this book argues that media and capitalism no longer exist as separated entities and posits three reasons why one can no longer exist without the other firstly mass media have become indispensable to capitalism due to the media s ability to sell the commodities of mass consumerism media capitalism also creates pro capital attitudes among a target population and establishes an ideological hegemony thirdly media capitalism provides mass deception to hide the pathologies of capitalism which include mass poverty rising inequalities and the acceleration of global warming to illuminate this the book s historical chapter traces the emergence of media capitalism its subsequent chapters show how media capitalism has infiltrated the public sphere society schools universities the world of work and finally democracy the book concludes by outlining how societies can transition from media capitalism to a post media capitalist society

colin sparks provides a challenging reassessment of the impact of the collapse of communism on the media systems of eastern europe he analyzes both the changes themselves and their implications for the ways in which we think about the mass media while also demonstrating that most of the orthodox accounts of the end of communism are seriously flawed there are much greater continuities between the old system and the new than are captured by the theories that argue that there has been a radical and fundamental change instead of marking the end of critical inquiry or the end of history as some have suggested sparks argues that the collapse of the communist systems demonstrates how very limited and frequently incorrect the main ways of discussing the mass media are he concludes with a provocative discussion of the ways in which we need to modify our thinking in the light of these developments

joseph schumpeter oscillated in his view about the type of economic system that was most conducive to growth in his 1911 treatise schumpeter argued that a more decentralized and turbulent industry structure where the process of creative destruction was triggered by vigorous entrepreneurial activity was the engine of economic growth but by 1942 schumpeter had modified his theory arguing instead that a more centralized and stable industry structure was more conducive to growth according to schumpeter 1942 p 132 under

the managed economy there was little room for entrepreneurship because innovation itself is being reduced to routine technological progress is increasingly becoming the business of teams of trained specialists who turn out what is required to make it work in predictable ways p 132 schumpeter 1942 reversed his earlier view by arguing that the integration of knowledge creation and appropriation be stowed an inherent innovative advantage upon giant corporations since capitalist enterprise by its very achievements tends to automate progress we conclude that it tends to make itself superfluous to break to pieces under the pressure of its own success

the book provides a theoretically and historically informed analysis of the global economic crisis it makes original contributions to theories of value of crisis and of the state and uses these to develop a rich empirical study of the changing character of capitalism in the twentieth century and beyond it defends uses and develops marxist theory while arguing particularly against jumping too quickly from abstract concepts to a concrete understanding of the crisis instead it uses what marx described in his notebooks as an obvious analytical ordering to progress from a general analysis of economy and society to a discussion of recent economic transformations and the specifics of the crisis and its aftermath dunn argues that appropriately reconceived a critical marxism can incorporate and enrich rather than rejecting insights from other traditions he disputes general characterisations of capitalism to the crisis and theories which see finance and the contemporary financial crises as largely detached from other aspects of the economy and society providing a thoroughly socialised and historically based account this book will be vital reading for students and scholars of political economy international political economy marxism sociology geography and development studies

born in italy university of chicago economist luigi zingales witnessed firsthand the consequences of high inflation and unemployment paired with rampant nepotism and cronyism on a country s economy this experience profoundly shaped his professional interests and in 1988 he arrived in the united states armed with a political passion and the belief that economists should not merely interpret the world but should change it for the better in a capitalism for the people zingales makes a forceful philosophical and at times personal argument that the roots of american capitalism are dying and that the result is a drift toward the more corrupt systems found throughout europe and much of the rest of the world american capitalism according to zingales grew in a unique incubator that provided it with a distinct flavor of competitiveness a meritocratic nature that fostered trust in markets and a faith in mobility lately however that trust has been eroded by a betrayal of our pro business elites whose lobbying has come to dictate the market rather than be subject to it and this

betrayal has taken place with the complicity of our intellectual class because of this trend much of the country is questioning often with great anger whether the system that has for so long buoyed their hopes has now betrayed them once and for all what we are left with is either anti market pitchfork populism or pro business technocratic insularity neither of these options presents a way to preserve what the author calls the lighthouse of american capitalism zingales argues that the way forward is pro market populism a fostering of truly free and open competition for the good of the people not for the good of big business drawing on the historical record of american populism at the turn of the twentieth century zingales illustrates how our current circumstances aren t all that different people in the middle and at the bottom are getting squeezed while people at the top are only growing richer the solutions now as then are reforms to economic policy that level the playing field reforms that may be anti business specifically anti big business but are squarely pro market the question is whether we can once again muster the courage to confront the powers that be
