fuel a nascent recovery but risks are elevated amidst new virus variants high debt and poverty in advanced economies the shift in fiscal support toward medium term packages to build back better will have overall positive effects globally emerging markets and low income developing countries face a more challenging outlook with permanent economic scarring and revenue losses they need international support to increase vaccine availability and financing to achieve the sustainable development goals many countries find themselves in a situation where fiscal support is still invaluable to protect lives and livelihoods at the same time governments are also facing questions on their elevated debt and gross financing needs chapter 2 provides countries with guidance on how they can both avoid withdrawing fiscal support too early and yet signal to the public that their debt levels are sustainable in the long run to commit to future deficit reduction governments have several instruments including undertaking structural fiscal reforms such as pension reform or

subsidies reform pre legislating changes to taxes or spending committing to fiscal rules that lead to deficit reduction in the future countries that follow debt rules for instance manage to reduce debt faster than other countries although fiscal rules should also provide enough flexibility to spend in times of need overall governments that commit to sound public finances and that achieve high levels of fiscal transparency reap meaningful benefits their budgets are more credible their announcements are better perceived by the media and they pay lower interest rates on their debt

Malaysia's 14th General Election and UMNO's Fall 2019-10-08 the 2018 Malaysian general election will stand as a major defining event in Malaysian history when the ruling Barisan Nasional coalition unexpectedly lost power in the country they had ruled for over half a century. This volume brings together scholars who assess one fundamental factor that brought about this game-changing event in Malaysian politics: intra-elite feuding in the leading Malay-based political parties. This study provides an analysis of individual state politics as well as national trends shaped by the actions of leaders in government and the opposition, an indispensable guide for scholars studying the politics of Malaysia and of Southeast Asia more broadly. It will be of great interest for all readers with an interest in Malaysian politics.

Tax Law, State-Building and the Constitution 2020-08-06 this monograph looks at how tax is intertwined with constitutional law and the state in the UK. It looks at a variety of topics including tax devolution, scrutiny and reform of tax legislation, the protection of taxpayers and the domestic legal processing of international rules and problems. Tax law, state building and the constitution presents and interrogates five key claims: first, there is a clear overlap between the concerns of tax and constitutional lawyers; secondly, the tax system is being deeply affected by the fast pace of constitutional change; thirdly, decisions taken in the tax field are likely to have a reverse influence on the evolution of the constitution; fourthly, these relationships are heavily context-dependent with tax making all the difference to some ongoing constitutional controversies whilst having very little to do with others; fifthly, by acknowledging tax as an important moving part within the contemporary constitution, we might understand both tax and constitutional law a little better. The book therefore contributes to deeper theoretical debates on the identity of tax law as a discipline, the relevance of tax to public lawyers, the meaning of state building in the recent history of a developed country, and the importance of public finances to a wider sense of what is going on. These are questions that ought to command the attention of tax and constitutional law academics as well as policy makers and reformers.

Oxford Handbook of Online Intermediary Liability 2020 this book provides a comprehensive authoritative and state-of-the-art discussion of fundamental legal issues in intermediary liability online while also describing advancement in intermediary liability theory and identifying recent policy trends.

Message and Medium 2020-06-08 this paper quantitatively assesses the effects of inflation shocks on the public debt to gdp ratio in 19 advanced economies using simulation and estimation approaches the simulations based on the debt dynamics equation and estimations of impulse responses by local projections both suggest that a 1 percentage point shock to inflation rate reduces the debt to gdp ratio by about 0.5 to 1 percentage points the results also suggest that the impact is larger and more persistent when the debt maturity is longer but the difference from the benchmark case is not significant these results imply that modestly higher inflation even if accompanied by some financial repression could reduce public debt burden only marginally in many advanced economies
