unsuccessful 1960s television production star trek the original series in star trek and american television pearson and messenger davies take their cue from the words of the program s first captain william shatner in an interview with the authors it s a television show in focusing on star trek as a television show the authors argue that the program has to be seen in the context of the changing economic conditions of american television throughout the more than four decades of star trek s existence as a transmedia phenomenon that includes several films as well as the various television series the book is organized into three sections dealing with firstly the context of production the history and economics of star trek from the original series 1966 1969 to its final television incarnation in enterprise 2002 2005 secondly it focuses

on the interrelationships between different levels of production and production workers drawing on uniquely original material including interviews with star captains william shatner and sir patrick stewart and with production workers ranging from set builders to executive producers to examine the tensions between commercial constraints and creative autonomy these interviews were primarily carried out in hollywood during the making of the film nemesis 2002 and the first series of star trek enterprise thirdly the authors employ textual analysis to study the narrative storyworld of the star trek television corpus and also to discuss the concept and importance of character in television drama the book is a deft historical and critical study that is bound to appeal to television and media studies scholars students and star trek fans the world over with a foreword by sir patrick stewart captain jean luc picard in star trek the next generation arising from recent developments at the international level many developing countries indigenous peoples and local communities are considering using geographical indications gis to protect traditional knowledge and to promote trade and overall economic development despite the considerable enthusiasm over gis in diverse quarters there is an appreciable lack of research on how far and in what context gis can be used as a protection model for traditional knowledge based resources this book critically examines the potential uses of geographical indications as models for protecting traditional knowledge based products and resources in national and international intellectual property legal frameworks by analysing the reception towards gis from developing countries and advocates of development in the various legal and non legal regimes including the world trade organization world intellectual property organization and the convention on biological diversity and the food and agricultural organization the book evaluates the development potential of gis in relation to ensuing changes in international intellectual property law in accommodating traditional knowledge teshager w dagne argues for a degree of balance in the approach to the implementation of global intellectual property rights in a manner that gives developing countries an opportunity to protect traditional knowledge based products the book will be of great interest and use to scholars and students of intellectual property law public international law traditional knowledge and global governance in the spirit of encouraging international dialogue between researchers and practitioners often working within isolated traditions this book discusses perspectives on science education for the gifted informed by up to date research findings from a number of related fields the book reviews philosophy culture and programmes in science education for the gifted in diverse national contexts and includes scholarly reviews of significant perspectives and up to date research methods and findings the book is written in a straightforward style for students studying international perspective modules on undergraduate but especially masters and doctoral degrees in science education and gifted education gifted education has come to be regarded as a key national programme in many countries and gifted education in science disciplines is now of major importance to economic and technological development despite these national initiatives and developments there are very few discussions on gifted education in science from international perspectives this will be a valued addition to the scholarship in this emergent field the application of biotechnology to solve the environmental problems in the environment and in the ecosystems is called environmental biotechnology it is applied and it is used to study the natural environment according to the international society for environmental biotechnology the environmental biotechnology is defined as an environment that helps to develop efficiently use and regulate the biological systems and prevent the environment from pollution or from contamination of land air and water have work efficiently to sustain an environment friendly society environmental biotechnology in particular is the application of processes for the protection and restoration of the quality of the environment environmental biotechnology can be used to detect prevent and remediate the emission of pollutants into the environment in a number of ways biotechnology stands on the understanding of molecular basis of biological cell functions and the ability of mankind to alter cell functions to make it produce products required by society new techniques available with biotechnology holds potentials for developing products and processes in various sectors of agriculture horticulture floriculture forestry animal husbandry healthcare energy generation and environmental protection this book is useful to the students pursuing advanced and specialized courses academicians researchers scientists administrators industrialists environmental lawyers rural technologists and the interested people in general molecular environmental soil science at the interfaces in the earth s critical zone presents contributions from the 1st international symposium of molecular environmental soil science at the microbiology ecology ecotoxicology and physics jianming xu is a professor at the institute of soil and water resources and environmental science zhejiang university china pan ming huang is a professor at the department