## **The ISM Code: A Practical Guide to the Legal and Insurance Implications 2015-06-16**

the ism code has been mandatory for almost every commercial vessel in the world for more than a decade and nearly two decades for high risk vessels yet there is very little case law in this area consequently there remains a great deal of confusion about the potential legal and insurance implications of the code this third edition represents a major re write and addresses significant amendments that were made to the ism code on 1st july 2010 and 1st january 2015 this book provides practitioners with a practical overview of and much needed guidance on the potential implications of failing to implement the requirements of the code it will be hugely valuable to dpas managers of ship operating companies ship masters maritime lawyers and insurance claims staff

## **Marine Simulation and Ship Manoeuvrability 2021-10-01**

real time interactive ship simulators limped onto the scene in the wake of flight simulators some years ago the maritime industries have a long history of conservatism but this is now changing rapidly the information age has also swept over ships and shipping and has been taken to heart to such an extent that for example flight simulators now cooperate with ship simulators and import useful new concepts and methodologies the more than 50 papers contained in this book show what and why although traditionally conservative the marine world is also traditionally international and this has not changed the papers in the book are by leading authors from all over the world and provide a detailed

snap shot of the rapidly advancing state of the art together with pointers to the future the overall theme of marsim 96 and therefore also of this book is vessel manouevrability and marine simulation research training and assessment and includes original papers on topics such as bridge resource management distant learning and simulators coupled via the internet virtual reality neural networks rudder propeller hydrodynamics prime mover models squat in shallow water and many more

## **Commercial Shipping Handbook 2014-08-27**

the commercial shipping handbook is an invaluable reference tool for anyone involved in international trade and a first step towards understanding the framework within which the international movement of goods by sea is conducted the handbook gives concise explanations of the many activities that comprise shipping explaining the terms and how they interrelate areas covered include documents used in international transport by sea e g the bill of lading and the charter party what they contain the different types and examples of each generic types of ships cargoes containers and ports details of all the major maritime associations prominent in contract drafting and policy making together with a brief explanation of their objectives the many extra costs and surcharges found in shipping particularly in liner shipping chartering terms an explanation of each and their context clauses appearing in bills of lading in voyage charters and time charters technical elements of shipping as they relate to the commercial operation of ships for example tides and draughts examples of principal documents discussing over 1250 commercial shipping terms this book will be an essential reference for all shipowners charterers managers and brokers and will also be of use to legal insurance and banking professionals

## **Handbook for Engine Officers 2013-06-04**

the transnav 2013 symposium held at the gdynia maritime university poland in june 2013 has brought together a wide range of participants from all over the world the program has offered a variety of contributions allowing to look at many aspects of the navigational safety from various different points of view topics presented and discussed at the symposium were navigation safety at sea sea transportation education of navigators and simulator based training sea traffic engineering ship s manoeuvrability integrated systems electronic charts systems satellite radio navigation and anti collision systems and many others this book is part of a series of four volumes and provides an overview of education and training human resources and crew resource management policy and economics and is addressed to scientists and professionals involved in research and development of navigation safety of navigation and sea transportation

## **Marine Navigation and Safety of Sea Transportation 2023-09-14**

a no nonsense study guide helping seafarers to pass their mca or flag state oral exams for deck officer qualifications this handy revision guide is the one book that deck officer cadets master and deck officers will want by their side when studying for the much feared oral exams expert marine training director simon jinks strips back the masses of information to the core essential points that are easy to absorb and quick to remember when it comes to the oral assessment the mca deck officer

officer of the watch chief mate and master syllabi cover a vast amount of information that candidates are required to understand and use in their oral exam which for many presents a major stumbling block to qualification while it inevitably takes a long time for candidates to build up this wealth of knowledge this study aid is the perfect refresher listing the key points and including helpful sample questions and worked examples on tidal working radar plotting and more written in simple terms this trusted crammer covers all the principal areas of the mca s exam syllabus including sections on business and law conventions pollution prevention responses to emergencies and distress signals clearly presented it is packed with straightforward diagrams and flow charts making it ideal for revising this is an invaluable reference for all international stcw deck officer candidates and covers both mca and flag state oral exams it is also suitable for near coastal and boatmaster apprentices workboat crew apprentices yachtmaster offshores yachtmaster instructors and fishermen going for their fishing licences on larger vessels and for shore workers such as vessel superintendents maritime managers and trainers there is specific information for all vessels with sections on smaller code and domestic vessels

