

Ebook free Nursing stress scale tool (2023)

abstract arabic speaking populations suffer from unique stressors including but not limited to acculturation making it more crucial than ever to have a validated tool to measure stress in this population the stress overload scale sos which measures stress perceived as overwhelming relative to one s resources has proven effective in predicting illness in english speaking populations but no arabic version of the 30 item sos yet exists the current study aimed to construct an arabic sos and determine if it maintains its validity in native arabic speakers in the united states the 30 item sos was translated into arabic using the cross cultural adaptation method including back translation the sample consisted of 90 native arabic speakers aged 18 years and over from a large public university who completed the measures online the study demonstrated that the arabic sos generally paralleled the original version in terms of a two factor structure personal vulnerability and event load and reliability the arabic sos also demonstrated construct and criterion validity by showing significant positive correlations with the arabic perceived stress scale and the patient health questionnaire 15 respectively limitations of this study and suggestions for future validation in different arabic speaking samples and settings are discussed it is concluded that the

recently developed tools as well as indicating the direction of future research and the 40 revised papers included here have been selected by the somet20 international reviewing committee on the basis of technical soundness relevance originality significance and clarity the book is divided into 5 chapters artificial intelligence techniques on software engineering and requirement engineering software methods for informatics medical informatics and bio medicine applications applied software tools techniques and related software engineering models intelligent software systems design software quality software evolution and validation techniques and knowledge science and intelligent computing providing an overview of the state of the art in software science and its supporting technology this book will be of interest to all those working in the field the book professionalises counselling through the scientific application of appropriate knowledge and skills at various stages of the counselling process with the aim of equipping readers with fundamental and advanced counselling skills this book examines a range of key skills from various theories and models of counselling to enable students and professionals to understand the underlying techniques which need to be applied from the time the client approaches the counsellor until the conclusion of the counselling process sheds light on the complex psychological state of clients to discuss training for a holistic assessment in terms of emotions cognition motivation and behaviour presents extensive materials that train the students in skills to provide emotional relief to the client to help the client change from self defeating negative thoughts to promising positive thinking enhancing motivation and self confidence to initiate

action integrates discussions on case studies live as well as hypothetical examples traditional and contemporary theories on counselling with the art of communication an invaluable guidebook on developing counselling skills this volume will be of immense interest to students researchers teachers professionals and practitioners of psychology behavioural sciences mental health counselling and education health promotion and disease prevention for advanced practice integrating evidence based lifestyle concepts is a unique new resource that is not afraid to address lifestyle concepts that can change the trajectory of healthcare in the united states and globally it provides practical evidence based approaches to reduce the pandemic of preventable lifestyle related chronic diseases such as heart disease hypertension some strokes type 2 diabetes obesity and multiple types of cancer it provides nurse practitioners and physician assistants with the lifestyle management tools needed to contribute to a higher level of care to promote health and prevent disease the authors take a deep dive into the literature regarding lifestyle concepts and practical management of lifestyle related chronic diseases they discuss the root causes of diseases and approaches for patient centered care strategies for health promotion reimbursement and trending telehealth delivery of health care the book has well turned out to be a boon for researchers from academia as well as industry the book seemly meets the requirement and encounters the dilemma of a first time researcher in many ways the basics of research paper writing are taken well care in the previous editions of the handbooks as proceedings published by prestige institute of management and research gwalior the

previous editions focused on steps to carry out review of literature setting objectives developing hypothesis selecting appropriate methods as per objectives drawing inferences followed by referencing styles the book not only provides insights to a first time researcher but also introduces them with the latest tools part one of the book presents introduction to e views as chapter 1 the chapter deals with step wise procedure to work with e views elaborately e views is widely used numerous econometric analyses along with statistical analysis e views provided analysis like cross section time series estimates and forecasts as well as does panel data analysis simultaneously chapter 2 is modestly written to introduce mendeley to the researcher mendeley is expedient for copious objectives like conducting systematic literature review research gap identification setting objectives thereafter and more over provides a most vital efficacy to manage research papers in a stress free manner mendeley is widely used amongst researchers across the globe as a referencing tool as well providing competence to incorporate any style of referencing within fraction of seconds thus taking research on next level part two of the book contains twelve research papers covering diverse domains like finance marketing hr and it the research papers are the sample papers exhibiting the concepts of writing a well structured paper and elaborating the procedures to be followed while writing a research paper the research papers included in the book are developed during the five day national research methodology workshop organized by prestige institute of management and research gwalior the paper writing work was divided into before during and after phases topic finalization measure development review of

literature and data collection was done before the initiation of workshop among the teams of registered participants the entire methodology application of data analysis tools and discussion was done during the workshop post workshop i e the after phase was exclusively dedicated for strengthening the review of literature discussion of results and referencing followed by improvement in the overall structure and language of the research paper we hope the efforts put in the book will surely help readers this book presents the proceedings of the 19th international conference of the indian society of ergonomics hwwe held in guwahati india on december 1 3 2021 by highlighting the latest theories and models as well as cutting edge technologies and applications and by combining findings from a range of disciplines including engineering design health care management computer science and behavioral science it provides researchers and practitioners alike with a comprehensive timely guide on user centered design for quality life human factors and ergonomics design applications cognitive processing and response it also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying knowledge and techniques to optimize system performance while at the same time promoting the health safety and well being of individuals the proceedings includes papers from researchers and practitioners scientists and physicians institutional leaders managers and policy makers that contribute to constructing the human factors and ergonomics approach across a variety of methodologies domains and productive sectors vicarious trauma and disaster mental health focuses on the clinician and the impact of working with

