before we start configuring all of the main areas of dynamics ax like human resources sales general ledger etc we need to pause for a little bit and configure the parent organization details a lot of the information that we will be configuring here is used throughout the system and it s a good idea to get this out of the way before we move on to the real application the following guide will step you through the bare necessities that you will need to configure within the organization administration area of dynamics ax so the rest of your journey through the application is smooth sailing

Developing SSRS Reports for Dynamics AX

when you are first introduced to dynamics ax it may seem a little overwhelming because there is so much that it is able to do it may seem like you ve been dropped in a completely foreign land unable to speak the language and not knowing which direction to start walking in it may be even worse if you are in the middle of a software selection where you are looking at a number of different options including dynamics ax because you need to understand what the differences are and also remember which feature applies to which application in that case you are in multiple foreign lands and no one is speaking the same language you may have picked up a book or two on dynamics ax to start your self guided learning but even then it may be too much because they usually assume that you have had some

familiarity with the system and you still don't have a basic foundation knowledge rather than wanting to read lord of the rings you are at more of a see spot run level when it comes to dynamics ax this is what this book is designed to achieve and is aimed to give you a high level introduction to dynamics ax it is split into two parts as well the first is a general overview of the system showing you all of the usability features and the second part is a functional overview that highlights all of the functional features within dynamics ax in essence it teaches you the language of this new land and also gives you a map of the land so that you can then start heading in the direction that is important to you hopefully this will help you quickly get comfortable with dynamics ax and get you on the right track