## **Reeds Marine Deck 2: Crammer for Deck Officer Oral Exams** **2013-12**

interest in autonomous ships has grown exponentially over the past few years whereas a few years ago the prospect of unmanned and autonomous vessels sailing on the seas was considered unrealistic the debate now centers on when and in what format and pace the development will take place law

has a key role to play in this development and legal obstacles are often singled out as principal barriers to the rapid introduction of new technologies in shipping within a few years autonomous ships have turned from a non issue to one of the main regulatory topics being addressed by the international maritime organization however the regulatory discussion is still in its infancy and while many new questions have been raised few answers have been provided to them to date increased automation of tasks that have traditionally been undertaken by ships crews raises interesting legal questions across the whole spectrum of maritime law the first of its kind this book explores the issue of autonomous ships from a wide range of legal perspectives including both private law and public law at international and national level making available cutting edge research which will be of significant interest to researchers in maritime law chapter 3 of this book is freely available as a downloadable open access pdf at taylorfrancis com under a creative commons attribution non commercial cc by nc 4 0 license

## **Federal Register 2008**

first modern title to cover the varied and complex world of ship management in the 21st century

## **Le convenzioni internazionali della navigazione marittima, interna e aerea 2020-12-02**

the importance of international maritime labour law both as a component of international maritime law

and in socio political and economic terms has been recognised by the imo international maritime law institute for a number of years indeed the institute has annually organised a course on maritime labour law with the participation of inter alia the international maritime organization the ternational labour organization the international transport workers federation and the german shipowners association it was therefore a great pleasure when the authors invited me to introduce their forthcoming monograph on maritime work law fundamentals responsible s powners reliable seafarers as the title suggests a fundamental challenge of this branch of international maritime law is to achieve a balance between the interests of the two main stakeholders institutionally the effort to achieve this balance dates back a number of decades with its genesis mainly found in the work of the international labour organization it has to be said that whilst this effort achieved great progress it has led to a haphazard plethora of legal instruments

## **Autonomous Ships and the Law 2014-05-08**

this book is of the seafarers by the seafarers for the seafarers seafarers are the core of all maritime trade and their expectations perspectives alone should be at the centre of all solutions for maritime skills taking this standpoint the editor has explored the issues of maritime skills with critical gaps following a framework of research methodology the issue of critical gaps in maritime skills is further exacerbated due to the impact on seafarers caused by changes in the ecosystem status relationship with stakeholders technology focus on renewable energy anxiety levels and so forth furthermore stakeholders can no longer ignore the fact that seafarers are leaving a seagoing career after working for only a few years therefore the editor has also explored the need to prepare seafarers for transition

into maritime shore jobs to preserve their maritime skills within the maritime industry this exhaustive book can be used as a guide for further revisions or a revamp of the current stcw convention the editor thereafter divided the researched critical gaps in maritime skills into four groups jain s model for maritime skills panoptic social intelligence upskilling reskilling for onboard vessels skills and portable skills for future shore jobs panoptic and social skills are core skills required for both on board vessels as well for maritime shore jobs thereafter the editor embarked on a voyage to discover persuade collaborate with a number of exceptionally experienced subject matter experts over many months to collaboratively pursue many mini research projects across all selected maritime skills adopting specific methodology to plug these critical gaps these experts were drawn 1 from countries such as india the philippines romania south korea malaysia uae the uk and singapore 2 from both genders 3 from deck engine professionals settled ashore 4 with current experience in the industry and or at sea at a fundamental level and 5 from seafaring supplying nations recognising experiencing the relevant socio economic circumstances of seafarers from this book seafarers will not only find ideas on how to plug gaps in their maritime skills but also how they can transition with their existing skills to other maritime jobs such as marine superintendents marine managers designated persons ashore managers supervising new build second hand vessels it managers in the maritime domain marine surveyors marine experts investigators marine pilots in ports maritime arbitrators managers in shipyards and so forth the solutions in this book will also resolve the issue of the shortage and retention of seafarers

## **Reeds 21st Century Ship Management 2007-10-18**

this book belongs to the port economics and global supply chain management strand of the palgrave studies in maritime economics book series commissioned by hercules haralambides this book discusses the main drivers that affect the introduction and growth of short sea shipping services it describes and analyses the main operational concepts of short sea shipping and introduces relevant administrative and strategic approaches that enable its sustainable execution short sea shipping sss comprises freight and passenger mobility by waterborne transport at a limited range without crossing an ocean being a direct competitor to land based transport modes it uses ports and inland waterways to complement traditional transportation systems increase capacity improve flexibility and contribute towards the goal of sustainable mobility the reader will be introduced to various aspects of short sea shipping including benefits and shortfalls relevant regulations and policies and the applicability of short sea services within a given case or scenario