disaster survivors floods hurricanes tornadoes mass shootings terrorism and other large scale catastrophic events have increased in the last decade and disaster resilience has become a national imperative this book explores vicarious traumatization in mental health providers who respond to massive disasters by choice or by circumstance what happens when clinicians share the trauma and vulnerability from the toll taken by a disaster with the victims they care for how can clinicians increase resilience from disaster exposure and provide mental health services effectively vicarious trauma and disaster mental health offers insight and analysis of the research and theory behind vicarious trauma and compares and contrasts with other work impact concepts such as burnout compassion fatigue and secondary traumatic stress it proposes practical evidence informed personal strategies and organizational approaches that address five cognitive schemas safety esteem trust control and intimacy disrupted in vicarious trauma with an emphasis on the psychological health and safety of mental health providers in the post disaster workplace this book represents a shift in perspective and provides a framework for the promotion of worker resilience in the standard of practice in disaster management traditionally assessment and evaluation have focused on the negative aspects or deficits of a client s presentation yet strengths health and those things that are going right in a person s life are key protective factors in the prevention and treatment of many mental health problems thus measuring strengths is an important component of a balanced assessment and evaluation process this is the first compendium of more than 140 valid and reliable strengths based assessment tools that

clinicians researchers educators and program evaluators can use to assess a wide array of positive attributes including well being mindfulness optimism resilience humor aspirations values sources of support emotional intelligence and much more these tools provide a clear picture of an individual's strengths while being easy to complete score and interpret the scales and instruments included are consistently formatted are organized according to construct measures and include tools for working with adults couples families children and special populations they represent a wide range of theoretical approaches and were written by a diverse array of professionals including social workers psychologists nurses physicians and sociologists partial list of instruments adult dispositional hope scale assessing emotions scale flourishing scale five facet mindfulness questionnaire positive states of mind scale a measure of expectations for partner multidimensional sense of humor scale parenting sense of competence scale personal wellbeing index proactive coping inventory psychological empowerment scale stress related growth scale social wellbeing scales wellness beliefs scale much is known about the physical strain that athletes bodies are subjected to and the dangerous aspects of competition immediately spring to mind but why do athletes train the way they do and why do they push the limits why do some recover well from injury while others struggle despite decades of medical and sport science research a piece has been missing from this picture until recently the role of psychological factors in risk and rehabilitation has been poorly understood thankfully there is increasing awareness of just how crucial these factors can be for predicting injury improving recovery developing

prevention strategies and supporting athletes long term health yet research in this area is still in its infancy and it can be difficult to synthesize an ever growing body of knowledge into practical injury management approaches using analogies from everyday life the mental impact of sports injury bridges the gap between academic research and practical settings in an informative yet easy to follow guide to the psychology of sports injury addressing risk rehabilitation and prevention it outlines key considerations for researchers and practitioners across all levels of sport alongside the fundamentals of injury psychology emerging areas of importance are also discussed including training load monitoring and the technological advances that are shaping modern sport medicine targeted examples highlight the challenges of preventing and managing injury in grassroots elite and professional contexts with chapters dedicated to the under served communities of youth and para sport athletes stepping away from traditional texts this unique book presents the landmark literature major concepts and athlete insights into sports injury psychology from a totally new perspective this cutting edge resource provides a comprehensive review of available assessment tools for autism spectrum disorder asd presenting up to date evidence for their efficacy as well as best practice for selecting appropriate forms of assessment across the lifespan gathering together the latest international research evidence kenneth j aitken provides a clear evaluation of the commonly used assessment measures and examines other tools not yet validated for asd assessment but which are likely to have promising applications for the field the tools covered include those relating to core assessment areas

such as cognitive ability communication motor skills and executive function as well as supplementary and emerging areas of assessment such as behaviour and attention sensory issues anxiety and depression friendships and loneliness and internet safety this pioneering report will be an indispensable primary reference for researchers academics clinicians service providers and commissioners this is an open access book 2022 international conference on mathematical statistics and economic analysis msea 2022 will be held in dalian china from may 27 to 29 2022 based on probability theory mathematical statistics studies the statistical regularity of a large number of random phenomena and infers and forecasts the whole economic development is very important to people s life and the country through data statistics and analysis we can quickly understand the law of economic development this conference combines mathematical statistics and economic analysis for the first time to explore the relationship between them so as to provide a platform for experts and scholars in the field of mathematical statistics and economic analysis to exchange and discuss background simulation enhances experiential learning through creating experience to form the basis of learning and it has been recognized as an effective pedagogy in current health professions education as an integral element of simulation debriefing contributes to transforming the created experience to new knowledge video assisted debriefing vad refers to adding audio visual capture and review to traditional verbal debriefing vd despite being regarded as gold standard for simulation evidence reporting educational effects of vad is mixed and its best practice remains absent aims the aims of this

