this book offers a new contribution to the debate concerning the acquisition of the syntax discourse interface it provides evidence that children acquiring european portuguese have a very early ability to spontaneously produce vp ellipsis as answers to yes no questions it is also argued that the distribution of vp ellipsis in european portuguese including its co existence with null complement anaphora supports the hypothesis that the identification condition on ellipsis is derivable from some innate knowledge of the syntax discourse interface answers to yes no questions also provide evidence concerning children s interpretation of questions containing a cleft or the operator só only the analysis of spontaneous production is complemented by a comprehension experiment showing that children have two problems in the interpretation of these questions i they do not understand that the cleft and só introduce a presupposition and ii they start with a default focus assignment strategy and may not access other focus interpretations

the answers all of them and no b s sounds like a pretty pompous statement but when you consider it this book proves that the bible is the only perfect written composition consisting of sixty six books written by many different men inspired by god over a period of thousands of years that proves god is real using mathematics and fulfilled prophecy that he is the one who created heaven and earth and that there is no such thing as the big bang which science keeps on trying to sell to everybody it may be something of an understatement not many books offer true life changing information as does this one open your mind and heart and allow the lord god almighty to reveal himself to you become a new person by the power of the blood of jesus go ahead open the book read it you ll be glad you did
