broadcasting pluralism and diversity is a study of the policy and regulatory measures relating to the promotion of media diversity in three jurisdictions the united kingdom the united states and australia a central focus of the book is regulation of media ownership and control and taking an historical approach the book argues that early policy and regulatory decisions continue to have a significant influence on current reforms whilst policy and reform debates focus on ownership and control measures the book also argues that such measures can not be considered in isolation from other regulatory instruments and that a holistic regulatory approach is required as such content regulation and competition regulation are also considered underlying the study is the contention that much of the policy making reference pluralism and diversity regulation although making reference to the importance of the media role in the towns and villages process has also been skewed by a futile focus in any part of the different regulatory treatment of the press and broadcasting tools for community planning

contents and effects of enforcement titles it offers a comprehensive overview of judgments court settlements and authentic instruments from a variety of eu member states it primarily employs the comparative legal method to draw conclusions on commonalities and differences as well as prospects for future approximation of laws the premise of the research is rooted in the finding that national authorities of eu member states continue to treat enforcement titles from other member states with reservations and mistrust despite being committed to the principle of mutual trust the book identifies the issues of mistrust stemming from the diversity of enforcement titles the research is based on a rich database of national reports compiled during the course of several large scale eu justice projects divided into five parts the book offers first some general considerations and presents attempts at a systemisation of enforcement titles the following parts are then devoted to more specialised approaches toward the different types of enforcement titles however the connecting line between all parts of the book are the considerations of cross border enforcement in the eu and in a limited manner with third states herein research also addresses critical factors regarding the free movement of judgments in the eu including those of lis pendens and related actions this book provides a valuable contribution to the theory of european civil procedure since it is based on a comparative approach and employs both empirical and doctrinal viewpoints it should also greatly benefit practitioners involved in cross border dispute resolution overall the findings should be of interest to a broad audience including policymakers judges practitioners and scholars