thesis were to develop a framework for vad to test and compare its effects on prelicensure nursing students debriefing experiences reflective abilities and nursing competencies with vd without video as well as to explore its potential impact on facilitators perceptions and practices following high fidelity simulation design and methods this thesis comprised of four studies with different research designs study i was a systematic review which synthesized the characteristics of existing vad practices in health professions education and evaluated its effectiveness on learners reactions learning and behaviors study ii was a proof of concept study which developed of a three phase framework for vad and tested its preliminary effects on nursing students debriefing experiences reflective abilities and nursing competencies using a pretest posttest design study iii adopted a qualitative method to explore nursing students experiences and perspectives of a structured vad using focus groups data were analyzed using thematic analysis approach study iv employed a mixed method research design to investigate the impact of a three phase vad on nursing students debriefing experiences perceived stress as well as facilitators perceptions and debriefing practices results study i showed that existing vad offered comparable educational effects as vd in terms of learners experiences attitudes and performance except on knowledge acquisition video did not demonstrate its continuous advantage in debriefing which informed the absence of best practice the preliminary results of study ii reported that a three phase vad significantly improved students debriefing experiences $p < 0.001$ reflective abilities $p < 0.01$ and nursing competencies $p < 0.001$ study iii disclosed an emotional roller coaster experienced by

nursing students in vad from unwillingness and fear of being judged followed by stress and defensiveness to sense of appreciation and satisfaction most students agreed that vad provided a good learning experience with few preferred not to receive peer feedback after video review study iv demonstrated that vad improved nursing students debriefing experiences p 0 01 and caused comparable stress as vd repeated exposure to vad significantly reduced stress levels vad also enhanced facilitators perceptions and debriefing practices conclusions this project developed a three phase framework for vad and affirmed its educational effects on improving nursing students debriefing experiences reflective abilities and competencies following high fidelity simulation with comparable stress experienced as in vd the finding of an emotional roller coaster experienced by nursing students in vad challenged the snapshot of negative emotions reported in other studies offering some clarity to the inconsistent evidence regarding learners experiences of vad and contributing to its best practice this thesis also proved that this three phase vad held the potential to enhance facilitators debriefing practices towards student centered learning bakgrund att simulera olika vårdssituationer är idag en väl använd pedagogisk metod inom hälsoutbildningarna eftersom erfarenheten av att träna simulering kan förbättra inläringen debriefing ingår som en integrerad del i simuleringen och bidrar till att omvandla erfarenheten till kunskap video assisterad debriefing innebär att simuleringssituationen filmas och filmen används sedan i debriefingen trots att det är vanligt att använda video assisterad debriefing är bevisen för att det är bättre än debriefing utan video oklara syfte

syftet med denna avhandling var att utveckla en strukturerad video assisterad debriefing att använda i samband med simulering på sjuksköterskeutbildningen att sedan testa den på sjuksköterskestudenter för att se om den påverkade deras debriefing erfarenhet reflektionsförmåga och omvårdnadskompetens jämfört med sjuksköterskestudenter som erhöll debriefing utan video syftet var också att utforska handledarnas uppfattning och genomförande av video assisterad debriefing i samband med simulering design och metod avhandlingen består av fyra studier med olika design studie 1 var en systematisk litteraturstudie där 23 artiklar innehållande tidigare erfarenheter av videoassisterad debriefing från hälsoutbildningar granskades och syntetiserades i studie 2 utvecklades en strukturerad video assisterad debriefing i tre faser som sedan testades på sjuksköterskestudenternas n 63 debriefing erfarenhet reflektionsförmåga och omvårdnadskompetens genom en före efter design i studie 3 användes en kvalitativ design för att med hjälp av fokusgrupper utforska sjuksköterskestudenternas n 27 erfarenheter av att använda video assisterad debriefing studie 4 var en mixed methods studie som undersökte betydelsen av en strukturerad video assisterad debriefing jämfört med debriefing utan video på sjuksköterskestudenternas n 145 debriefing erfarenhet och uppfattning av stress i samband med debriefingen i studie 4 undersöktes även handledarnas n 8 uppfattningar och genomförande av video assisterad debriefing resultat studie 1 visade att video assisterad debriefing var jämförbart med debriefing utan video vad det gäller erfarenheter attityder och genomförande men var inte bättre vad det gäller förvärvande av

ny kunskap resultaten från studie 2 visade att den strukturerade videoassisterade debriefingen signifikant förbättrade sjuksköterskestudenternas debriefing erfarenhet p 0 001 reflektionsförmåga p 0 01 och omvårdnadskompetens p 0 001 studie 3 visade att strukturerad video assisterad debriefing var som en emotionell bergodalbana designed to save time and assist busy practitioners this book guides standardized assessment and documentation of a patient s condition by providing ready to use forms that represent the gold standard of current practice now in its fifth edition this text provides a comprehensive and wellness oriented approach to the theory and practice of gerontologic nursing organized around the author s unique functional consequences theory of gerontologic nursing the book explores normal age related changes and risk factors that often interfere with optimal health and functioning to effectively identify and teach health promotion interventions the author provides research based background information and a variety of practical assessment and intervention strategies for use in every clinical setting highlights of this edition include expanded coverage of evidence based practice more first person stories new chapters and clinical tools such as assessment tools recommended by the hartford institute of geriatric nursing 13 2 abstract saddle point problems 282 13 3 preconditioned iterative methods 283 13 4 examples of saddle point problems 286 13 5 discretizations of saddle point problems 290 13 6 numerical results 295 iii geometric modelling 299 14 surface modelling from scattered geological data 301 n p fremming hjelle c tarrou 14 1 introduction 301 14 2 description of geological data 302 14 3 triangulations

