this book explores aspects of the social and cultural history of nuclear britain in the cold war era 1945 1991 and contributes to a more multivalent exploration of the consequences of nuclear choices which are too often left unacknowledged by historians of post war

Britain in the years after 1945 the British government mobilised money scientific knowledge people and military industrial capacity to create both an independent nuclear deterrent and the generation of electricity through nuclear reactors this expensive and vast technological project mostly top secret and run by small sub committees within government was central to broader cold war strategy and policy recent attempts to map the resulting social and cultural history of these military industrial policy decisions suggest that nuclear mobilisation had far reaching consequences for British life the chapters in this book were originally published as a special issue of contemporary British history

we tend to think of coal mining as predominantly a male occupation with women confined to roles as wives and support workers women worked at the coal face for many years before they were banned in 1842 however mere legislation was not going to stop them many continued to work underground with mine owners making little attempt to stop them due to the low wages paid to women some would dress and pass as men to fool visiting inspectors for the majority though they worked on the pit brow where they received the coal cleaned sorted and cut it to uniform size dirty laborious work including many accidents and deaths done by women and girls some as young as 10 years old society was appalled and harshly criticized women but not men for working in such environments and so close to male workers find a respectable job like domestic service they were told despite the fact that few jobs for women were available in such industrialized areas like the more famous pit brow lasses of lancashire the tip girls were

castigated for having unsexed themselves accused of immorality of being unfit wives and mothers and society went on a mission to save them but the tip girls did not want to be saved for nearly a hundred years these women fought society and parliament to keep their jobs and clear their reputations norena shopland tells their story for the first time new research from census returns and newspaper accounts have uncovered over 1 500 named women who worked in the welsh coalfields only a few could be included in this book but it shows how much more work is needed in order for us to continue to celebrate these remarkable women
