The Complete Guide to Alternative Investments from Experts Working with CFA Institute

Alternative Investments is the definitive guide to understanding non-traditional asset classes. Alternatives are a disparate group of investments that are distinguished from long-only publicly traded investments in stocks, bonds, and cash, often referred to as traditional investments. Alternative investments include real estate, commodities, infrastructure, and other non-traditional investments such as private equity or debt and hedge funds. They are attractive to investors because of the potential for portfolio diversification, resulting in a higher risk-adjusted return for the portfolio.

Alternative Investments and Its Accompanying Workbook

Sold separately, Lead Students and Investment Professionals through the many characteristics of non-traditional assets, including narrow specialization of the investment managers, relatively low correlation of returns with those of traditional investments, less regulation and less transparency than traditional investments, limited historical risk and return data, unique legal and tax considerations, higher fees (often including performance or incentive fees), concentrated portfolios, restrictions on redemptions (i.e., lockups and gates).

CFA Institute is the world's premier association for investment professionals and the governing body for the CFA program, CIPM program, CFA Institute ESG Investing Certificate, and Investment Foundations program. Those seeking a deeper understanding of the markets, mechanisms, and use of alternatives will value the level of expertise CFA Institute brings to the discussion, providing a clear, comprehensive resource for students and professionals alike, whether used alone or in conjunction with the companion workbook.

Alternative Investments offers a complete course in alternative

investments and their role in investment management the envisioned volume is a collection of recent essays about the philosophical exploration critique and comparison of a the major philosophical models of god gods and other ultimate realities implicit in the world s philosophical schools and religions and of b the ideas of such models and doing such modeling per se the aim is to identify exactly what a model of ultimate reality is create a comprehensive and accessible collection of extant models and determine how best philosophically to model ultimate reality if possible and desirable an analysis of more than 1000 reports on unproven disproven controversial fraudulent quack and or otherwise questionable approaches to solving health problems one century after gustav landauer s death in a time marked by a deep doubt concerning modern politics the volume proposes a fascinating overview of the articulation between skepsis and antipolitics in his multifaceted unconventional anarchism