of soil science university of saskatchewan canada an illuminating study that reveals the different ways social change occurs for readers of freakonomics and thinking fast and slow the new york times how does social change happen when do social movements take off sexual harassment was once something that women had to endure now a movement has risen up against it white nationalist sentiments on the other hand were largely kept out of mainstream discourse now there is no shortage of media outlets for them in this book with the help of behavioral economics psychology and other fields cass sunstein casts a bright new light on how change happens sunstein focuses on the crucial role of social norms and on their frequent collapse when norms lead people to silence themselves even an unpopular status quo can persist then one day someone challenges the norm a child who exclaims that the emperor has no clothes a woman who says me too sometimes suppressed outrage is unleashed and long standing practices fall sometimes change is more gradual as nudges help produce new and different decisions apps that count

calories texted reminders of deadlines automatic enrollment in green energy or pension plans sunstein explores what kinds of nudges are effective and shows why nudges sometimes give way to bans and mandates finally he considers social divisions social cascades and partyism when identification with a political party creates a strong bias against all members of an opposing party which can both fuel and block social change mark anthony neal s looking for leroy is an engaging and provocative analysis of the complex ways in which black masculinity has been read and misread through contemporary american popular culture neal argues that black men and boys are bound in profound ways to and by their legibility the most legible black male bodies are often rendered as criminal bodies in need of policing and containment ironically neal argues this sort of legibility brings welcome relief to white america providing easily identifiable images of black men in an era defined by shifts in racial sexual and gendered identities neal highlights the radical potential of rendering legible black male bodies those bodies that are all too real for us as illegible while simultaneously rendering illegible black male bodies those versions of black masculinity that we can t believe are real as legible in examining figures such as hip hop entrepreneur and artist jay z r b svengali r kelly the late vocalist luther vandross and characters from the hit hbo series the wire among others neal demonstrates how distinct representations of black masculinity can break the links in the public imagination that create antagonism toward black men looking for leroy features close readings of contemporary black masculinity and popular culture highlighting both the complexity and accessibility of black men and boys through visual and sonic cues within american culture media and public policy by rendering legible the illegible neal maps the range of identifications and anxieties that have marked the performance and reception of post civil rights era african american masculinity udvalgte artikler fra 1985 2005 fordelt på 8 temaer the relationship between science and science education directory provides telephone numbers and office addresses for members of the house of representatives and their staff committee members and staff and other government agencies this book examines types of resistance in contemporary poetry to the authority of scientific knowledge tracing the source of these resistances to both their literary precedents and the scientific zeitgeists that helped to produce them walpert argues that contemporary poetry offers a palimpsest of resistance using as case studies the poets alison hawthorne deming pattiann rogers albert goldbarth and joan retallack to trace the recapitulation of romantic arguments inherited from keats shelly and coleridge which in turn were produced in part in response to newtonian physics modernist arguments inherited from eliot and pound arguments influenced in part by relativity and quantum theory and postmodernist arguments arguments informed by post structuralist theory e g barthes derrida foucault with affinities to arguments for the limitations of science in the philosophy sociology and rhetoric of science some of these poems reveal the discursive ideologies of scientific language reveal in other words the performativity of scientific language in doing so these poems themselves can also be read as performative acts and therefore as forms of intervention rather than representation reading retallack alongside science studies scholar karen barad the book concludes by proposing that viewing knowledge as a form of intervention rather than representation offers a bridge between contemporary poetry and science written not by a journalist or politician but rather by a theology professor with a ph d in new testament studies voting by the bible the economic and foreign policy issues begins with the assumption that god intended the bible to give guidance to every area of life including how governments should function derived from author wayne grudem s magisterial politics according to the bible this book highlights those economic and foreign policy issues that have dominated political debate recently throughout author wayne grudem supports political positions that would be called more conservative than liberal however it is important to understand that i see these positions as flowing out of the bible s teachings rather than positions i hold prior to or independently of those biblical teachings he writes my primary purpose in the book is not to be liberally or conservative or democrat or republican but to explain a biblical worldview and a biblical perspective on issues of politics law and government concise yet carefully argued this book is a must read for any christian concerned about current debates over the economy the size and role of government and the best way forward out of the current recession not every reader will agree with the book s conclusions but by grounding his analysis deeply on scripture grudem has equipped christians to better understand and respond to some of today s key political debates wisely and in a manner consistent with their primary citizenship as members and ambassadors of the
