Politics of Oil and Nuclear Technology in Iran 2013-04-10 some so called authorities claim that muslims came to america hundreds of years before columbus arrived in the new world are the claims true columbus expedition represents the first major discovery of the americas and the first appearance of non native americans the conventional wisdom is that columbus ended tens of thousands of years of near total isolation for the native americans since the americas had been initially populated probably between 13 000 bc and 11 000 bc there had been no engagement with peoples from any other continent save small ventures by the norse into northeastern canada did muslims come to the americas possibly as early as the 700s these researchers argue that muslims came from islamic spain particularly the port of delba pelos during the rule of caliph abdullah ibn mohammed 888 912 a muslim historian abul hassan al masudi c 895 957 added a map of the world to his book one that contained a large area in the ocean of darkness and fog the atlantic ocean which he referred to as the unknown territory the americas this book demonstrates that this assertion is important for muslims because in conjunction with the relevant verses from the koran and quotes from mohammed it establishes the claim of muslims that allah intended america to be islamic the book also investigates the lives of selected muslims in america and organizations from the eighteenth century into the twenty first century it reveals that there was nothing more than a continuation of typical islamic deception and subversive jihad it also documents the lie of the islamic claim that hundreds of place names in the united states of america and canada derive from arabic islamic roots finally the book exposes the rewriting of american history by islamic and pro islamic media this book is alarming informative interesting and true