understand writing style as well as assessment tools detailed case studies and clinical examples that demonstrate how key concepts apply to real world practice additional resources on the companion evolve website expand and enhance content within the text practical features including case studies ethics in practice and the nursing process in practice illustrate real world applications of key community public health nursing concepts a complete unit on the community as client helps you understand how the assessment diagnosis planning intervention and evaluation steps of the nursing process apply to the community as opposed to an individual a chapter devoted to community assessment provides a complete assessment tool and shows you how the tool applies to two different types of communities unique a chapter on screening and referral promotes population focused practice which is the crux of community public health nursing a separate unit on the family emphasizes the importance of viewing the family as a singular client a complete discussion of the minnesota wheel helps you better understand this widely accepted framework for community public health nursing practice helpful sections such as focus questions chapter outlines key ideas and learning by experience and reflection help you pinpoint essential information new healthy people 2020 objectives throughout the text help you identify common health risk factors in populations and families new coverage of health care reform including the patient protection and affordable care act of 2010 ppaca explores how current health care legislation impacts community public health nursing new discussions of community health hot button issues such as human trafficking genital

circumcision and bullying introduce you to today s health care challenges new information on weather related disaster fatalities bioterrorism and national and state planning responses familiarize you with current relevant issues which affect the health of populations worldwide and shape the role of the community public health nurse organizational role stress is connected with a multitude of negative effects where stress and coping with stress are phenomena closely tangled with human life such that the effects of stress are directly related to coping this book seeks to explore whether there is any relation between organizational role stress and career satisfaction on it professionals and to assess the levels among two variables which can be used to design some interventional strategies in the field of career counselling the 5th world congress on genetics geriatrics and neurodegenerative diseases research genedis 2022 focuses on the latest major challenges in scientific research new drug targets the development of novel biomarkers new imaging techniques novel protocols for early diagnosis of neurodegenerative diseases and several other scientific advances with the aim of better safer and healthier aging this volume focuses on the sessions from the conference on neuroscientific advances at the centre of any caring role is listening attentively to the concerns narratives and needs of others but to develop the skills of listening learning caring and counselling llcc you need support and training written by an experienced and awarded therapist listening learning caring and counselling is an authoritative comprehensive guide full of ideas and techniques designed to fill that role the main emphasis of this highly accessible reference work is on how health and related

professionals can assist clients as they work through the issues they commonly present with such as depression relationship issues addiction and grief numerous therapies and their related techniques are described and synthesized into the llcc approach while case studies skills and tips for everyday practice make it a practical and user friendly resource listening learning caring and counselling is essential reading for counsellors support workers case workers medical practitioners health professionals from physiotherapists pharmacists doctors dentists and their assistants to nutritionists and naturopaths serious life coaches and emergency workers as well as those in the fields of human resources as it is well known fact that in the fast changing world of today the role of the teacher assumes special significance since teacher is instrumental more than anybody else in helping the younger generation to imbibe the right values skills and attitude necessary to cope with the world of tomorrow the role of the teacher in the educational process is always challenging and dynamic so he must be fit by body mind and soul the success of education process depends much more upon the character and ability of teachers teacher must have right attitude to impart proper education according to ideas and ideologies of community and nation it is possible when a teacher has involvement and satisfaction in their job this book describes validated outcome measures for the international spinal cord injury population based on rigorous systematic reviews of ca 80 000 scientific articles the authors present assessment tools for various clinical uses in the health sciences following parameters of validity reliability and responsiveness it is important for the development of clinical practice and

research that practical and appropriate measures become universally accepted this would allow comparisons and meta analysis of high quality randomized controlled trials of people with this increasingly common injury this book emphasizes the need for consensus among researchers as to which tools must be studied in depth or adapted to other national contexts or which measurement instruments should be standardized in order to develop universal norms and standards for the performance of people with spinal cord injury it offers a valuable practical guide for clinicians rehabilitation professionals and nurses but will also help researchers to gain more confidence in using valid and reliable assessment tools for comparable clinical trials diverse learners with exceptional needs require a specialized curriculum that will help them to develop socially and intellectually in a way that traditional pedagogical practice is unable to fulfill as educational technologies and theoretical approaches to learning continue to advance so do the opportunities for exceptional children special and gifted education concepts methodologies tools and applications is an exhaustive compilation of emerging research theoretical concepts and real world examples of the ways in which the education of special needs and exceptional children is evolving emphasizing pedagogical innovation and new ways of looking at contemporary educational practice this multi volume reference work is ideal for inclusion in academic libraries for use by pre service and in service teachers graduate level students researchers and educational software designers and developers good mental health is a vital part of people s well being and the covid 19 pandemic brought renewed attention to its importance however

