over the years romans 9 11 has been investigated from a variety of approaches with one of the most prominent being an intertextual reading however most discussions of intertextual studies on this section of romans fail to adequately address paul s discourse patterns and that of his jewish contemporaries with regard to god israel and the gentiles adapting lemke s linguistic intertextual thematic theory this study uses a methodological control to analyze the discourse patterns in romans 9 11 through this analysis the author demonstrates the divergence of paul s viewpoints on several typical jewish issues which suggests that his discontinuities from his jewish contemporaries are obvious and sometimes radical it is apparent that romans 9 11 not only provides a self presentation of paul as a

mosaic prophet figure but overall it appears as a prophetic discourse reinforcing the notion that paul s message comes from divine authority

cynicism often seems a smarter choice than idealism there are reasons for this politicians have disappointed us time and again trusted institutions have proven to be self serving and corrupt hopes

for lasting world peace repeatedly have been dashed and social inequities persist and increase unabated by even the grandest of charitable efforts it is now considered foolish to think that people can be counted on to rise above their narrow self interests to serve the broader good or to tell the truth if it does not reflect well on the self supporting this bleak view of the human condition is a moral psychology that has taken increasingly cynical turns in recent years famous studies have shown that we have an almost unlimited potential for cruelty when placed in the wrong situations the power of ideals presents a different vision supported by a different kind of evidence it examines the lives and work of six 20th century moral leaders who pursued moral causes ranging from world peace to social justice and human rights using these six cases to illustrate how people can make choices guided by their moral convictions rather than by base emotion or social pressures authors william damon and anne colby explore the workings of three virtues inner truthfulness humility and faith through their portrayal of the noble lives of moral leaders the authors argue that all of us with ordinary lives can exercise control over important life decisions and pursue ideals that we believe in

in the end of the cognitive empire boaventura de souza santos further develops his concept of the epistemologies of the south in which he outlines a theoretical methodological and pedagogical framework for challenging the dominance of eurocentric thought as a collection of knowledges born of and anchored in the experiences of marginalized peoples who actively resist capitalism colonialism and patriarchy epistemologies of the south represent those forms of knowledge that are generally discredited erased and ignored by dominant cultures of the global north noting the declining efficacy of

established social and political solutions to combat inequality and discrimination santos suggests that global justice can only come about through an epistemological shift that guarantees cognitive justice such a shift would create new alternative strategies for political mobilization and activism and give oppressed social groups the means through which to represent the world as their own and in their own terms

many famous antique texts are misunderstood and many others have been completely dismissed all because the literary style in which they were written is unfamiliar today so argues mary douglas in this controversial study of ring composition a technique which places the meaning of a text in the middle framed by a beginning and ending in parallel to read a ring composition in the modern linear fashion is to misinterpret it douglas contends and today s scholars must reevaluate important antique texts from around the world found in the bible and in writings from as far a field as egypt china indonesia greece and russia ring composition is too widespread to have come from a single source does it perhaps derive from the way the brain works what is its function in social contexts the author examines ring composition its principles and functions in a cross cultural way she focuses on ring composition in homer s iliad the bible s book of numbers and for a challenging modern example laurence Sterne s tristram shandy developing a persuasive argument for reconstruing famous books and rereading
