Building Fiction 2014-09-07 from the preface the object of this book is to state as clearly as may be just what the modern short story is and to enumerate and expound the principles underlying the most typical examples of this distinctive kind of fiction an experience of several years as a teacher of college classes in short story writing convinced me that in the case of my own students i could

secure better results by the use of a textbook different in type from any of those available some of the existing works on the subject treat in elaborate detail the development of the short story from the time of the narratives of the egyptian papyri others confuse the student by discussing at too great length many related forms of merely short fiction in regard to other more or less admirable texts i have only to say that my method differs from that laid down in any of them in teaching the writing of the short story i have thought it best to hold to the strictly modern form and to leave the history of its evolution as matter for a separate and distinct course of study i soon became convinced that i should have to make a restatement of what is known about the short story in the order which experience taught me was most serviceable from the teacher s point of view when this conviction came to me i found myself too closely occupied with other imperative duties to undertake such a work it was my good fortune to be able to turn at this time to one of my former students miss lucy lilian notestein a graduate of the university of wooster she brought to the work a broad and thorough knowledge of the subject an enthusiastic devotion and a carefulness of detail which i myself could scarcely have summoned thus it is that although the idea of this book originated with me the actual work has all been done by miss notestein together we have agreed upon the plan and the contents of the volume and together we have read it in proof it will be noticed that in the main the text is based upon a few modern short stories which have earned for themselves an established place in literature we have felt that it is a distinct gain to illustrate all points by reference to these few examples teachers may require students to become thoroughly familiar with the stories herein referred to and students will find a distinct gain in power in actually mastering these specimens moreover the principles underlying these short stories will be found to be the principles underlying all good short stories although in the preparation of this book many hundreds of stories have been read we have refrained from burdening the text with titles the restriction of examples is a part of our method those who desire histories of the short story may select from a number on the market bibliographies of the subject are now easily accessible we have therefore burdened this volume with neither history nor bibliography we have made an effort to hold to the original purpose to set forth a study of the short story in its typical modern form we have consulted at first hand all the published literature bearing upon this fictional form and have used it as best suited our purpose we have tried to indicate in all cases direct indebtedness to previous writers on the same subject