discussions so far have not focused sufficiently on how governments should best monitor it at the broader population level and on how to consider both mental ill health and positive mental states this handbook addresses a growing list of challenges faced by regions and cities in the pacific rim drawing connections around the what why and how questions that are fundamental to sustainable development policies and planning practices these include the connection between cities and surrounding landscapes across different boundaries and scales the persistence of environmental and development inequities and the growing impacts of global climate change including how physical conditions and social implications are being anticipated and addressed building upon localized knowledge and contextualized experiences this edited collection brings attention to place based approaches across the pacific rim and makes an important contribution to the scholarly and practical understanding of sustainable urban development models that have mostly emerged out of the western experiences nine sections each grounded in research dialogue and collaboration with practical examples and analysis focus on a theme or dimension that carries critical impacts on a holistic vision of city landscape development such as resilient communities ecosystem services and biodiversity energy water health and planning and engagement this international edited collection will appeal to academics and students engaged in research involving landscape architecture architecture planning public policy law urban studies geography environmental science and area studies it also informs policy makers professionals and advocates of actionable knowledge and adoptable ideas by connecting

those issues with the sustainable development goals sdgs of the united nations the collection of writings presented in this book speaks to multiyear collaboration of scholars through the apru sustainable cities and landscapes scl program and its global network facilitated by scl annual conferences and involving more than 100 contributors from more than 30 institutions the open access version of chapters 1 2 4 11 17 23 30 37 42 49 and 56 of this book available at taylorfrancis com books e 9781003033530 have been made available under a creative commons attribution non commercial no derivatives 4 0 license conversing on gender is as its subtitle indicates a primer for entering the broad conversation on gender that can be found both inside and outside of academic circles the book considers the relation of gender to sex and sexuality reviews prominent theories of gender and covers basic gender issues the european journal of tourism research is an interdisciplinary scientific journal in the field of tourism published by varna university of management bulgaria its aim is to provide a platform for discussion of theoretical and empirical problems in tourism publications from all fields connected with tourism such as management marketing sociology psychology geography political sciences mathematics statistics anthropology culture information technologies and others are invited the journal is open to all researchers young researchers and authors from central and eastern europe are encouraged to submit their contributions regular articles in the european journal of tourism research should normally be between 4 000 and 20 000 words major research articles of between 10 000 and 20 000 are highly welcome longer or shorter papers will also be

software methodologies tools and techniques have become an ever more important part of our lives and are crucial to the decision making processes that affect us every day this book presents papers from the 19th international conference on new trends in intelligent software methodology tools and techniques somet20 held in kitakyushu japan from 22 24 september 2020 the somet conferences bring together researchers and practitioners to share their original research results and experience of practical developments in software science and related new technologies and this book explores new trends and theories that highlight the direction and development of intelligent software methodologies tools and techniques it covers newly developed techniques enhanced methodologies software related solutions and recently developed tools as well as indicating the direction of future research and the 40 revised papers included here have been selected by the somet20 international reviewing committee on the basis of technical soundness relevance originality significance and clarity the book is divided into 5 chapters artificial intelligence techniques on software engineering and requirement engineering software methods for informatics medical informatics and bio medicine applications applied software tools techniques and related software engineering models intelligent software systems design software quality software evolution and validation techniques and knowledge science and intelligent computing providing an overview of the state of the art in software science and its supporting

technology this book will be of interest to all those working in the field

Obesity Assessment: Tools, Methods, Interpretations

1997-05-15

the book professionalises counselling through the scientific application of appropriate knowledge and skills at various stages of the counselling process with the aim of equipping readers with fundamental and advanced counselling skills this book examines a range of key skills from various theories and models of counselling to enable students and professionals to understand the underlying techniques which need to be applied from the time the client approaches the counsellor until the conclusion of the counselling process sheds light on the complex psychological state of clients to discuss training for a holistic assessment in terms of emotions cognition motivation and behaviour presents extensive materials that train the students in skills to provide emotional relief to the client to help the client change from self defeating negative thoughts to promising positive thinking enhancing motivation and self confidence to initiate action integrates discussions on case studies live as well as hypothetical examples traditional and contemporary theories on counselling with the art of communication an invaluable guidebook on developing counselling skills this volume will be of immense interest to students researchers teachers professionals and practitioners of

psychology behavioural sciences mental health counselling and education

Knowledge Innovation Through Intelligent Software Methodologies, Tools and Techniques 2020-09-30

health promotion and disease prevention for advanced practice integrating evidence based lifestyle concepts is a unique new resource that is not afraid to address lifestyle concepts that can change the trajectory of healthcare in the united states and globally it provides practical evidence based approaches to reduce the pandemic of preventable lifestyle related chronic diseases such as heart disease hypertension some strokes type 2 diabetes obesity and multiple types of cancer it provides nurse practitioners and physician assistants with the lifestyle management tools needed to contribute to a higher level of care to promote health and prevent disease the authors take a deep dive into the literature regarding lifestyle concepts and practical management of lifestyle related chronic diseases they discuss the root causes of diseases and approaches for patient centered care strategies for health promotion reimbursement and trending telehealth delivery of health care

