1510 Charlotte Lowrie's indispensable guide to taking the best possible pictures with the Canon EOS 50D goes well beyond the basics with this essential guide to getting great shots with the Canon EOS 50D camera. Professional photographer and bestselling author Charlotte Lowrie packs this portable guide with over 290 pages of beautiful full-color photos, proven techniques, and no-fail formulas for tapping all the features this exciting new high-resolution DSLR camera offers. Get to know your Canon EOS 50D, learn all the tricks, and then take this handy portable guide with you in the field for quick and easy reference. Master your Canon EOS 50D camera with expert guidance from Seattle area professional photographer and popular author Charlotte Lowrie. Find pages of step-by-step techniques and professional tips that will help you understand all the functions, menus, and dials on your camera. Explore topics that many competitive digital SLR books just touch on, including step-by-step instruction on exposure and composition, learn professional composition and lighting tricks, examine full-color examples of breathtaking ways to capture stills, portraits, and action shots. Canon EOS 50D Digital Field Guide is the latest in the bestselling Digital Field Guide series that has taught thousands of photographers and beginners how to get the most out of their digital cameras.

Now that you've bought the amazing Canon 50D, you need a book that goes beyond a tour of the camera's features to show you exactly how to use the 50D to take great pictures with Canon 50D. From snapshots to great shots, you get the perfect blend of photography instruction and camera reference that will take your images to the next level. Beautifully illustrated with large, vibrant photos, this book teaches you how to take control of your photography to get the image you want every time you pick up the camera. Follow along with your friendly and knowledgeable guide, photographer and author Jeff Revell, and you will learn the top ten things you need to know about shooting with the 50D. Use the 50D's automatic modes to get better shots right away. Move on to the creative zone where you have full control over the look and feel of your images. Master the photographic basics of composition, focus, depth of field, and much more. Learn all the best tricks and techniques for getting great action shots, landscapes, and portraits. Find out how to get great shots in low light, fully grasp all the concepts and techniques as you go with assignments at the end of every chapter. With Canon 50D from snapshots to great shots, you'll learn not only what makes a great shot work, you'll learn how to get that shot using your 50D. And once you've got the shot, show it off! Join the book's Flickr group, share your photos, and discuss how you use your 50D to get great shots at Flickr.com groups. Canon 50D from snapshots to great shots.

Build and deploy intelligent applications for natural language processing with Python by using industry standard tools and recently popular methods in deep learning. Key features: a no-math code-driven programmer's guide to text processing and NLP; get state-of-the-art results with modern tooling across linguistics, text vectors, and machine learning; fundamentals of NLP methods from Spacy, Gensim, Scikit-Learn, and Pytorch; book description: NLP in Python is among the most sought-after skills among data scientists with code and relevant case studies. This book will show how you can use industry-grade tools to implement NLP programs capable of learning from relevant data. We will explore many modern methods ranging from Spacy to word vectors that have reinvented NLP. The book takes you from the basics of NLP to building text processing applications. We start with an introduction to the basic vocabulary along with a workflow for building NLP applications. We use industry-grade NLP tools for cleaning and pre-processing text, automatic question and answer generation using linguistics, text embedding, text classifier, and building a chatbot. With each project, you will learn a new concept of NLP. You will learn about entity recognition, part of speech tagging, and dependency parsing for Q and A. We use text embedding for both clustering documents and making chatbots, and then build classifiers using Scikit-Learn. We conclude by deploying these models as REST APIs with Flask. By the end, you will be confident building NLP applications and know exactly what to look for when approaching new challenges. What you will learn: understand classical linguistics in using English grammar for automatically generating questions and answers from a free text corpus; work with text embedding models for dense number representations of words, subwords, and characters in the English language; for exploring document clustering; deep learning in NLP using PyTorch with a code-driven introduction to PyTorch; using an NLP project management framework for estimating timelines and organizing your project into stages; hack and build a simple chatbot application in 30 minutes; deploy an NLP or machine learning application using Flask as RESTful APIs. Who this book is for: programmers who wish to build systems that can interpret language. Exposure to Python programming is required. Familiarity with NLP or machine learning vocabulary will be helpful but not mandatory.