## **Maritime Work Law Fundamentals: Responsible Shipowners, Reliable Seafarers 2023-07-11**

over 2 300 total pages titles included marine safety manual volume i administration and management marine safety manual volume ii materiel inspection marine safety manual volume iii marine industry personnel

## ***Maritime Skills on Vessels & Shore - The STCW Convention's Relevance & Recommendations 2018-11-19***

this volume brings together multiple perspectives on both the changing arctic environment and the challenges and opportunities it presents for the shipping sector it argues for the adoption of a forward looking agenda that respects the fragile and changing arctic frontier with the accelerated interest in and potential for new maritime trade routes commercial transportation and natural resource development the pressures on the changing arctic marine environment will only increase the international maritime organization polar code is an important step toward arctic stewardship this new volume serves as an important guide to this rapidly developing agenda addressing a range of aspects it offers a valuable resource for academics practitioners environmentalists and affected authorities in the shipping industry alike

## ***Handbook for Deck Officers 2018-08-11***

now in its 14th year the nilos documentary yearbook provides the reader with an excellent collection of documents related to ocean affairs and the law of the sea issued each year by organizations organs and bodies of the united nations system documents of the un general assembly meeting of state parties to the 1982 un law of the sea convention clcs isba itlos follow up to the un straddling fish stocks and small island states conferences panama canal ecosoc unep and unctad are included first followed by the documents of fao iaea imo unesco ioc as in the previous volumes documents which

were issued in the course of 1998 are reproduced while other relevant documents are listed the nilos documentary yearbook has proved to be of invaluable assistance in facilitating access by the community of scholars and practitioners in ocean affairs and the law of the sea to essential documentation the entry of the 1992 un law of the sea convention into force on 16th november 1994 and of the part xi agreement on 28 july 1996 and progress in the implementation of chapter 17 of agenda 21 make continuation of this assistance of particular significance in the years to come volume 14 contains special report by editor in chief barbara kwiatkowska on the law of the sea related cases in the international court of justice during the presidency of judge stephen m schwebel 1997 2000 it explores the unique role of the icj as the principal judicial organ of the united nations in the development of ocean affairs and the law of the sea in the context of an ongoing follow up to the overall review and appraisal of the unced agenda 21 the members of the yearbook s advisory board are judges abdul koroma and shigeru oda of the icj judges thomas mensah dolliver nelson and tullio treves of the itlos as well as rosalie balkin edward brown lee kimball bernard oxman and shabtai rosenne

## **The Dynamics of Short Sea Shipping 2021-08-04**

shipboard management supports students undertaking qualification at all stages of maritime training enhancing and developing knowledge and understanding of the key issues in the merchant shipping training and certification regulations 1997 as subsequently amended by the 2015 regulations and other legislation informed by real world experience of commercial shipboard operations shipboard management offers an essential study guide addressing the issues which are most frequently

confronted in the context of ship management it is designed to foster the ability to analyse and apply the dynamics of the legal and operational structures in which the shipboard management team must engage in merchant vessel operations students will progress through increasingly difficult levels of learning activity in order to develop problem solving abilities the text focuses on the application of skills and techniques that are fundamental to commercial shipping and that meet the demands of the merchant shipping standards of training certification and watchkeeping regulations this will be essential reading for all students and candidates on mca accredited deck training courses and for seafarers wishing to apply for certificates of equivalent competency it is also a key reference for professionals in ship owning and management companies and for maritime lawyers

## ***Manuals Combined: U.S. Coast Guard Marine Safety Manual Volumes I, II and III 2024-04-08***

the transnav 2011 symposium held at the gdynia maritime university poland in june 2011 has brought together a wide range of participants from all over the world the program has offered a variety of contributions allowing to look at many aspects of the navigational safety from various different points of view topics presented and discussed at the symposium were navigation safety at sea sea transportation education of navigators and simulator based training sea traffic engineering ship s manoeuvrability integrated systems electronic charts systems satellite radio navigation and anti collision systems and many others this book is part of a series of six volumes and provides an overview of human resources and crew resource management and is addressed to scientists and

professionals involved in research and development of navigation safety of navigation and sea transportation