Counselling Skills 2024-03-13

the book has well turned out to be a boon for researchers from academia as well as industry the book seemly meets the requirement and encounters the dilemma of a first time researcher in many ways the basics of research paper writing are taken well care in the previous editions of the handbooks as proceedings published by prestige institute of management and research gwalior the previous editions focused on steps to carry out review of literature setting objectives developing hypothesis selecting appropriate methods as per objectives drawing inferences followed by referencing styles the book not only provides insights to a first time researcher but also introduces them with the latest tools part one of the book presents introduction to e views as chapter 1 the chapter deals with step wise procedure to work with e views elaborately e views is widely used numerous econometric analyses along with statistical analysis e views provided analysis like cross section time series estimates and forecasts as well as does panel data analysis simultaneously chapter 2 is modestly written to introduce mendeley to the researcher mendeley is expedient for copious objectives like conducting systematic literature review research gap identification setting objectives thereafter and more over provides a most vital efficacy to manage research papers in a stress free manner mendeley is widely used amongst researchers across the globe as a referencing tool as well providing competence to incorporate any style of referencing within fraction of seconds thus taking research on next

level part two of the book contains twelve research papers covering diverse domains like finance marketing hr and it the research papers are the sample papers exhibiting the concepts of writing a well structured paper and elaborating the procedures to be followed while writing a research paper the research papers included in the book are developed during the five day national research methodology workshop organized by prestige institute of management and research gwalior the paper writing work was divided into before during and after phases topic finalization measure development review of literature and data collection was done before the initiation of workshop among the teams of registered participants the entire methodology application of data analysis tools and discussion was done during the workshop post workshop i e the after phase was exclusively dedicated for strengthening the review of literature discussion of results and referencing followed by improvement in the overall structure and language of the research paper we hope the efforts put in the book will surely help readers

Health Promotion and Disease Prevention for Advanced Practice: Integrating Evidence-Based Lifestyle

Concepts 2023-10-05

this book presents the proceedings of the 19th international conference of the indian society of ergonomics hwwwe held in guwahati india on december 1 3 2021 by highlighting the latest theories and models as well as cutting edge technologies and applications and by combining findings from a range of disciplines including engineering design health care management computer science and behavioral science it provides researchers and practitioners alike with a comprehensive timely guide on user centered design for quality life human factors and ergonomics design applications cognitive processing and response it also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying knowledge and techniques to optimize system performance while at the same time promoting the health safety and well being of individuals the proceedings includes papers from researchers and practitioners scientists and physicians institutional leaders managers and policy makers that contribute to constructing the human factors and ergonomics approach across a variety of methodologies domains and productive sectors

Handbook on Writing Research Paper in Social Science

Using Advance Tools *2022-10-31*

vicarious trauma and disaster mental health focuses on the clinician and the impact of working with disaster survivors floods hurricanes tornadoes mass shootings terrorism and other large scale catastrophic events have increased in the last decade and disaster resilience has become a national imperative this book explores vicarious traumatization in mental health providers who respond to massive disasters by choice or by circumstance what happens when clinicians share the trauma and vulnerability from the toll taken by a disaster with the victims they care for how can clinicians increase resilience from disaster exposure and provide mental health services effectively vicarious trauma and disaster mental health offers insight and analysis of the research and theory behind vicarious trauma and compares and contrasts with other work impact concepts such as burnout compassion fatigue and secondary traumatic stress it proposes practical evidence informed personal strategies and organizational approaches that address five cognitive schemas safety esteem trust control and intimacy disrupted in vicarious trauma with an emphasis on the psychological health and safety of mental health providers in the post disaster workplace this book represents a shift in perspective and provides a framework for the promotion of worker resilience in the standard of practice in disaster management

Ergonomics for Design and Innovation 2022-06-06

traditionally assessment and evaluation have focused on the negative aspects or deficits of a client s presentation yet strengths health and those things that are going right in a person s life are key protective factors in the prevention and treatment of manymental health problems thus measuring strengths is an important component of a balanced assessment and evaluation process this is the first compendium of more than 140 valid and reliable strengths based assessment tools that clinicians researchers educators and program evaluators can use to assess a wide array of positive attributes including well being mindfulness optimism resilience humor aspirations values sources of support emotional intelligence and much more these tools provide a clear picture of anindividual s strengths while being easy to complete score and interpret the scales and instruments included are consistently formatted are organized according to construct measures and include tools for working with adults couples families children and special populations they represent a wide range of theoretical approaches and were written by a diverse array of professionals including social workers psychologists nurses physicians and sociologists partial list of instruments adult dispositional hope scale assessing emotions scale flourishing scale five facet mindfulness questionnaire positive states of mind scale a measure of expectations for partner multidimensional sense of humor scale parenting sense of competence scale personal wellbeing index proactive coping inventory psychological empowerment scale

Vicarious Trauma and Disaster Mental Health

2015-02-11

much is known about the physical strain that athletes bodies are subjected to and the dangerous aspects of competition immediately spring to mind but why do athletes train the way they do and why do they push the limits why do some recover well from injury while others struggle despite decades of medical and sport science research a piece has been missing from this picture until recently the role of psychological factors in risk and rehabilitation has been poorly understood thankfully there is increasing awareness of just how crucial these factors can be for predicting injury improving recovery developing prevention strategies and supporting athletes long term health yet research in this area is still in its infancy and it can be difficult to synthesize an ever growing body of knowledge into practical injury management approaches using analogies from everyday life the mental impact of sports injury bridges the gap between academic research and practical settings in an informative yet easy to follow guide to the psychology of sports injury addressing risk rehabilitation and prevention it outlines key considerations for researchers and practitioners across all levels of sport alongside the fundamentals of injury psychology

emerging areas of importance are also discussed including training load monitoring and the technological advances that are shaping modern sport medicine targeted examples highlight the challenges of preventing and managing injury in grassroots elite and professional contexts with chapters dedicated to the under served communities of youth and para sport athletes stepping away from traditional texts this unique book presents the landmark literature major concepts and athlete insights into sports injury psychology from a totally new perspective

Tools for Strengths-Based Assessment and Evaluation **2012-11-08**

this cutting edge resource provides a comprehensive review of available assessment tools for autism spectrum disorder asd presenting up to date evidence for their efficacy as well as best practice for selecting appropriate forms of assessment across the lifespan gathering together the latest international research evidence kenneth j aitken provides a clear evaluation of the commonly used assessment measures and examines other tools not yet validated for asd assessment but which are likely to have promising applications for the field the tools covered include those relating to core assessment areas such as cognitive ability communication motor skills and executive function as well as supplementary and emerging

areas of assessment such as behaviour and attention sensory issues anxiety and depression friendships and loneliness and internet safety this pioneering report will be an indispensable primary reference for researchers academics clinicians service providers and commissioners

The Mental Impact of Sports Injury 2021-12-30

this is an open access book 2022 international conference on mathematical statistics and economic analysis msea 2022 will be held in dalian china from may 27 to 29 2022 based on probability theory mathematical statistics studies the statistical regularity of a large number of random phenomena and infers and forecasts the whole economic development is very important to people s life and the country through data statistics and analysis we can quickly understand the law of economic development this conference combines mathematical statistics and economic analysis for the first time to explore the relationship between them so as to provide a platform for experts and scholars in the field of mathematical statistics and economic analysis to exchange and discuss

Evidence-Based Assessment Tools in ASD 2015-03-21

background simulation enhances experiential learning through creating experience to form the basis of learning and it has been recognized as an effective pedagogy in current health professions education as an integral element of simulation debriefing contributes to transforming the created experience to new knowledge video assisted debriefing vad refers to adding audio visual capture and review to traditional verbal debriefing vd despite being regarded as gold standard for simulation evidence reporting educational effects of vad is mixed and its best practice remains absent aims the aims of this thesis were to develop a framework for vad to test and compare its effects on prelicensure nursing students debriefing experiences reflective abilities and nursing competencies with vd without video as well as to explore its potential impact on facilitators perceptions and practices following high fidelity simulation design and methods this thesis comprised of four studies with different research designs study i was a systematic review which synthesized the characteristics of existing vad practices in health professions education and evaluated its effectiveness on learners reactions learning and behaviors study ii was a proof of concept study which developed of a three phase framework for vad and tested its preliminary effects on nursing students debriefing experiences reflective abilities and nursing competencies using a pretest posttest design study iii adopted a qualitative method to explore nursing students experiences and perspectives of a structured vad using focus groups data were

analyzed using thematic analysis approach study iv employed a mixed method research design to investigate the impact of a three phase vad on nursing students debriefing experiences perceived stress as well as facilitators perceptions and debriefing practices results study i showed that existing vad offered comparable educational effects as vd in terms of learners experiences attitudes and performance except on knowledge acquisition video did not demonstrate its continuous advantage in debriefing which informed the absence of best practice the preliminary results of study ii reported that a three phase vad significantly improved students debriefing experiences $p < 0.001$ reflective abilities $p < 0.01$ and nursing competencies $p < 0.001$ study iii disclosed an emotional roller coaster experienced by nursing students in vad from unwillingness and fear of being judged followed by stress and defensiveness to sense of appreciation and satisfaction most students agreed that vad provided a good learning experience with few preferred not to receive peer feedback after video review study iv demonstrated that vad improved nursing students debriefing experiences $p < 0.01$ and caused comparable stress as vd repeated exposure to vad significantly reduced stress levels vad also enhanced facilitators perceptions and debriefing practices conclusions this project developed a three phase framework for vad and affirmed its educational effects on improving nursing students debriefing experiences reflective abilities and competencies following high fidelity simulation with comparable stress experienced as in vd the finding of an emotional roller coaster experienced by nursing students in vad challenged the snapshot of negative emotions reported in other studies

offering some clarity to the inconsistent evidence regarding learners experiences of vad and contributing to its best practice this thesis also proved that this three phase vad held the potential to enhance facilitators debriefing practices towards student centered learning bakgrund att simulera olika vårdssituationer är idag en väl använd pedagogisk metod inom hälsoutbildningarna eftersom erfarenheten av att träna simulering kan förbättra inläringen debriefing ingår som en integrerad del i simuleringen och bidrar till att omvandla erfarenheten till kunskap video assisterad debriefing innebär att simuleringssituationen filmas och filmen används sedan i debriefingen trots att det är vanligt att använda video assisterad debriefing är bevisen för att det är bättre än debriefing utan video oklara syfte syftet med denna avhandling var att utveckla en strukturerad video assisterad debriefing att använda i samband med simulering på sjuksköterskeutbildningen att sedan testa den på sjuksköterskestudenter för att se om den påverkade deras debriefing erfarenhet reflektionsförmåga och omvårdnadskompetens jämfört med sjuksköterskestudenter som erhöll debriefing utan video syftet var också att utforska handledarnas uppfattning och genomförande av video assisterad debriefing i samband med simulering design och metod avhandlingen består av fyra studier med olika design studie 1 var en systematisk litteraturstudie där 23 artiklar innehållande tidigare erfarenheter av videoassisterad debriefing från hälsoutbildningar granskades och syntetiserades i studie 2 utvecklades en strukturerad video assisterad debriefing i tre faser som sedan testades på sjuksköterskestudenternas n 63 debriefing erfarenhet reflektionsförmåga och