## **Sustainable Shipping in a Changing Arctic 2016-08-12**

the polar north is known to be home to large gas and oil reserves and its position holds significant trading and military advantages yet the maritime boundaries of the region remain ill defined in the twenty first century the arctic is undergoing profound change as the sea ice melts a result of accelerating climate change global governance has become vital in this first of three volumes the latest research and analysis from the Fridtjof Nansen Institute the world's leading arctic research body is brought together arctic governance law and politics investigates the legal and political order of the polar north focusing on governance structures and the law of the sea are the current mechanisms at work effective are the arctic states interests really clashing or is the atmosphere of a more cooperative nature skilfully delineating policy in the region and analysing the consequences of treaty agreements arctic governance's uncovering of a rather orderly arctic race will become an indispensable contribution to contemporary international relations concerning the polar north

## **International Organizations and the Law of the Sea 1998** **2017-10-03**

the code comprises two parts mandatory standards regarding provisions of the annex to the

convention and recommended guidance regarding provisions of the stcw convention and its annex

## ***Shipboard Management 1996***

since it was first published in 1964 elements of shipping has become established as a market leader now in its ninth edition branch s elements of shipping renamed in memory of alan branch has been updated throughout and revised to take in the many changes that have occurred in the shipping industry in recent years including the impact of the economic crisis the panama canal expansion and new legislation all tables and data have been brought up to date and many new illustrations have been added the book explains in a lucid professional manner the basic elements of shipping including operational commercial legal economic technical managerial logistical and financial considerations it also explores how shipping markets behave and provides an overview of the international shipping industry and seaports filling a gap for the discerning reader who wishes to have a complete understanding of all the elements of the global shipping scene together with the interface with seaports international trade and logistics it remains essential reading for shipping executives along with students and academics with an interest in the shipping industry

## **Human Resources and Crew Resource Management 2014-10-03**

this book explores the opportunities and challenges that both europe and asia face under the

framework of the 21st century maritime silk road initiative the 21st century maritime silk road initiative msr initiative put forward by the chinese government together with the silk road economic belt reflects china s ambition and vision to shape the global economic and political order the first step and priority under the msr initiative according to documents issued by china is to build three blue economic passages linking china with the rest of the world at sea two of which will connect china with europe this initiative however still faces enormous challenges of geopolitical suspicion and security risks this book seeks to assess these risks and their causes for the cooperation between the eurasian countries under the framework of msr and puts forward suggestions to deal with these risks in the interdisciplinary perspectives of international relations and international law featuring a global team of contributors this book will be of much interest to students of asian politics maritime security international law and international relations

## **Arctic Governance: Volume 1 2019-07-09**

international law and politics of the arctic ocean essays in honor of donat pharand is a collection of essays in honor of professor emeritus donat pharand by leading arctic experts from around the globe the volume offers a clear concise and detailed analysis of many of the issues an expanded use of the arctic ocean raises and of critical importance for the legal and political processes unfolding in the arctic region

## ***STCW 95 2015-03-20***

international marine economy offers contributions from marine experts around the globe on the economic impacts of recent developments in international waters

## **Branch's Elements of Shipping 1999**

this study gives an overview of the obligations of flag states and the control of their compliance with such obligations it outlines the main obligations as to maritime safety and security as well as marine pollution prevention under international as well as european law and shows the still existing enforcement deficits vis a vis non complying flag states as well as substandard ships some of the main developments to counter these deficits such as the voluntary member state audit scheme on the imo level or the third maritime safety package on the eu level are taken into account

## **The 21st Century Maritime Silk Road 2017-04-10**

first published in 2005 routledge is an imprint of taylor francis an informa company

## **International Law and Politics of the Arctic Ocean 1998**

unmanned ships and autonomous ships are quickly becoming a reality making shipping safer and

more efficient however traditional tasks and functions are becoming blurred as new technology changes how the unique needs of different sectors are met in addition to large vessels dedicated to the transport of goods and cargos across the oceans major efforts are underway towards the automation of small coastal shipping that includes ferries tugboats supply and service vessels and barges automated vehicles are also replacing conventional ships for inspecting and servicing pipelines drilling platforms wind farms and other offshore installations automated shipping is explored in terms of economics technology safety and the environment under the broad themes of ship design and engineering command and control navigation communications security regulatory issues and training this includes initiatives for autonomous shipping as well as civilian implications of military ship automation programs this book is primarily for maritime professionals regulatory authorities insurers and environmental groups it also suits undergraduate students involved in deck officer training and graduate students and academics involved in research in ship design operations and management