omvårdnadskompetens genom en före efter design i studie 3 användes en kvalitativ design för att med hjälp av fokusgrupper utforska sjuksköterskestudenternas n 27 erfarenheter av att använda video assisterad debriefing studie 4 var en mixed methods studie som undersökte betydelsen av en strukturerad video assisterad debriefing jämfört med debriefing utan video på sjuksköterskestudenternas n 145 debriefing erfarenhet och uppfattning av stress i samband med debriefingen i studie 4 undersöktes även handledarnas n 8 uppfattningar och genomförande av video assisterad debriefing resultat studie 1 visade att video assisterad debriefing var jämförbart med debriefing utan video vad det gäller erfarenheter attityder och genomförande men var inte bättre vad det gäller förvärvande av ny kunskap resultaten från studie 2 visade att den strukturerade videoassisterade debriefingen signifikant förbättrade sjuksköterskestudenternas debriefing erfarenhet p 0 001 reflektionsförmåga p 0 01 och omvårdnadskompetens p 0 001 studie 3 visade att strukturerad video assisterad debriefing var som en emotionell bergodalbana

process in practice illustrate real world applications of key community public health nursing concepts a complete unit on the community as client helps you understand how the assessment diagnosis planning intervention and evaluation steps of the nursing process apply to the community as opposed to an individual a chapter devoted to community assessment provides a complete assessment tool and shows you how the tool applies to two different types of communities unique a chapter on screening and referral promotes population focused practice which is the crux of community public health nursing a separate unit on the family emphasizes the importance of viewing the family as a singular client a complete discussion of the minnesota wheel helps you better understand this widely accepted framework for community public health nursing practice helpful sections such as focus questions chapter outlines key ideas and learning by experience and reflection help you pinpoint essential information new healthy people 2020 objectives throughout the text help you identify common health risk factors in populations and families new coverage of health care reform including the patient protection and affordable care act of 2010 ppaca explores how current health care legislation impacts community public health nursing new discussions of community health hot button issues such as human trafficking genital circumcision and bullying introduce you to today s health care challenges new information on weather related disaster fatalities bioterrorism and national and state planning responses familiarize you with current relevant issues which affect the health of populations worldwide and shape the role of the community public health nurse

Social Work Research Methods 2019-01-04

organizational role stress is connected with a multitude of negative effects where stress and coping with stress are phenomena closely tangled with human life such that the effects of stress are directly related to coping this book seeks to explore whether there is any relation between organizational role stress and career satisfaction on it professionals and to assess the levels among two variables which can be used to design some interventional strategies in the field of career counselling

Community/Public Health Nursing Practice - E-Book 2014-04-04

the 5th world congress on genetics geriatrics and neurodegenerative diseases research genedis 2022 focuses on the latest major challenges in scientific research new drug targets the development of novel biomarkers new imaging techniques novel protocols for early diagnosis of neurodegenerative diseases and several other scientific advances with the aim of better safer and healthier aging this volume focuses on the sessions from the conference on neuroscientific advances

Do Organizational Stress Really Matters in Career Satisfaction? 2015

at the centre of any caring role is listening attentively to the concerns narratives and needs of others but to develop the skills of listening learning caring and counselling llcc you need support and training written by an experienced and awarded therapist listening learning caring and counselling is an authoritative comprehensive guide full of ideas and techniques designed to fill that role the main emphasis of this highly accessible reference work is on how health and related professionals can assist clients as they work through the issues they commonly present with such as depression relationship issues addiction and grief numerous therapies and their related techniques are described and synthesized into the llcc approach while case studies skills and tips for everyday practice make it a practical and user friendly resource listening learning caring and counselling is essential reading for counsellors support workers case workers medical practitioners health professionals from physiotherapists pharmacists doctors dentists and their assistants to nutritionists and naturopaths serious life coaches and emergency workers as well as those in the fields of human resources

GeNeDis 2022 2023-09-16

as it is well known fact that in the fast changing world of today the role of the teacher assumes special significance since teacher is instrumental more than anybody else in helping the younger generation to imbibe the right values skills and attitude necessary to cope with the world of tomorrow the role of the teacher in the educational process is always challenging and dynamic so he must be fit by body mind and soul the success of education process depends much more upon the character and ability of teachers teacher must have right attitude to impart proper education according to ideas and ideologies of community and nation it is possible when a teacher has involvement and satisfaction in their job

Occupational Health Psychology: From Burnout to Well-being at Work 2022-06-28

this book describes validated outcome measures for the international spinal cord injury population based on rigorous systematic reviews of ca 80 000 scientific articles the authors present assessment tools for various clinical uses in the health sciences following parameters of validity reliability and responsiveness it is important for the development of clinical practice and research that practical and appropriate measures become universally

accepted this would allow comparisons and meta analysis of high quality randomized controlled trials of people with this increasingly common injury this book emphasizes the need for consensus among researchers as to which tools must be studied in depth or adapted to other national contexts or which measurement instruments should be standardized in order to develop universal norms and standards for the performance of people with spinal cord injury it offers a valuable practical guide for clinicians rehabilitation professionals and nurses but will also help researchers to gain more confidence in using valid and reliable assessment tools for comparable clinical trials
